| Margaret Herrera, Maricopa Association of Governments | Kurtis Harris, ADOT |

DRAFT

Executive Summary

This plan represents the first Strategic Transportation Safety Plan (STSP) for Pinal County. Pinal County is a member of three regional planning agencies: Maricopa Association of Governments (MAG), Central Arizona Governments (CAG) and the Sun Corridor Metropolitan Planning Organization (SCMPO). Over the last 4 years, these three planning agencies have each completed a Safety Plan (MAG – 2015, SCMPO – 2016, CAG – 2017). Because of the boundary locations of the three planning agencies, portions of Pinal County are represented in each of the plans. The Pinal County STSP was developed to address the needs of the entire County in a single, cohesive, and comprehensive document.

The purpose of this STSP is to identify key strategies and resources that can be implemented to reduce the risk of fatal and serious injury crashes occurring on roadways within the County. The STSP provides a framework for the County to identify and implement these strategies and to track their progress in the future.

The STSP was developed using:

- 10 years of crash data (2008-2017)
- Safety plan findings from the Arizona Department of Transportation (ADOT), Sun Corridor Metropolitan Planning Organization (SCMPO), Maricopa Association of Governments (MAG), and Central Arizona Governments (CAG)
- Input from the Safety Technical Advisory Committee (STAC)
- Input obtained during public and stakeholder meetings
- Input from an online survey

The STAC provided oversight and feedback during the development of the STSP, including guidance in creating the vision, goal, and priority emphasis areas. The STSP vision is: ***STRIVING FOR ZERO DEATHS – One is Too Many!***, and the goal is: ***Achieve a consistent and sustainable annual reduction in traffic deaths on public roads within Pinal County.***

Priority emphasis areas are:

- Lane Departure
- Intersections
- Vulnerable Users: Pedestrians, Bicyclists, Motorcyclists
- Age Related: Under 25, Over 64
- Behavior Related: Speeding, Impaired Driving, Occupant Protection, Distracted Driving

Excel-based network screening tools were developed to allow local agencies to easily prioritize their intersections and road segments based on crash frequency, rate, and severity, and to adjust the weighting of each of these three criteria to reflect the agencies' own safety priorities. Network screening of a roadway system is the data-driven analysis of the intersections and segments within the system. The process utilizes spatial analysis of crash data and is performed to determine high priority locations that may require safety improvements. This priority list is then used to plan and implement safety projects at individual locations or at the system-wide level. The list can also serve as a resource for local governments when applying for state or federal traffic safety funding.

A key component of the STSP was to identify projects for pursuing Highway Safety Improvement Program (HSIP) funds. HSIP funding is distributed by ADOT for locations experiencing fatal and serious injury crashes. Thirteen HSIP applications were developed and awarded \$13 million during the past two cycles of HSIP call for projects. These include:

Fiscal years 2021-2022:

- **Hunt Highway, Gary Road to Bella Vista Road:** Left-turn and pedestrian crashes, to be addressed with installation of flashing yellow arrows, median modifications for improved sight distance, and sidewalk
- **Gantzel Road, Ocotillo Road to Combs Road:** Left-turn, angle, and pedestrian crashes, to be addressed with installation of flashing yellow arrows, median modifications for improved sight distance, median installation, and sidewalk
- **Countywide Lane Departure Systemic Improvements:** Lane departure crashes to be addressed with installation of 73 miles of center and edge line rumble strips on 15 roads
- **Kings Ranch Road at Sunrise Sky Drive:** Pedestrian crash to be addressed with Pedestrian Hybrid Beacon
- **Cottonwood Lane at Kadota Avenue:** Pedestrian crash to be addressed with Pedestrian Hybrid Beacon
- **Skousen Road/Eleven Mile Corner Road, SR 87 to Battaglia Road:** Lane departure and intersection crashes to be addressed with installation of center and edge line rumble strips and installation of center line and stop bar with replacement of 24-inch stop sign with 30-inch stop sign at Hanna Road
- **SR 287, Hacienda Road to SR 87:** Lane departure crashes to be addressed with installation of center and edge line rumble strips
- **SR 87 at Kenworthy Road, SR 287 at Christensen Road:** Rear-end crashes to be addressed with installation of turn lanes

Fiscal years 2023-2024:

- **Apache Trail, Superstition Blvd (Apache Junction):** Nighttime crashes to be addressed with street lighting
- **Ironwood Drive (Apache Junction):** Road departure crashes to be addressed with shoulder widening and rumble strips
- **Countywide Systemic Intersection Improvements:** Angle crashes to be addressed with installation of LED Stop Signs at 13 intersections in the County, including Casa Grande, Coolidge, Eloy, and Gila River Indian Community
- **Gantzel Road, Bella Vista Road to Rebecca Lane:** Pedestrian crash to be addressed with sidewalk installation
- **SR 87/Kleck Road:** Rear-end crashes to be addressed with installation of left-turn lanes

DRAFT

1 Introduction

This plan represents the first Strategic Transportation Safety Plan (STSP) for Pinal County. The purpose is to identify key strategies and resources that can be implemented to reduce the risk of fatal and serious injury crashes occurring on roadways within the County. This STSP provides a framework for the County to identify and implement these strategies and to track their progress in the future.

1.1 Overview and Purpose

Pinal County is a member of three regional planning agencies: Maricopa Association of Governments (MAG), Central Arizona Governments (CAG) and the Sun Corridor Metropolitan Planning Organization (SCMPO). Over the last 4 years, these three planning agencies have each completed a Safety Plan (MAG – 2015, SCMPO – 2016, CAG – 2017). Because of the boundary locations of the three planning agencies, portions of Pinal County are represented in each of the plans. The Pinal County STSP was developed to address the needs of the entire County in a single, cohesive, and comprehensive document.

1.2 Strategic Transportation Safety Plan Development

Collaboration is a key factor in the development of a successful Strategic Transportation Safety Plan (STSP). Pinal County and the SCMPO led the development of the Plan with involvement and direction from other agencies and local stakeholders. The stakeholders shown in Figure 1 were involved in a Safety Technical Advisory Committee (STAC) that helped establish a vision and goal for the County, provided input on identifying emphasis areas, and assisted with the identification of projects that were considered for Highway Safety Improvement Program (HSIP) funds.

Figure 1: Safety Technical Advisory Committee Members

This safety plan was developed using a data-driven, multi-disciplinary approach that encompassed the 4 E's of transportation safety: Engineering, Enforcement, Education and Emergency Services.

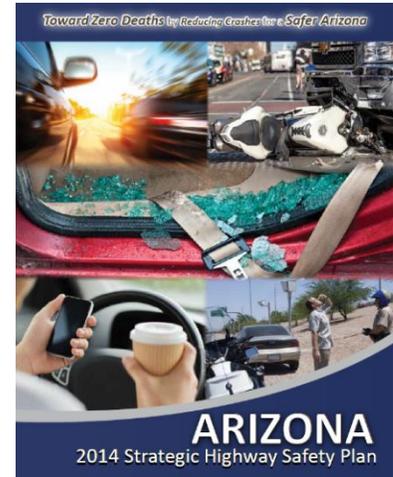

1.3 Coordination with Local Plans

The Pinal County STSP was developed in accordance with the safety goals, programs and strategies set forth in previous statewide and regional safety plans as well as other Pinal County plans and efforts. Review of the following documents was a critical step in determining appropriate strategies for Pinal County and ensuring consistency across all planning documents being utilized by the County.

Arizona Strategic Highway Safety Plan

The Arizona Strategic Highway Safety Plan (SHSP) was developed through a data-driven, collaborative approach among Arizona’s safety stakeholders. The SHSP represents the Arizona state safety goal statement and identifies the Emphasis Areas that the state will focus on to achieve its goal. The SHSP is an overarching strategic statewide safety document to guide safety planning and programming processes; facilitate implementation of recommended safety strategies and countermeasures through existing plans and programs; and modify current planning processes over time to adopt and institutionalize a change in Arizona’s transportation safety culture.

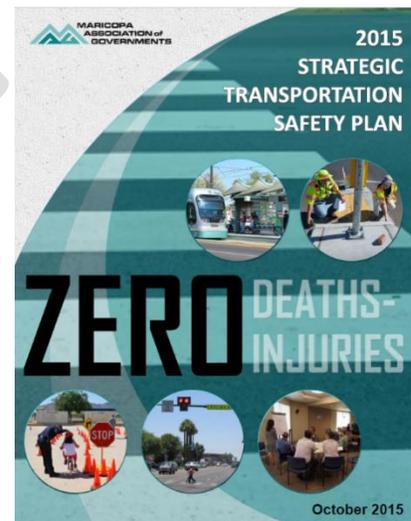

In August 2014, the Arizona SHSP Executive Committee approved the Arizona 2014 Strategic Highway Safety Plan. Currently, ADOT is completing a 2019 update to the SHSP which will update the crash data and track the State’s current progress towards the established safety goal for fatal and serious injury crashes on state facilities.

Maricopa Association of Governments STSP

The 2015 Maricopa Association of Governments (MAG) STSP is an update to the 2005 STSP developed by MAG’s Transportation Safety Committee. The STSP identifies regional priorities, strategies, resource needs and performance indicators. It also establishes an approach for identifying and enacting solutions for road safety issues that affect all agencies in the MAG region. The STSP’s development was coordinated with the ADOT 2014 SHSP.

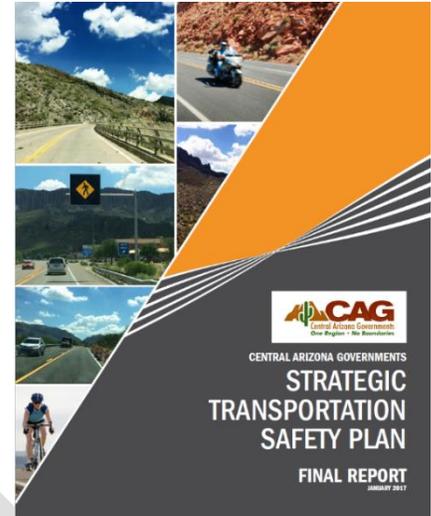

A project is currently underway to develop a comprehensive, dynamic, and forward-thinking update to the 2015 MAG STSP.

The MAG region boundary intersects the northern, central, and western portions of Pinal County including the Town of Florence and Cities of Maricopa and Apache Junction and the unincorporated community of San Tan Valley.

Central Arizona Governments STSP

The Central Arizona Governments (CAG) STSP is a regional transportation safety plan that utilizes the results of crash data analysis and stakeholder/public input to identify proven strategies, actions, programs, and projects to reduce the prevalence of transportation-related fatalities and serious injuries. The STSP was developed in coordination with the Arizona Department of Transportation (ADOT), local governments, tribal representatives, and other transportation and safety stakeholders. The STSP provides the Region with a framework for reducing transportation-related fatalities and serious injury crashes and the personal and economic costs of crashes and enhancing livability and public health.

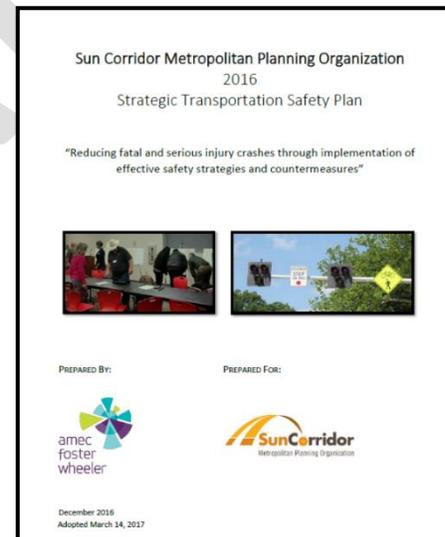

The CAG region boundary includes all of Pinal County and extends north into Gila County to include the City of Globe, Town of Payson and portions of the San Carlos and Fort Apache Indian Reservations.

Sun Corridor MPO STSP

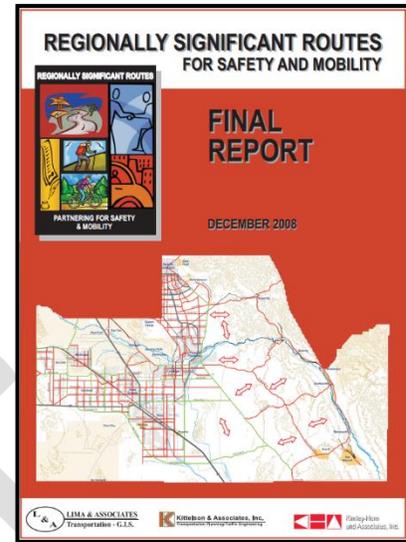

This safety plan represents the first STSP for the SCMPO region. This plan establishes a vision, goal, emphasis areas, strategies, network screening methodology, and potential safety projects for the region, consistent with those set forth by the Arizona State Highway Safety Plan (SHSP). The purpose of this safety plan is to reduce the risk of death and serious injury to all transportation users in the SCMPO region.

The SCMPO region boundary falls entirely within Pinal County and includes the Cities of Casa Grande, Coolidge and Eloy and the unincorporated community of Arizona City.

Pinal County’s Regionally Significant Routes for Safety and Mobility Plan

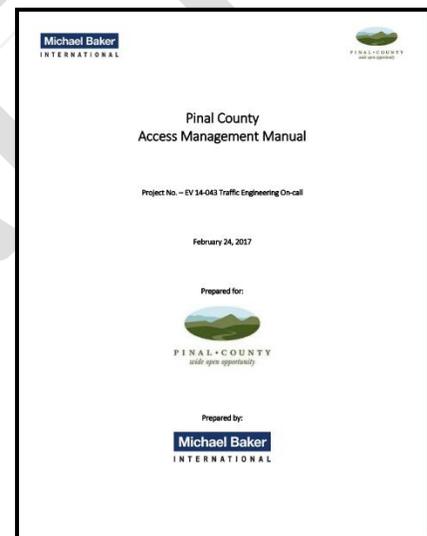

In 2008 a plan was developed to identify Regionally Significant Routes (RSR) within Pinal County. The plan explores ways to improve safety, access and mobility through a partnering approach with federal, state, county, local, tribal, and private stakeholders. The purpose of the plan was to provide a guide for the County and other stakeholders to implement and fund the RSR. The plan was also used as a guide to preserve rights-of-way for the identified routes when development occurred throughout the county.

Pinal County Access Management Manual

In 2016, the County’s Access Management Manual was updated and modified into a stand-alone document. Updates to the manual included access management standards for all functional roadway classifications. The purpose of this manual update was to enable consistent application of access management criteria on all County roadways. In addition, the map for the RSR was updated and approved by the Pinal County Board of Supervisors in 2017. The benefits of access management include:

- Reduction in crash frequency, especially severe crashes
- Improved pedestrian safety
- Reduced congestion
- Improved travel times
- Spurs economic development

The routes identified on the RSR map represent opportunities to address traffic safety in the region, either through improvements to existing roads or with new alignments. Improvements that lend themselves to systemic implementation are ideal for these RSR projects, including:

- | | |
|--|-------------------------------------|
| Wider pavement markings * | Bike lanes |
| Paved shoulders | Sidewalks |
| Roadway lighting | Safety Edge |
| Shoulder and center line rumble strips | Positive offsets of left-turn lanes |
| Raised pavement markings | |

*The next edition of the Manual on Uniform Traffic Control Devices is expected to require use of 6-inch wide edge and center lines.

*Regionally Significant Routes
for Safety & Mobility - 2017 UPDATE*

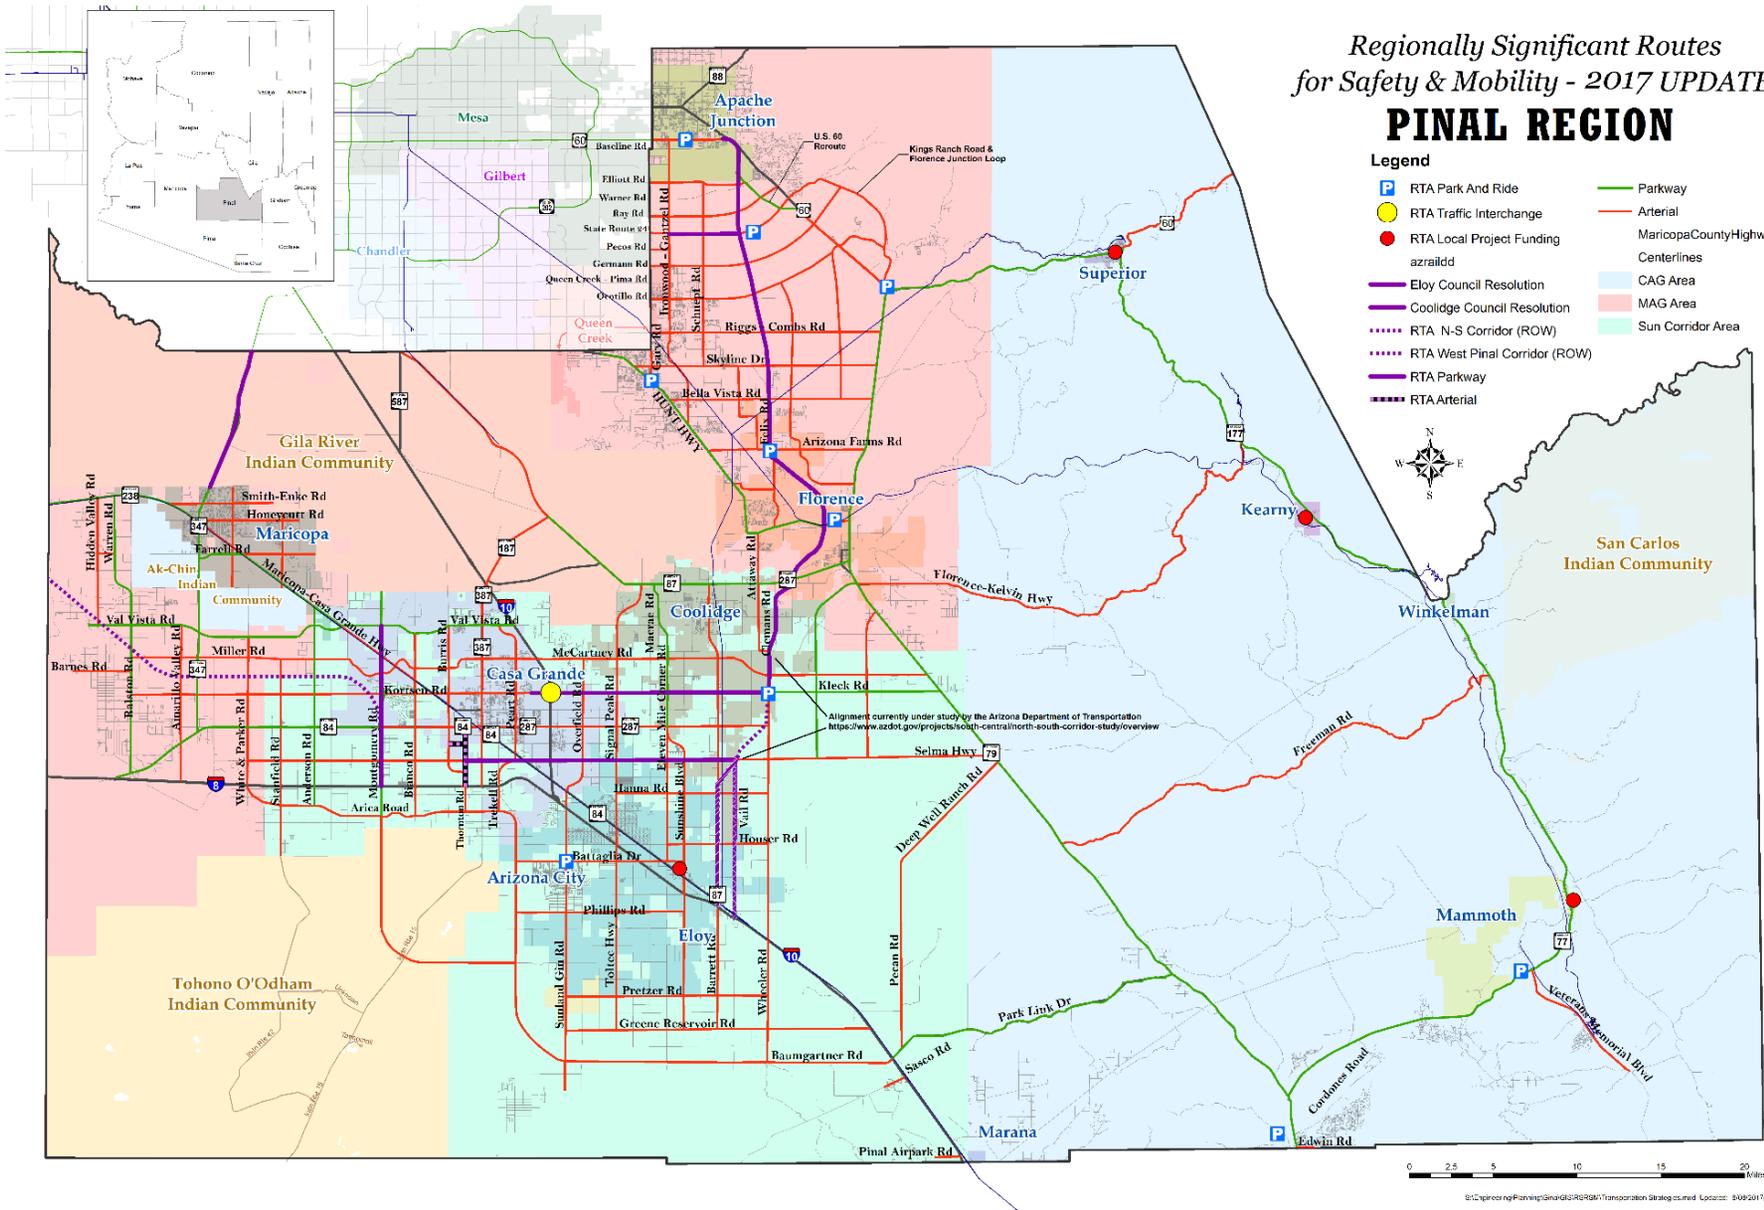

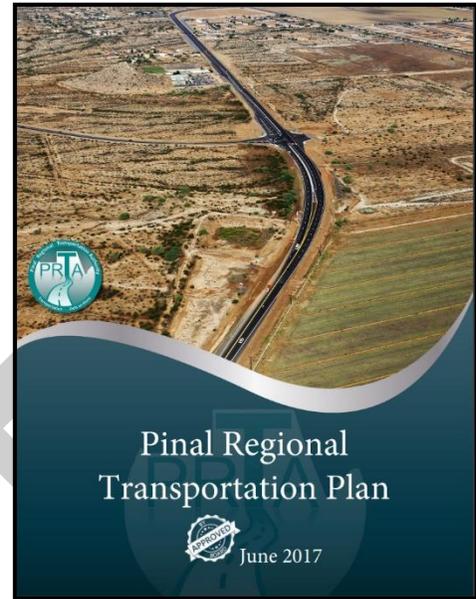

Figure 2: Regionally Significant Routes for Safety & Mobility Map – 2017 Update

Pinal Regional Transportation Authority Plan

On August 5, 2015, the Pinal County Board of Supervisors formed the Pinal Regional Transportation Authority (RTA). The Pinal RTA was formed to provide a balanced regional transportation system, manage the Regional Transportation Fund, provide a twenty-year regional transportation plan, and authorize funding for all modes of transportation projects. The RTA's ½ cent sales tax is estimated to generate \$640 million over 20 years to be used to fund roadway and public transportation elements of the plan. Additional information on the RTA can be found at pinalrta.org.

Although the RTA Plan does not specifically identify funding for safety related projects, there are opportunities to incorporate safety improvements into the design of the RTA projects. The Pinal RTA lists three basic types of projects, all with their own unique safety concerns: widening to a minor arterial, widening or building to a principal arterial, and an interstate traffic interchange.

Minor arterials serve moderate length trips without penetrating identified neighborhoods. The projects listed in the Pinal RTA that are upgrading roadways to minor arterials are:

- Thornton Road: SR84 to Interstate 8
- Peters Road: Burriss Road to Thornton Road
- Selma Highway: Thornton Road to North/South Corridor
- Montgomery Road: Interstate 8 to East/West Corridor

Due to the relatively high usage of these types of roadways and the type of access that is allowed, the types of crashes that Pinal County experiences are typically lane departures in the rural areas and intersection-related in the denser areas. While in the design phase for these roadway improvements, the County should consider the following types of safety upgrades to these roads:

- Shoulder and centerline rumble strips
- Safety Edge
- Paved shoulders
- Raised pavement markers
- Wider pavement markings (6-inch)
- Turn lanes
- Traffic signals

The second type of project listed in the Pinal RTA is widening or building a principal arterial. Principal arterials serve major activity centers and have the greatest volume of traffic. Generally, access to these roadways is limited and speeds are often much higher. In Pinal County, many of the accidents experienced on rural principal arterials are lane departures. Therefore, it is recommended that the following safety measures be considered during design:

- Shoulder and centerline rumble strips
- Safety Edge
- Paved shoulders
- Raised pavement markers
- Wider pavement markings (6-inch)

The Pinal RTA identifies the following projects as widening or building of a principal arterial:

- SR347: Maricopa Road to County Line
- SR24 Parkway: Ironwood Road to North/South Corridor
- North/South Corridor
- East/West Corridor

The third type of project that is listed in the Pinal RTA is an interstate Traffic Interchange. This interchange is located at Interstate 10 and Kortsen Road. Safety concerns at interstate interchanges include intersection-related crashes (left-turn, angle, rear-end) and can be mitigated by providing:

- Turn lanes
- Traffic signals
- Appropriate sight distance
- Deceleration/acceleration lanes

2 Current Road Safety Performance

Crash data was obtained from ADOT's Accident Location Identification and Surveillance System (ALISS) database. The most recent 10 years of crash data (2008-2017) was analyzed to determine existing crash performance, identify countywide emphasis areas and establish performance metrics to track future progress.

Figure 3 shows a breakdown of crashes by severity for the 10-year period across the entire County. Fatal and serious injury crashes accounted for approximately 6 percent of the total crashes while no injury crashes accounted for approximately 68 percent of the total crashes.

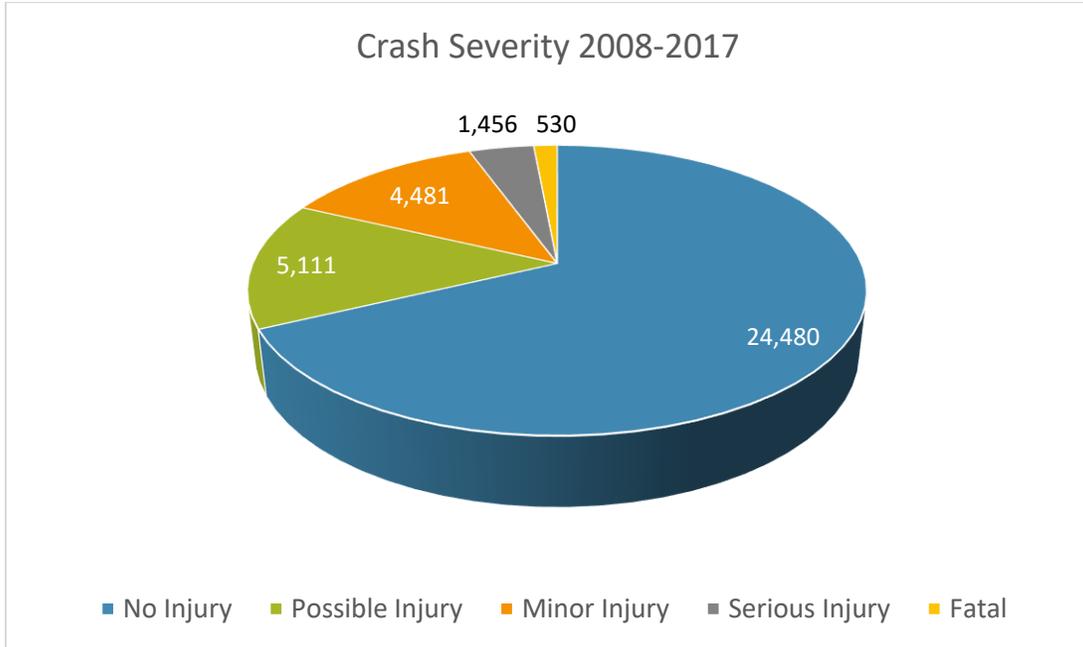

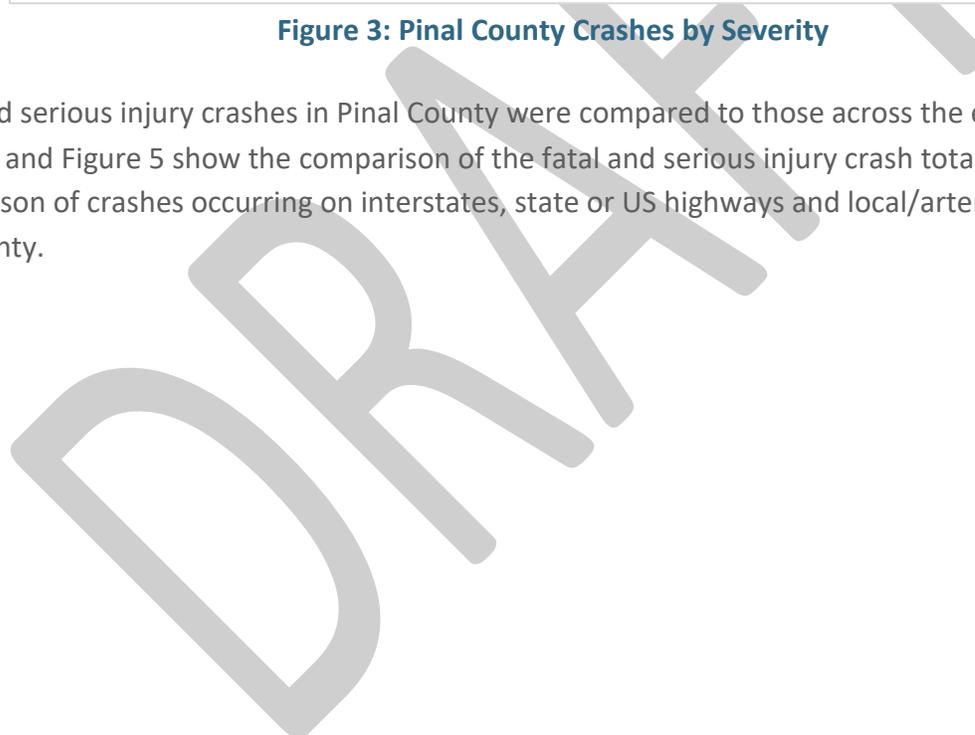

Figure 3: Pinal County Crashes by Severity

Fatal and serious injury crashes in Pinal County were compared to those across the entire state. Figure 4 and Figure 5 show the comparison of the fatal and serious injury crash totals, as well as a comparison of crashes occurring on interstates, state or US highways and local/arterial roads across the County.

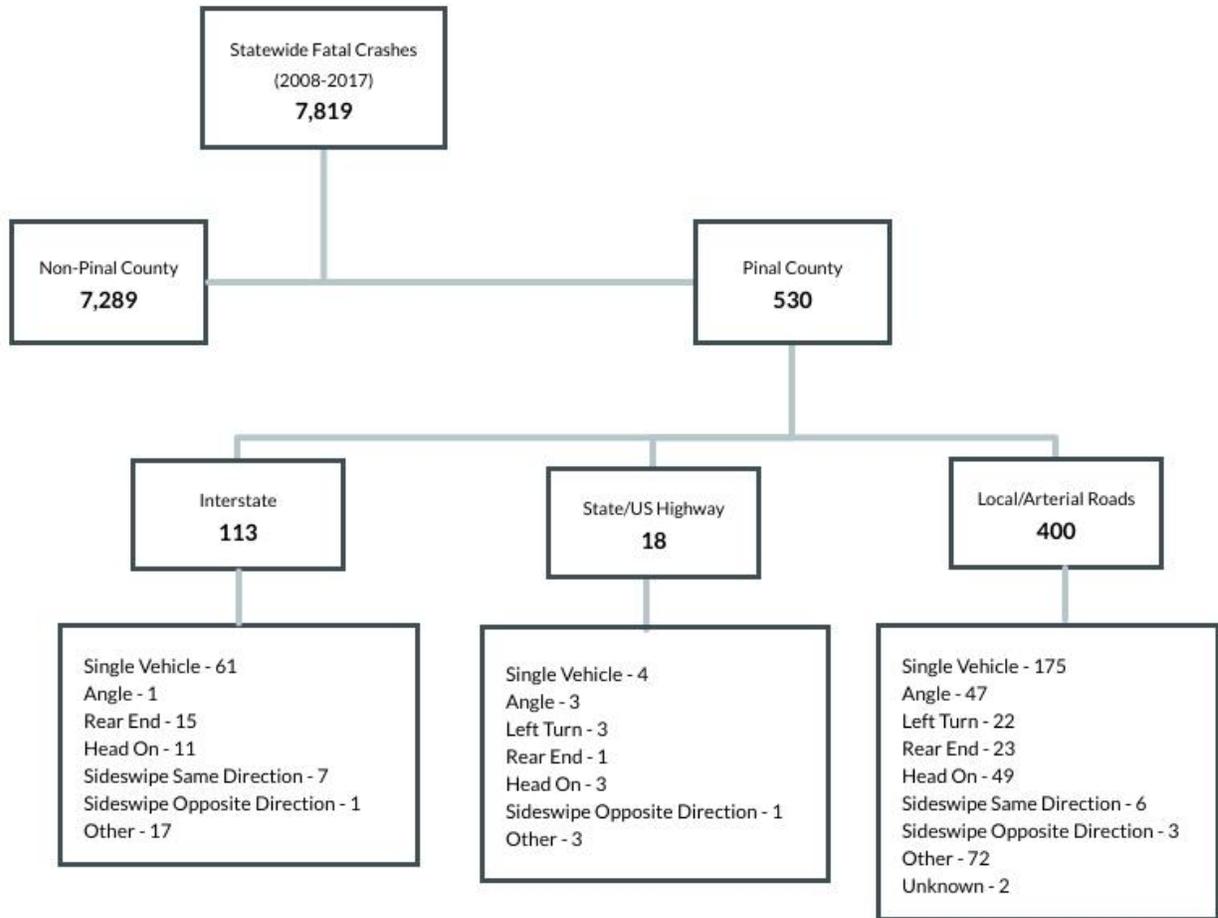

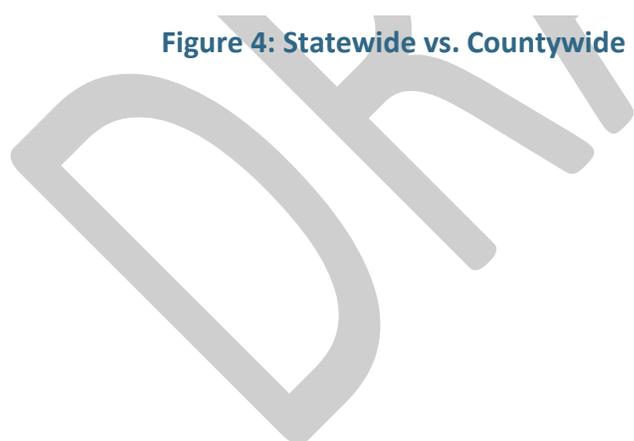

Figure 4: Statewide vs. Countywide Fatal Crash Comparison

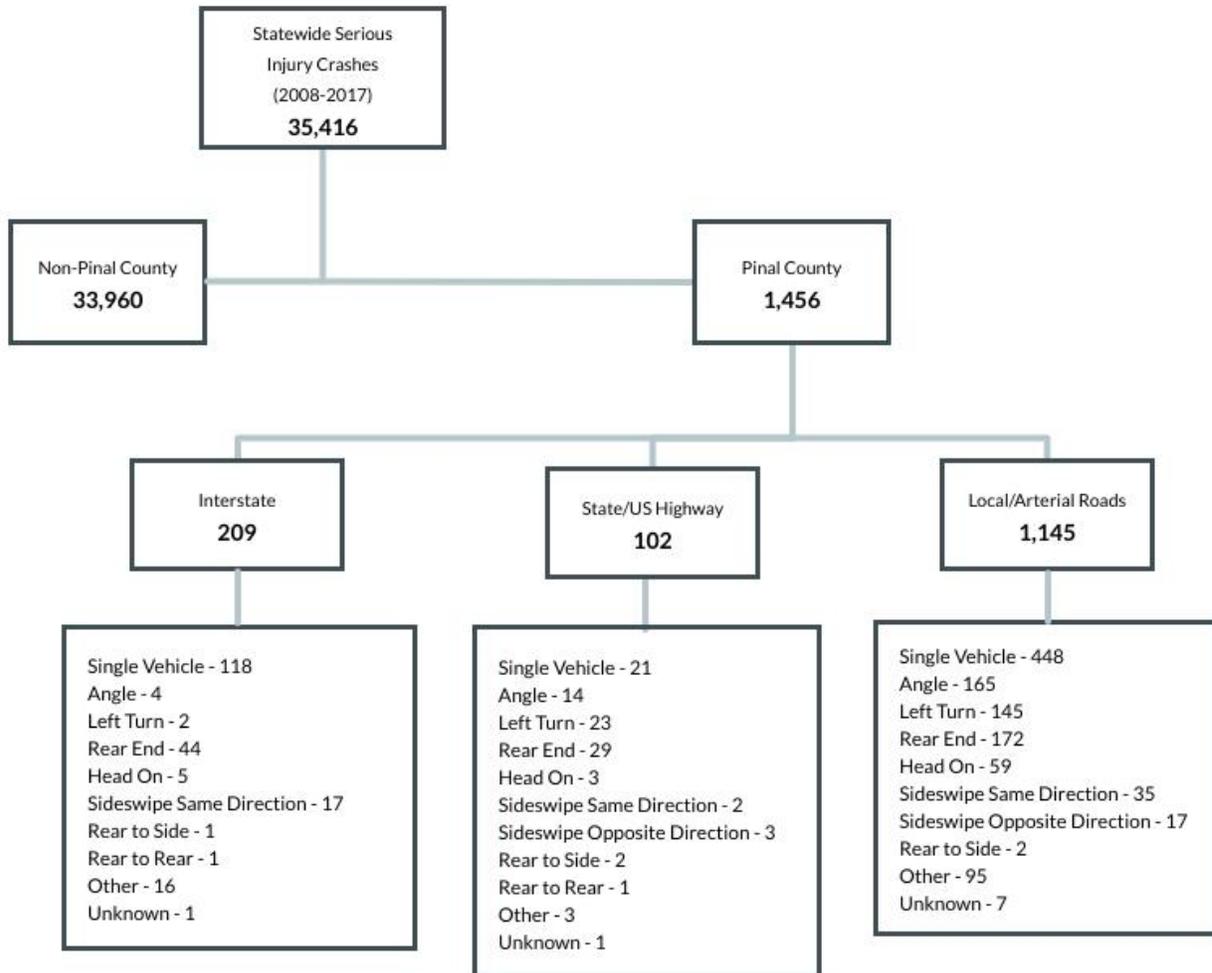

Figure 5: Statewide vs. Countywide Serious Injury Crash Comparison

Table 1 provides the crashes by severity and collision manner. Single vehicle crashes accounted for the highest number of fatal and serious injury crashes, while rear end crashes made up the highest number of total crashes.

Table 1: Pinal County Crashes by Collision Manner and Severity

Collision Manner	Fatal	Incapacitating Injury	Non-Incapacitating Injury	Possible Injury	No Injury	Grand Total
Rear End	39	241	1,094	1,794	7,530	10,698
Single Vehicle	229	573	1,540	1,072	6,535	9,949
Angle	49	176	573	802	2,655	4,255
Left Turn	25	165	490	663	1,966	3,309
Sideswipe Same Direction	13	50	177	192	2,877	3,309
Other	21	57	139	145	1,068	1,430
Sideswipe Opposite Direction	5	20	83	85	463	656
Head On	63	65	107	90	260	585
Rear to Side	0	3	6	18	529	556
Unknown	1	4	31	46	360	442
Bicyclist	14	36	120	129	67	366
Pedestrian	71	64	105	59	46	345
Rear to Rear	0	2	16	16	124	158
Grand Total	530	1,456	4,481	5,111	24,480	36,058

2.1 Crash Trends

Fatal and serious injury crashes are the focus of FHWA and ADOT, and for consistency with the state and federal focus are the focus of this plan. 530 fatal and 1,456 serious injury crashes were experienced in the County over the 10-year study period (2008-2017).

Key findings for fatal crash data analysis include:

- 54% involved impaired driving
- 52% involved lane departure
- 50% occurred during dark/dawn/dusk
- 50% involved unrestrained occupants
- 45% occurred in unincorporated Pinal County (excluding San Tan Valley)
- 43% were single vehicle
- 38% involved speeding
- 18% occurred within the Gila River Indian Community boundaries
- 13% were pedestrian crashes

In Pinal County during the 10-year period of 2008-2017:

36,058 Crashes | **530** Fatal Crashes | **612** people died in the **530** fatal crashes

For fatal pedestrian crashes:

- 82% occurred during dark/dawn/dusk

- 62% involved impaired pedestrian
- 20% occurred within the Gila River Indian Community boundary

Figure 6 illustrates the fatal and serious injury crash totals by year for Pinal County. Each of the 10 study years (2008-2017) are represented.

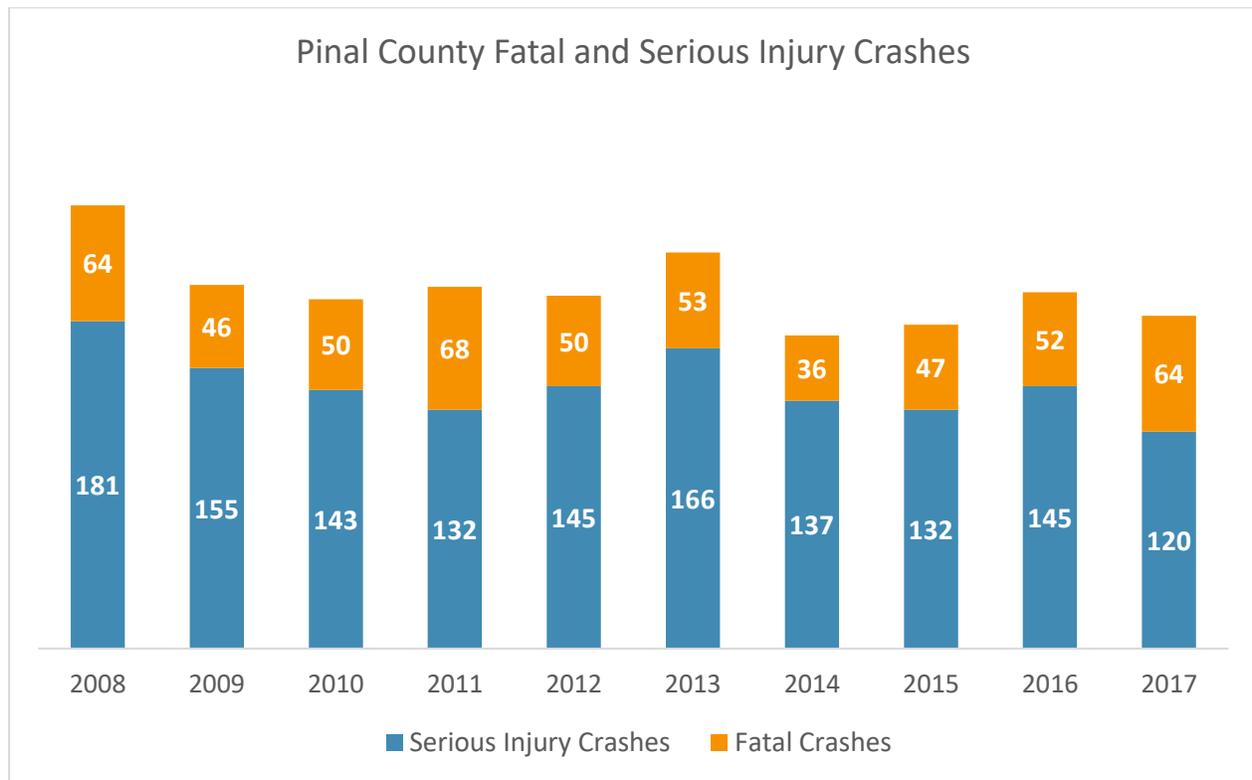

Figure 6: Pinal County Fatal and Serious Injury Crash Totals

2.2 Crash Location

Figure 7 shows the locations of fatal and serious injury crashes across the County for 2008-2017. Unincorporated Pinal County experienced the highest number of fatal and serious injury crashes, with the Gila River Indian Community and Casa Grande ranking with the second and third highest crash totals, respectively. Crashes by location include all crashes occurring within the boundaries of the agency. For example, the Gila River Indian Community crashes include 33 fatal crashes and 75 serious injury crashes on I-10 within the tribal boundary. Even though San Tan Valley and Arizona City are unincorporated communities, their crashes were shown separate from the unincorporated Pinal County crashes at the request of the County.

Figure 8 through Figure 16 contain maps that show the locations of crashes across the county for the 2007-2016 time period. The maps are broken down by location, injury severity and user type (vehicle, pedestrian or bicyclist). A heat map of all serious injury and fatal crashes across the county is shown in Figure 17.

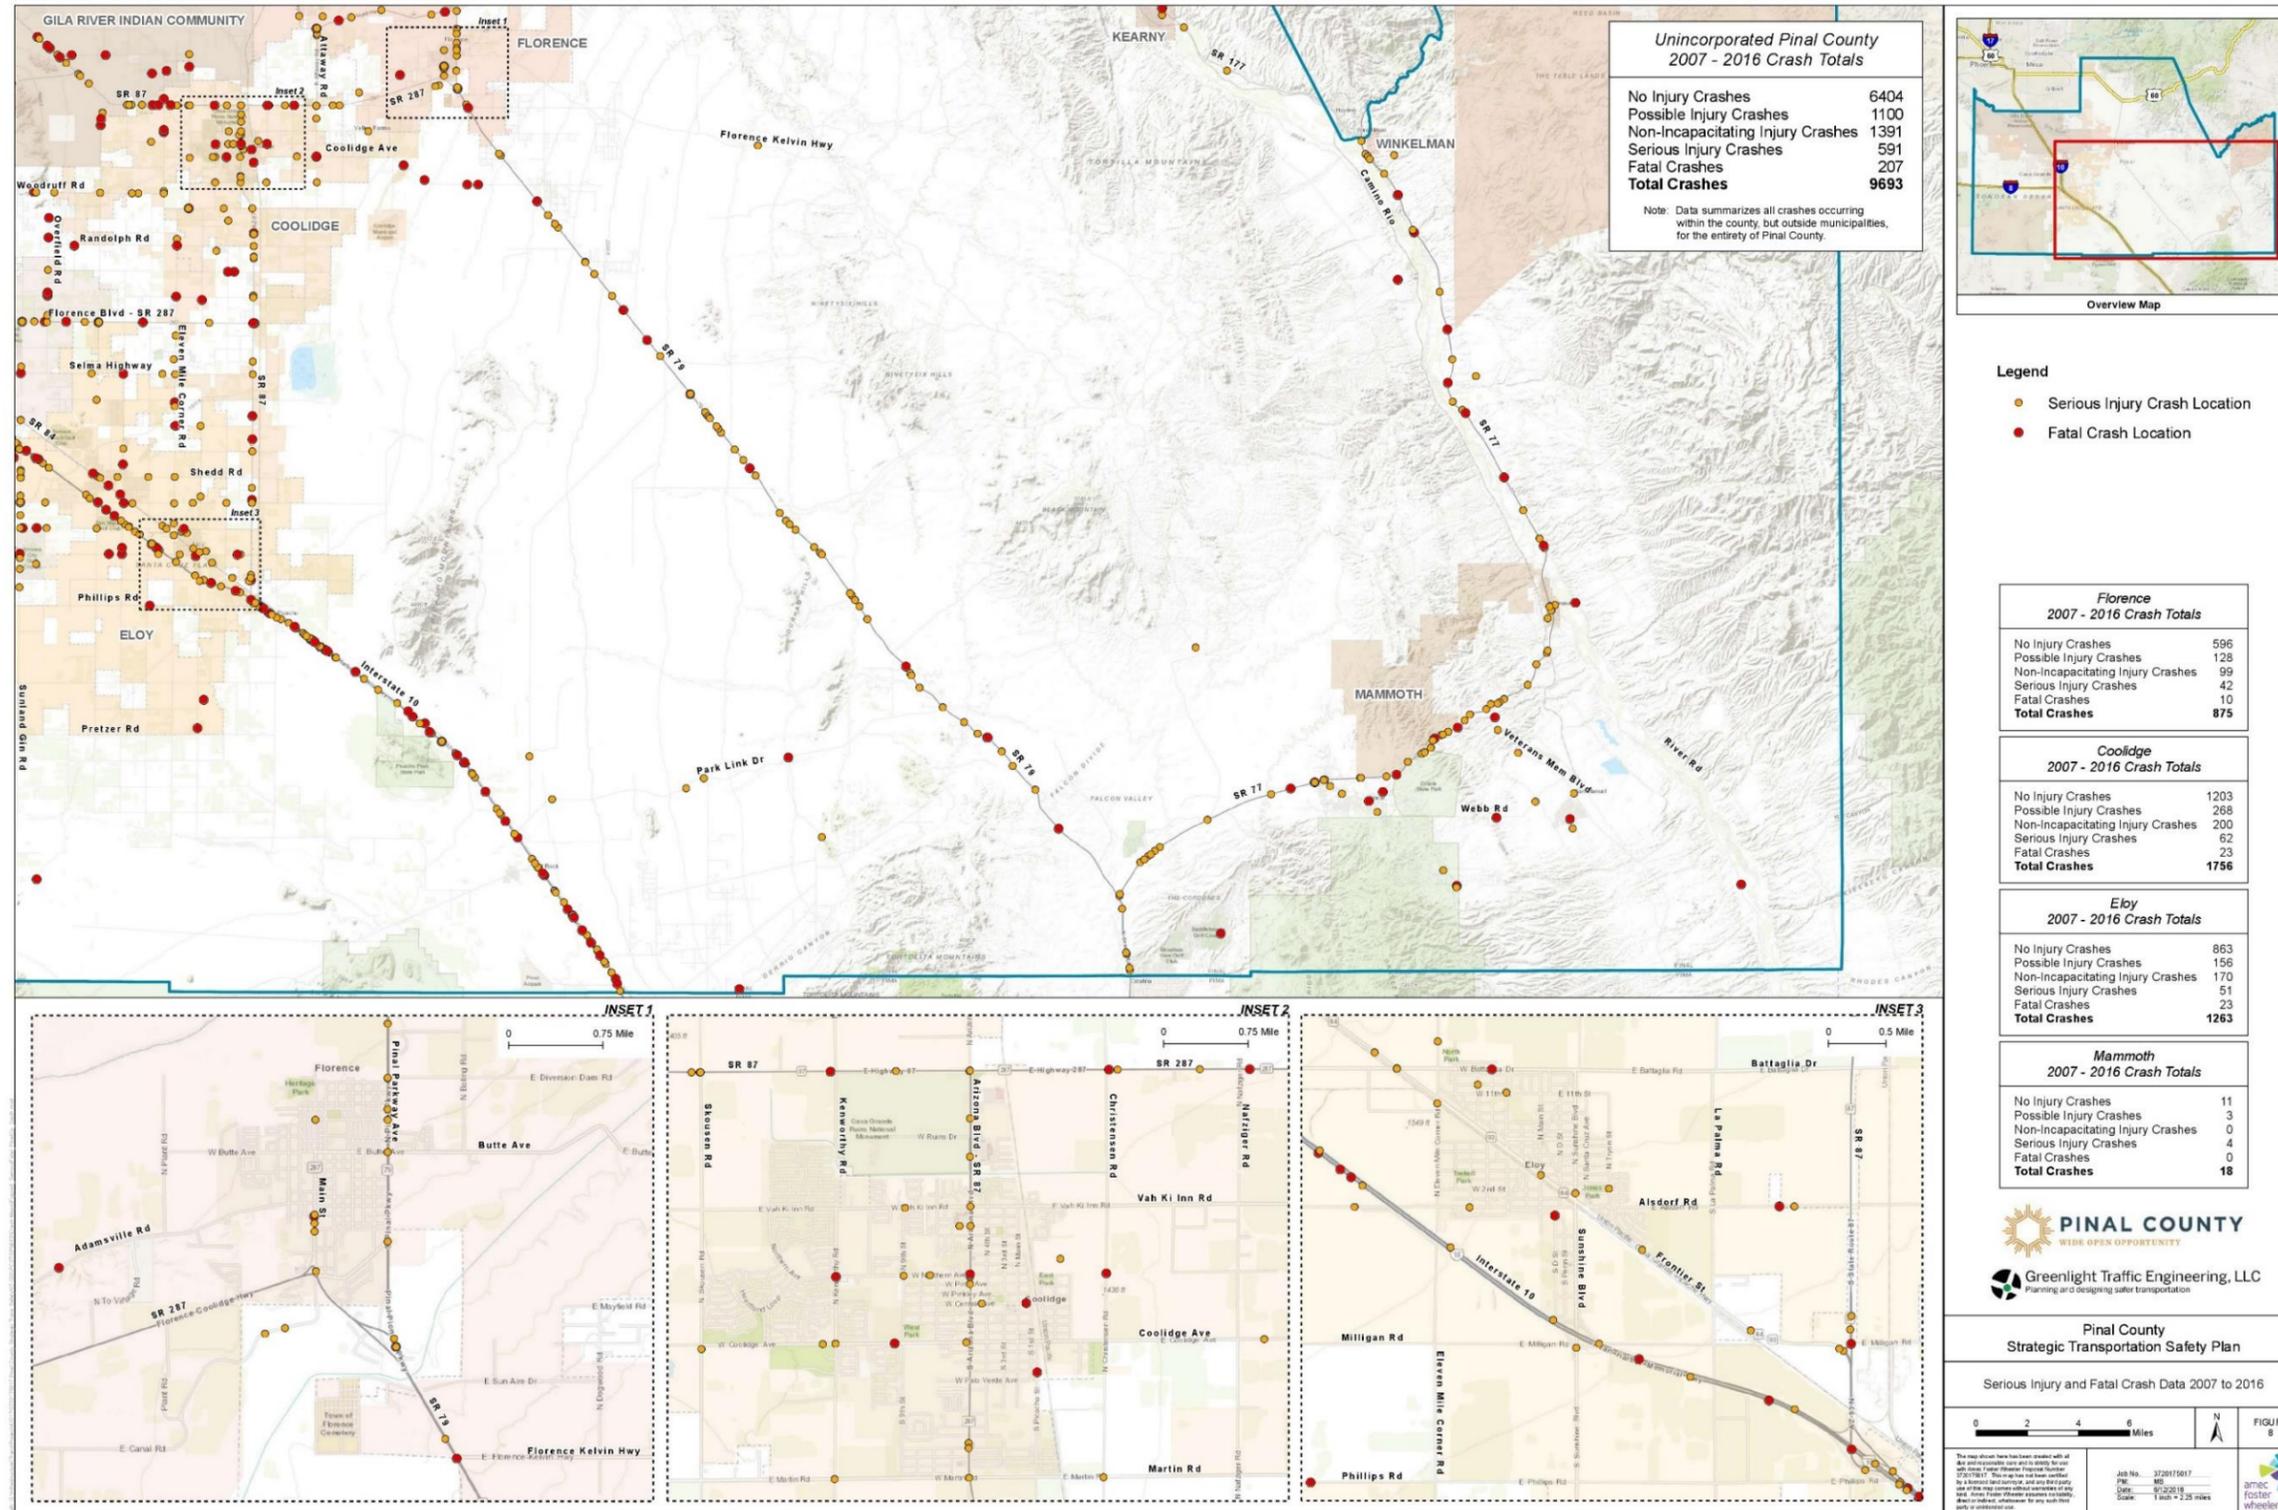

Figure 15: Pinal County South: Fatal and Serious Injury Crashes 2007-2016

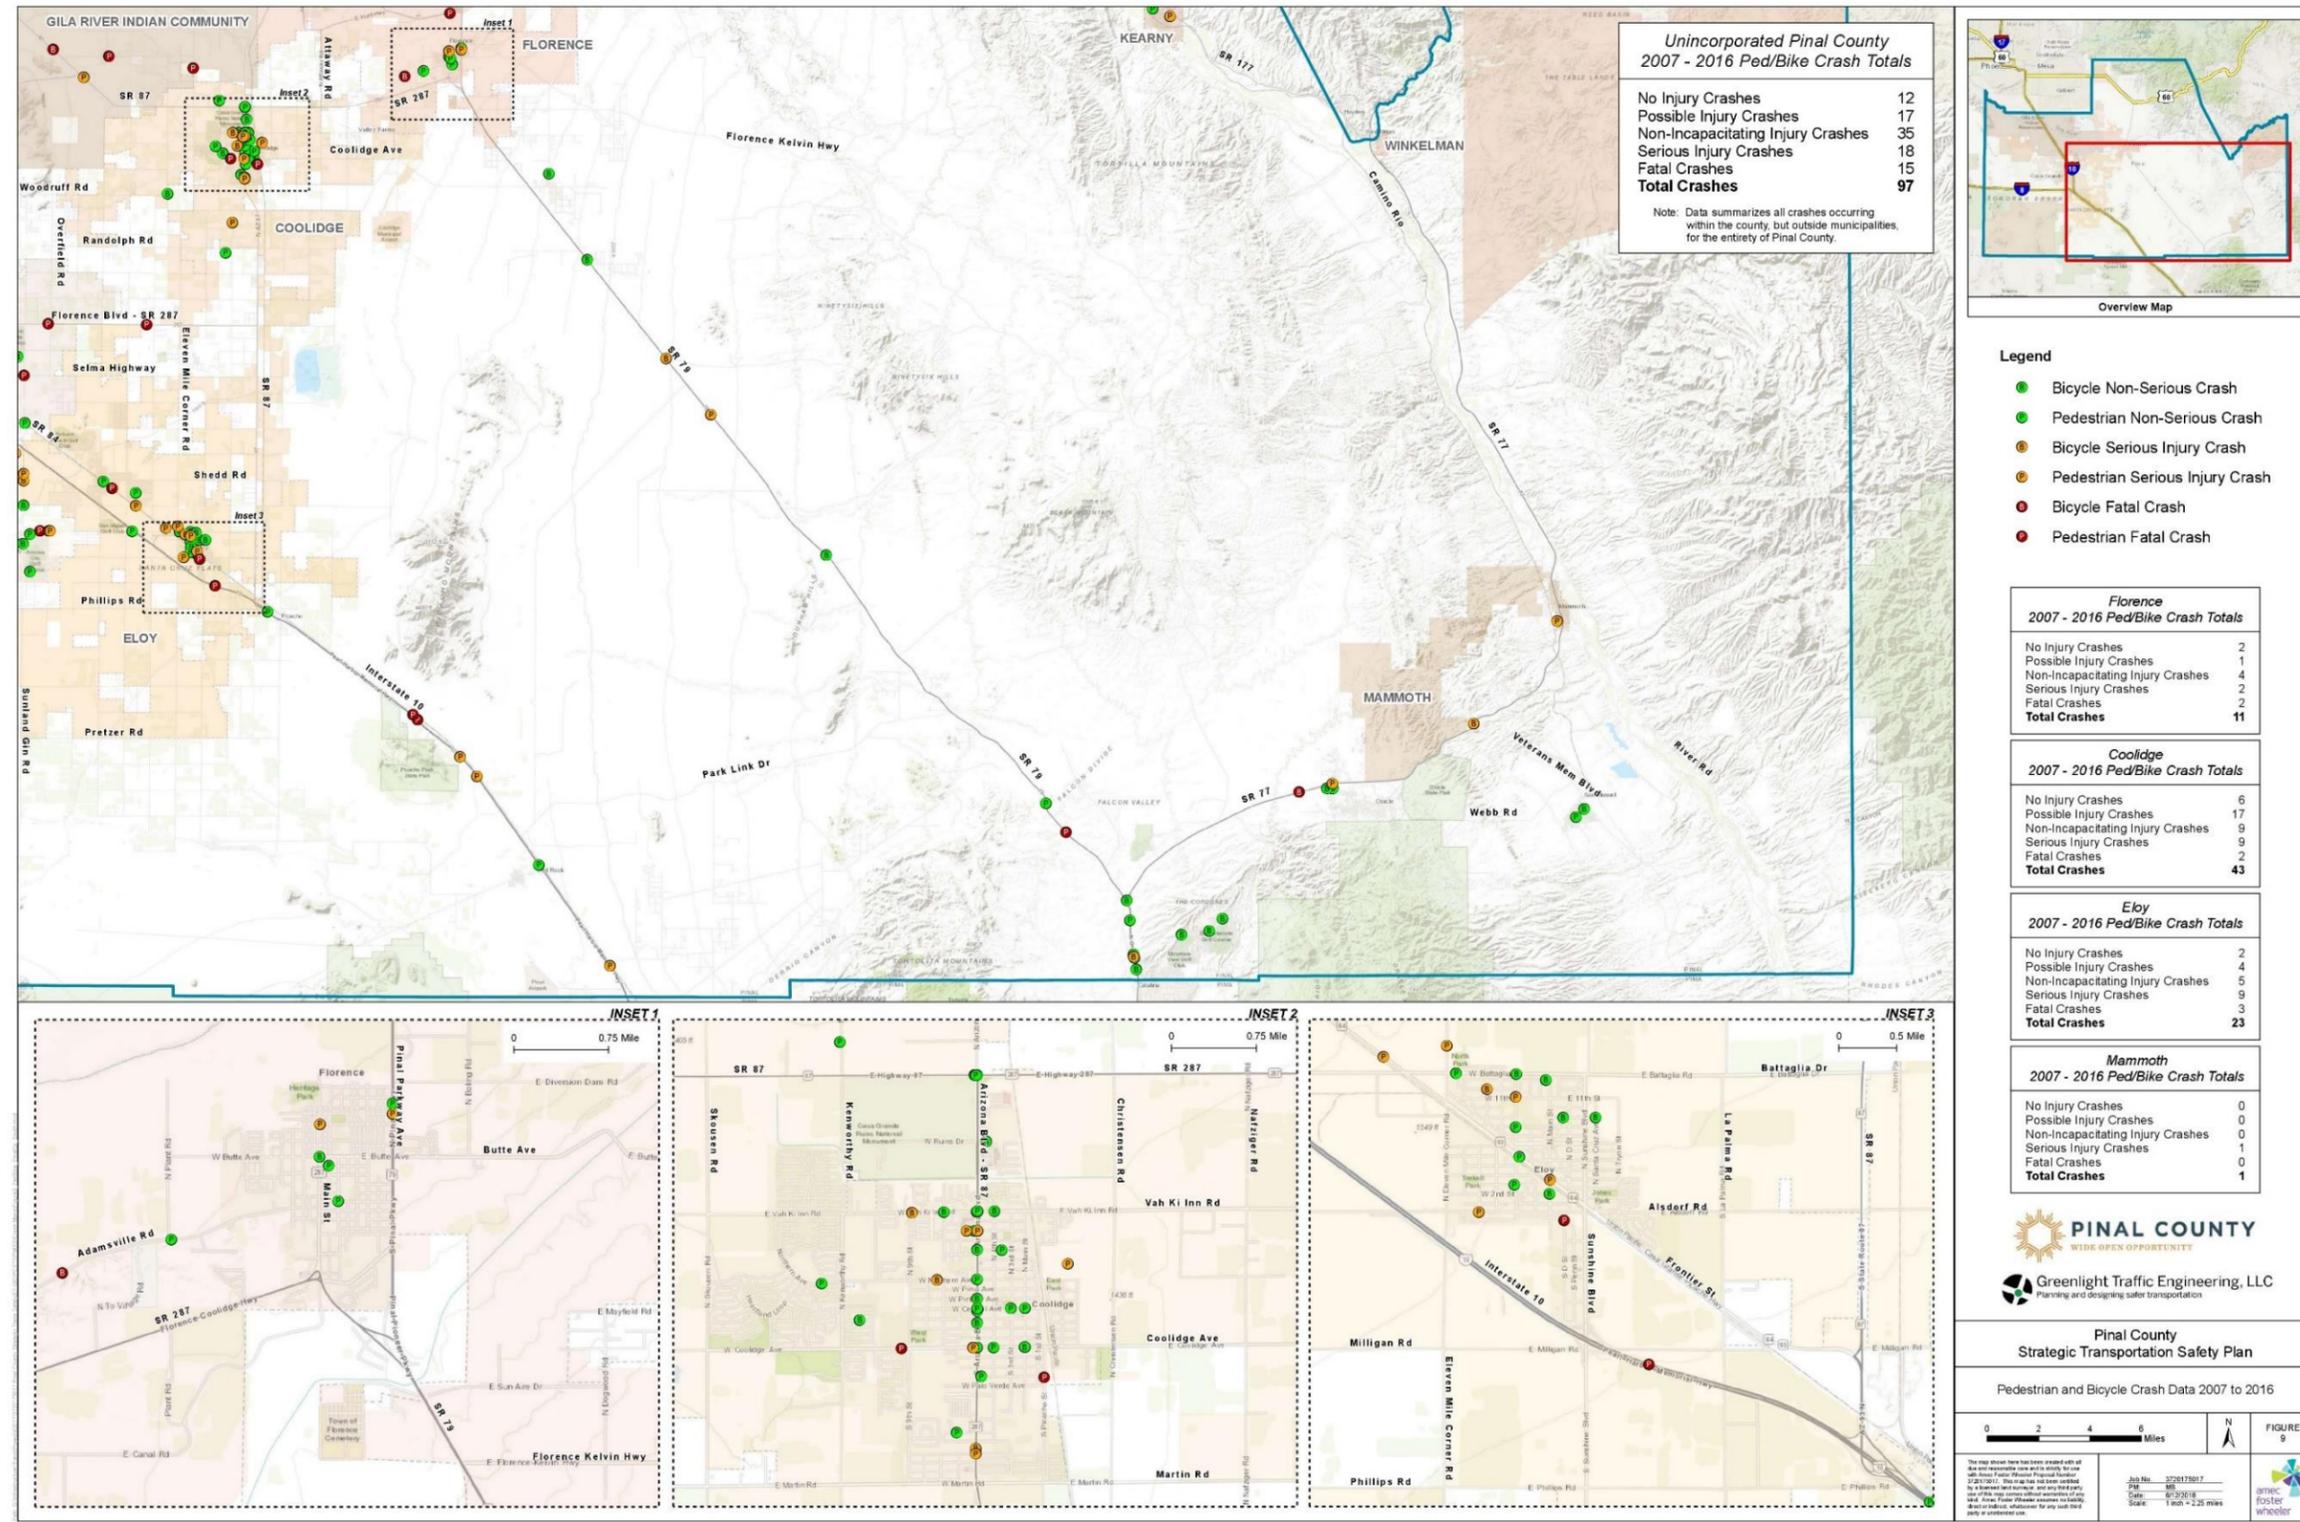

Figure 16: Pinal County South: Pedestrian and Bicycle Crashes 2007-2016

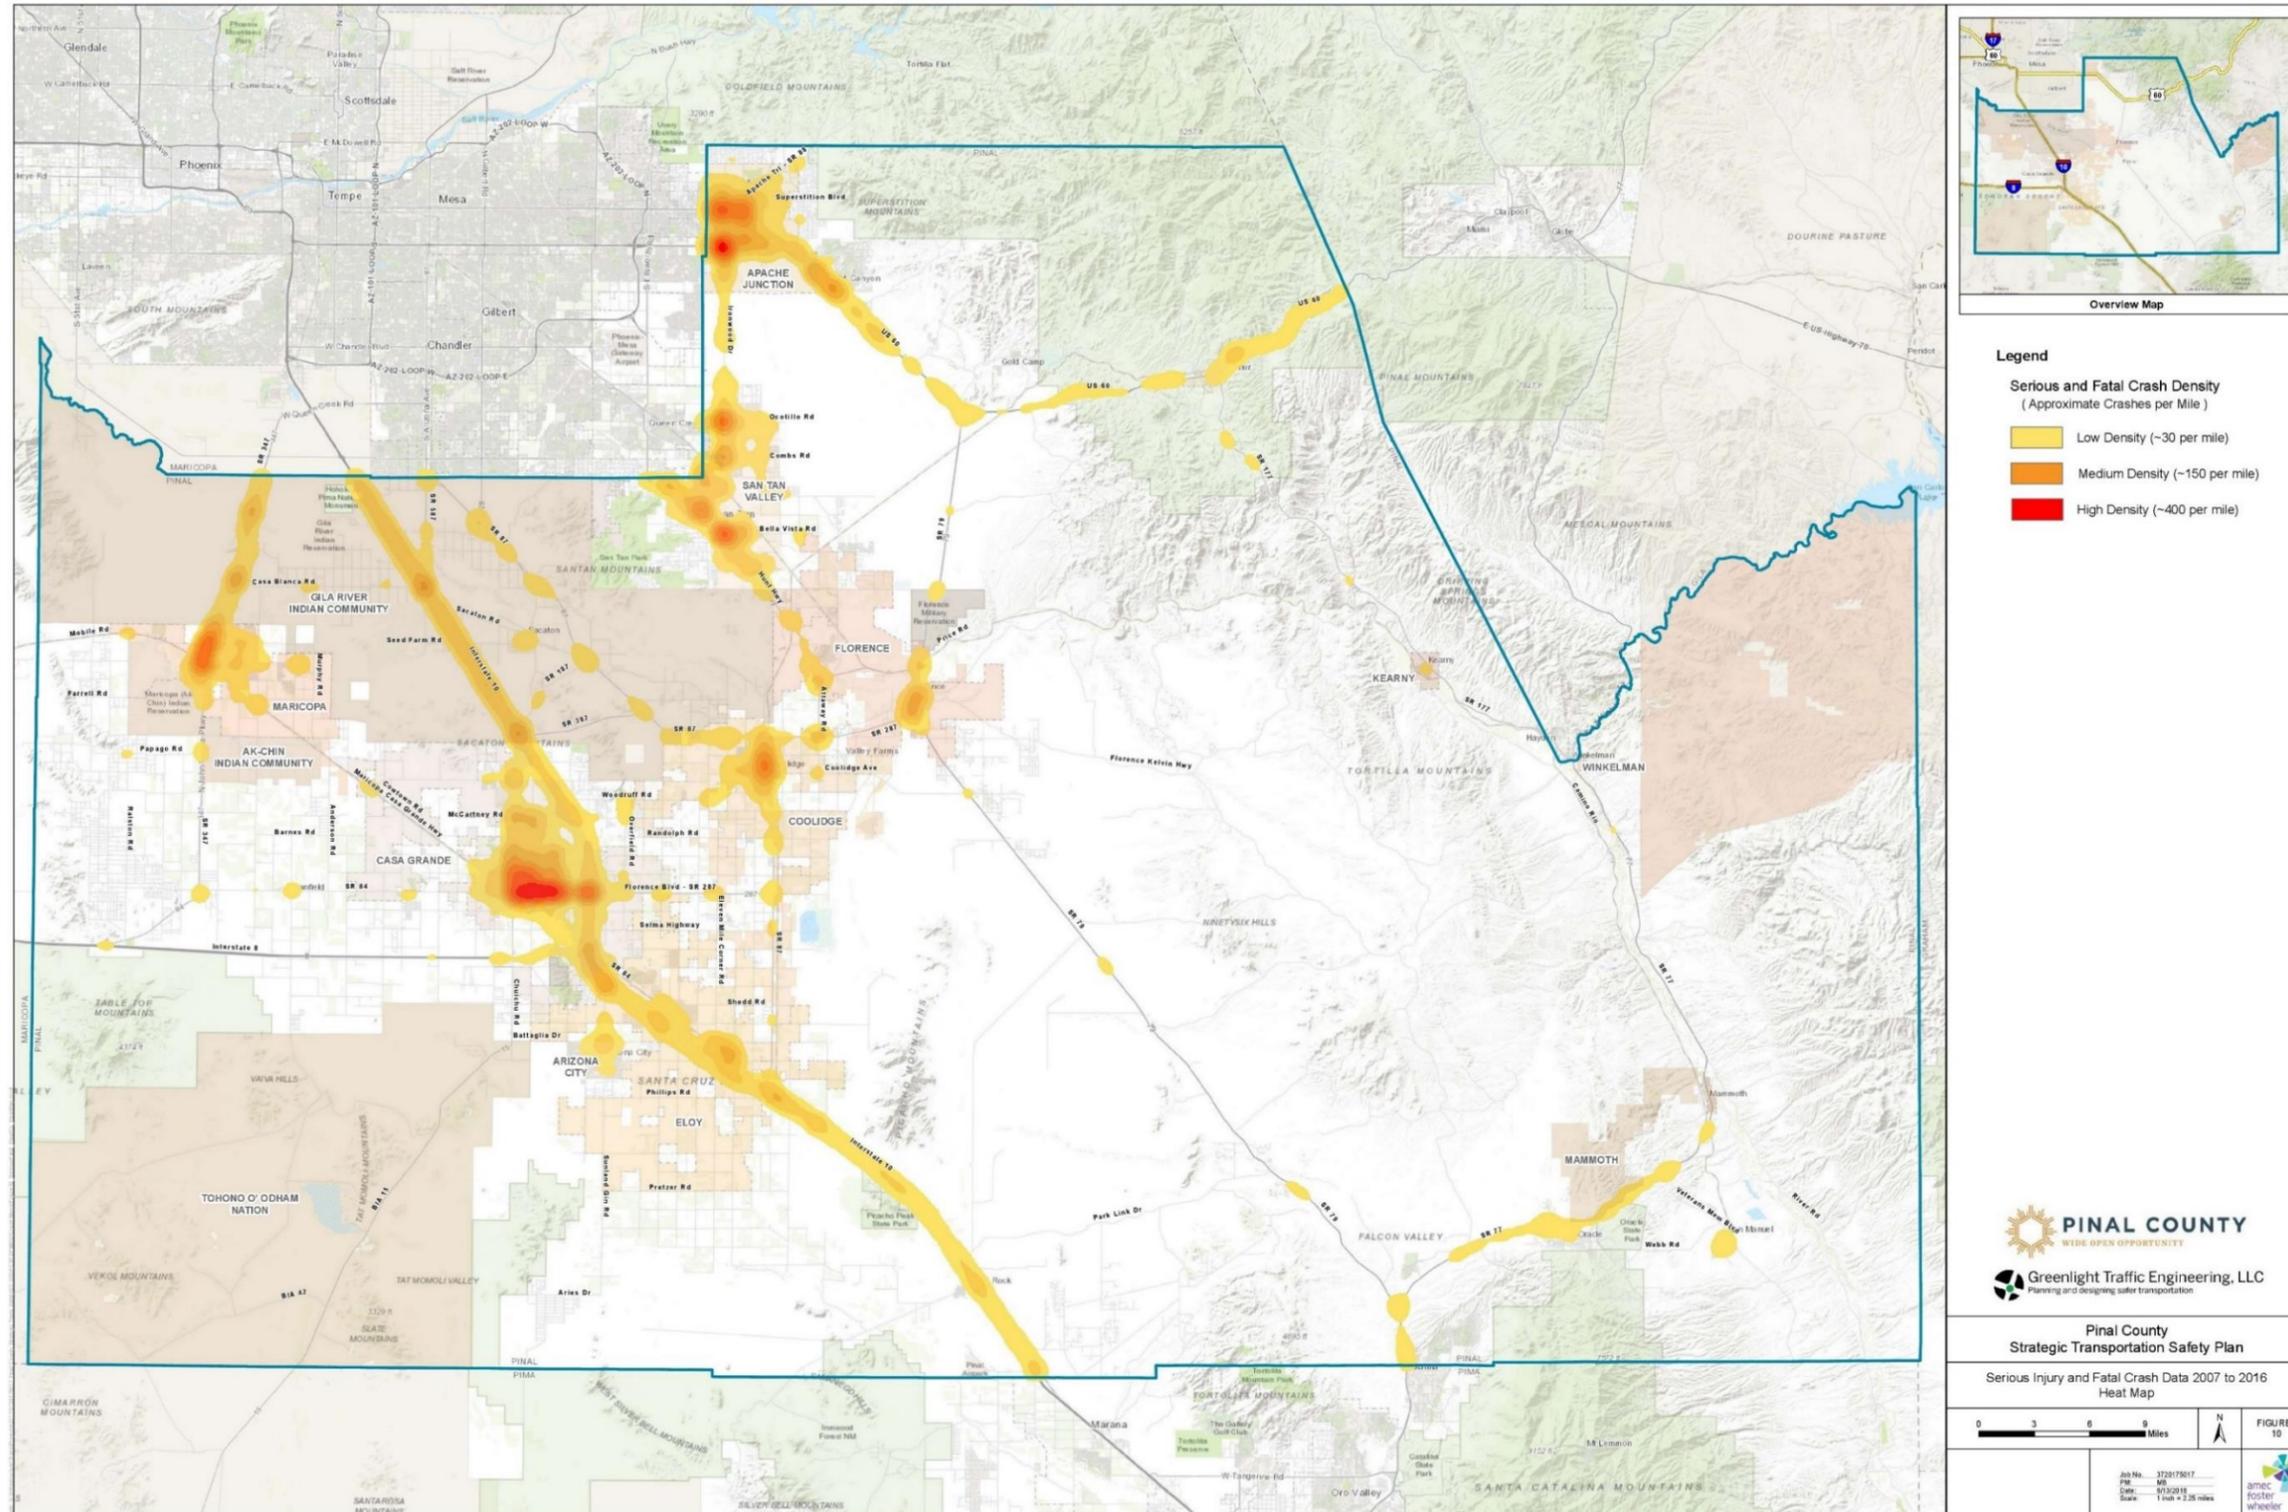

Figure 17: Pinal County Fatal and Serious Injury Heat Map 2007-2016

2.3 Crash Characteristics

The crash data was evaluated to determine the factors that contributed to the highest percentage of fatalities and serious injuries. The top contributing crash characteristics are shown in Figure 18.

Lane departure crashes account for the highest number of fatal plus serious injury crashes at 45%, with occupant protection and speeding ranking just below at 42% each. These crash characteristics helped identify the emphasis areas as described in the next section.

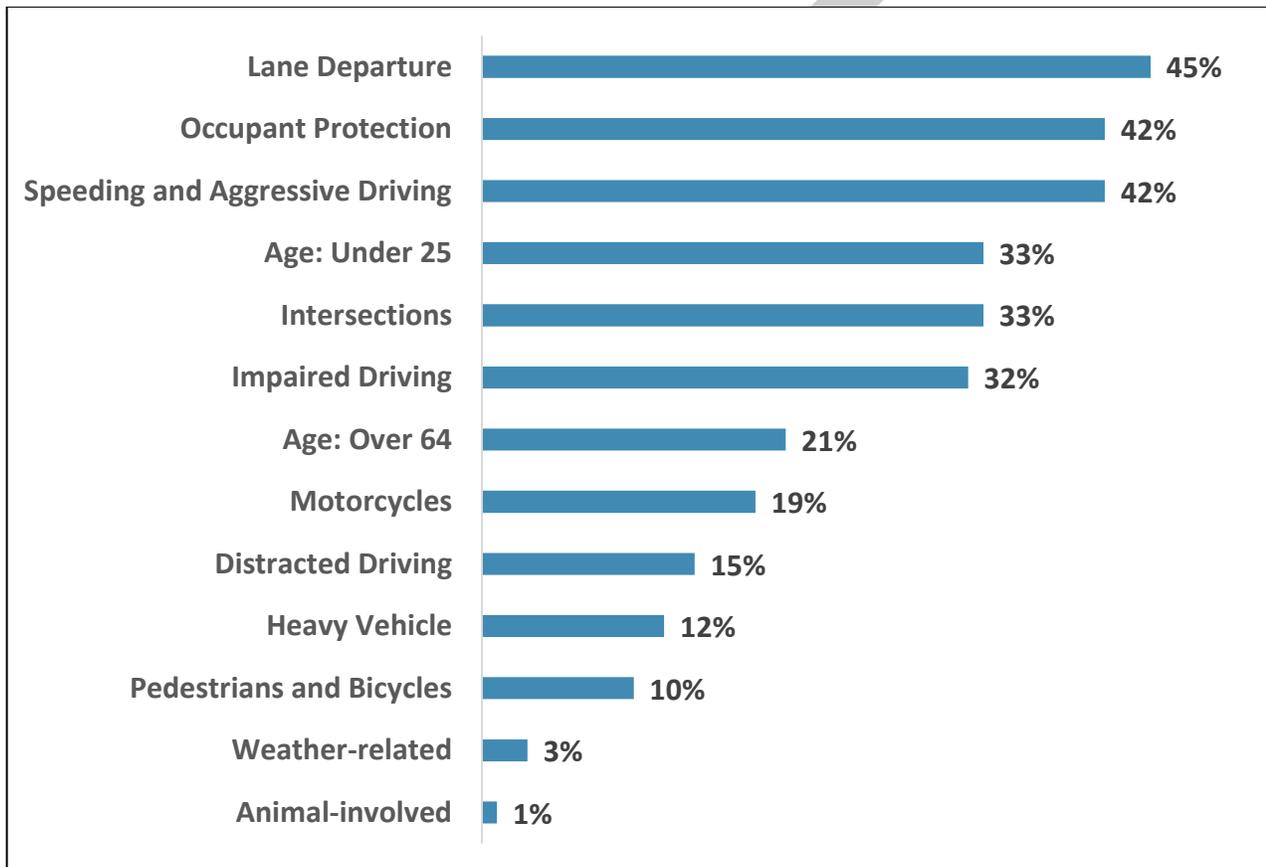

Figure 18: Pinal County Fatal and Serious Injury Breakdown by Collision Manner

3 Vision, Goal and Emphasis Areas

This STSP provides a framework for the County to identify and implement strategies to reduce the risk of fatal and serious injury crashes occurring on roadways within the County and to track future progress.

3.1 Vision

A vision statement provides an overall theme for the future of the County’s transportation safety program. The vision statement is a general description of what the County is trying to achieve through the safety strategies and resources it implements on its roadways.

The STAC reviewed vision statements from the ADOT, SCMPO, MAG, and CAG STSPs. At a July 2019 STAC meeting, the STAC determined that a strong, aspirational safety vision was most appropriate for Pinal County to convey the County’s commitment to transportation safety. The STSP safety vision is:

STRIVING FOR ZERO DEATHS – One is too many!

3.2 Goal

The STSP safety goal is a realistic, attainable and trackable goal that will help the County track progress as safety strategies are implemented to reduce traffic fatalities and serious injuries. The STAC helped select this safety goal to support the proposed vision:

**Achieve a consistent and sustainable annual reduction
in traffic deaths on public roads within Pinal County.**

3.3 Emphasis Areas

Emphasis areas represent the crash types and factors associated with high frequencies of fatal and serious injury crashes. Focusing safety strategies on these areas provides the greatest opportunity to meet the STSP vision and goal.

Table 2 shows the emphasis areas from the Arizona, SCMPO, MAG, and CAG STSPs.

Table 2: Emphasis Areas by Safety Plan

Emphasis Areas	Arizona SHSP	SCMPO STSP	MAG STSP	CAG STSP
Impaired Driving	✓	✓	✓	✓
Speeding	✓	✓	✓	✓
Young Drivers	✓	✓	✓	✓
Occupant Protection	✓	✓		✓
Lane Departure	✓	✓		✓
Pedestrians	✓	✓	✓	
Intersections	✓	✓	✓	
Distracted Driving	✓	✓		
Older Drivers	✓	✓		
Weather-Related	✓	✓		
Bicyclists	✓		✓	
Motorcyclists	✓			✓
Heavy Vehicles	✓			
Animals	✓			
Traffic Incident Management	✓			

Figure 19 shows the breakdown of fatal and serious injury crashes by emphasis area. This figure was used to determine the most appropriate emphasis areas to be selected by the County for further analysis and safety focus.

DRAFT

Pinal County Potential Emphasis Areas

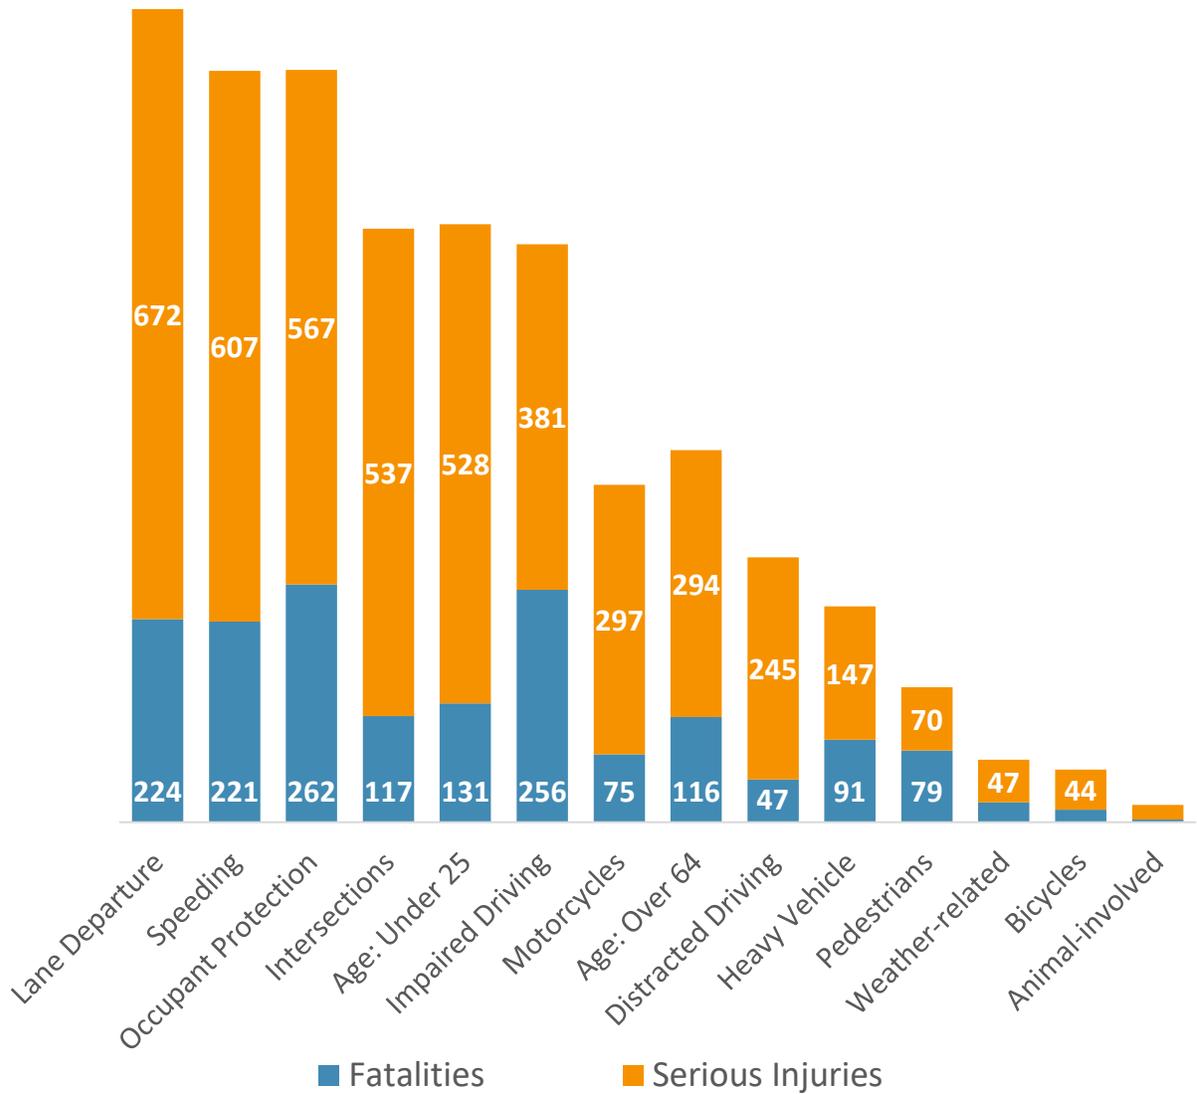

Figure 19: Pinal County Fatal and Serious Injury Crashes by Potential Emphasis Area

Table 3 compares the percentage of fatal and serious injury crashes by crash type in Pinal County against what the numbers the state experiences as a whole.

Table 3: Pinal County vs. State Potential Emphasis Areas

Potential Emphasis Area	Pinal County Fatal Crashes %	State Fatal Crashes %	Pinal County Serious Crashes %	State Serious Crashes %
Lane Departure	42	46	46	29
Occupant Protection	49	47	39	23
Speeding	42	37	42	34
Impaired Driving	48	34	26	18
Older Driver Over 64	22	15	20	15
Young Driver Under 25	25	28	36	35
Distracted Driving	9	12	17	18
Heavy Vehicle	17	10	10	6
Motorcyclists	14	17	20	18
Intersection	22	25	37	45
Pedestrian	15	18	5	9
Weather-related	4	3	3	3
Bicyclist	3	3	3	5
Animal-involved	<1	<1	1	<1

While all crash types and contributing factors need to be addressed to reach the Zero Deaths vision, the following five priority emphasis areas were chosen by the STAC for Pinal County based on the results of the data analysis and in coordination with the Arizona, SCMPO, MAG, and CAG STSPs. In general, these emphasis areas represent the highest number of fatalities and serious injuries experienced in the County.

Lane Departure

A lane departure crash is defined as a crash which occurs after a vehicle crosses an edge line, center line or otherwise leaves the traveled way. Lane departure crashes account for 45% of the fatal and serious injury crashes on roadways in the County.

Figure 20 shows the breakdown of lane departure fatal and serious injury crashes from 2008 - 2017.

Lane Departure Crashes

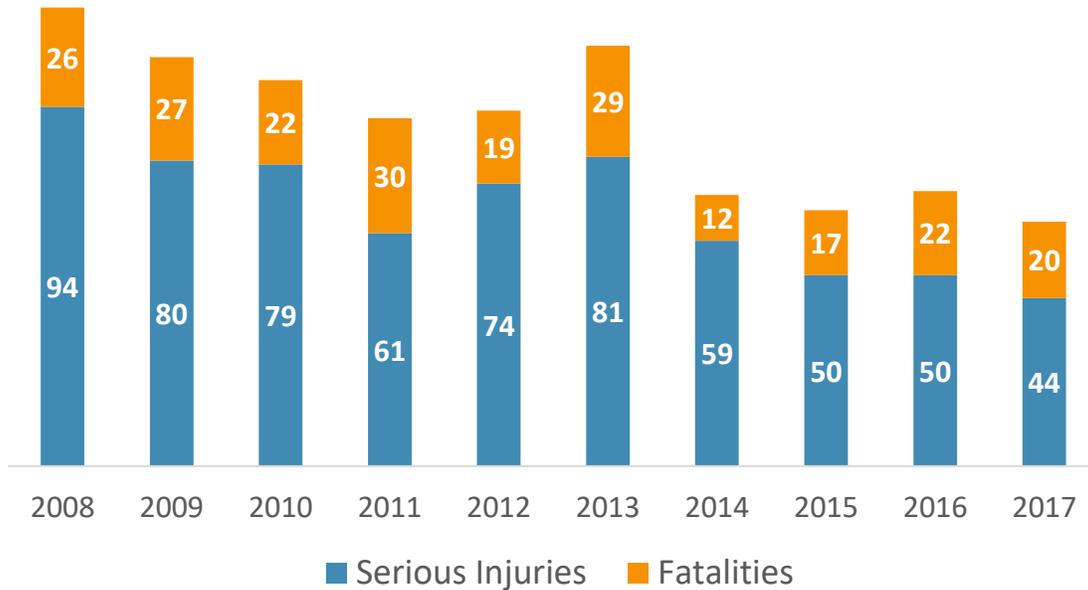

Figure 20: Pinal County Fatal and Serious Injury Crashes – Lane Departure

Safety Strategies

Pinal County understands that lane departure crashes are a significant issue on rural roads. Measures the County has taken to address this issue include:

- Incorporating Safety Edge into its design standards
- Passed a resolution, along with SCMPO, to encourage improvements on I-10 (see Appendix C)

Safety strategies to reduce lane departure crashes should focus on:

- Keeping vehicles on the roadway
- Providing an area for safe recovery
- Reducing the severity of lane departure crashes

Key strategies include:

- Use traffic control devices to better delineate the edge of the roadway (e.g. signs, Raised Pavement Markings, edgelines, wider markings, rumble strips)
- Construct paved/graded shoulders
- Install Safety Edge on pavement projects
- For vehicles that run off the road for any reason, minimize the potential for overturning or colliding with another object
- Increase public education on corrective roadway-departure driving techniques

- Utilize the FHWA “Reducing Rural Roadway Departures” program:
https://www.fhwa.dot.gov/innovation/everydaycounts/edc_5/roadway_departures.cfm

Intersections

Intersection and intersection-related crashes involve movement of traffic units through the intersection and within 150 feet of the intersection. Intersection crashes happen more frequently at locations where traffic volumes are high. Intersection crashes account for 33% of all fatal and serious injury crashes in the County.

Figure 21 illustrates the breakdown of intersection related fatal and serious injury crashes from 2008 - 2017.

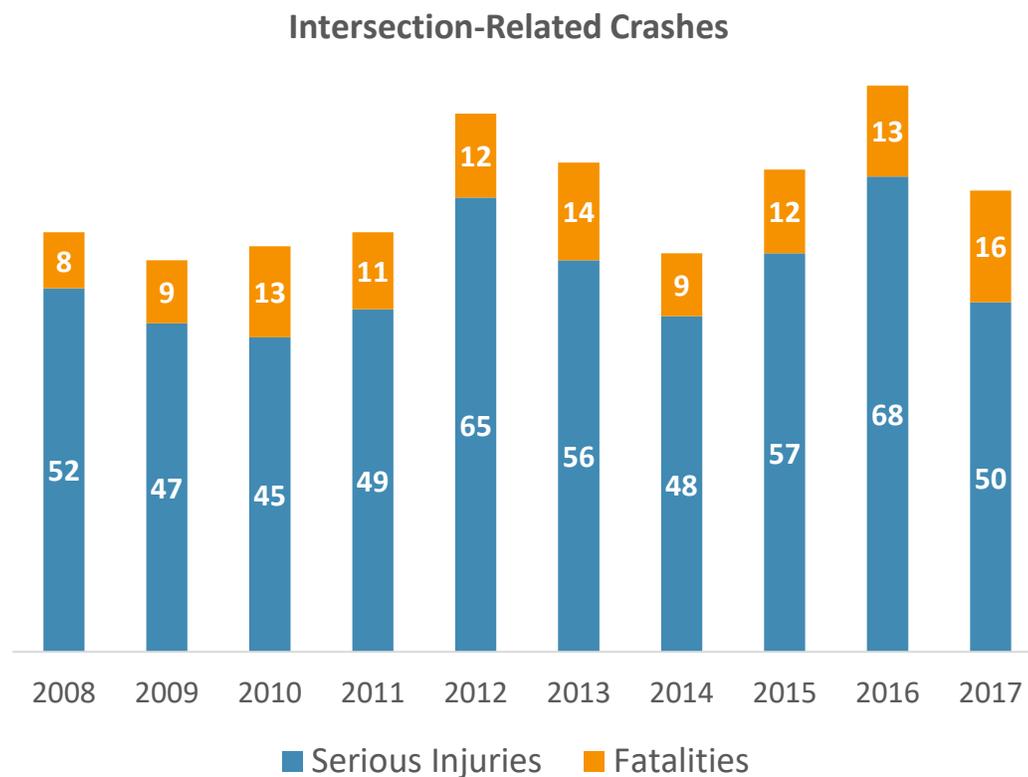

Figure 21: Pinal County Fatal and Serious Injury Crashes – Intersections

Safety Strategies

- Install roundabouts where feasible
- Evaluate and improve sight distance
- Evaluate/improve signal phasing and timing (e.g. reduce through and left-turn conflicts)

- Increase size/visibility of signal heads and lens display
- Provide/improve intersection lighting
- Increase visibility of traffic control devices (oversized signs, retroreflective signposts)
- Improve left-turn lane offsets to provide additional visibility to help address left-turn crashes (MAG's [Left-Turn Crash Mitigation Implementation Template and Guidance](#) provides information on this countermeasure)
- Implement access management control techniques
- Conduct targeted enforcement of high crash risk intersections
- Implement speeding and red-light running enforcement efforts

Vulnerable Users

A vulnerable roadway user is defined as a pedestrian, bicyclist, or motorcyclist. They are referred to as vulnerable users as they are the most exposed and least protected users of the roadway. Pedestrian, bicycle, and motorcycle crashes account for 29% of the fatalities and serious injuries on roadways within the County. These crashes tend to occur less frequently than other crash types, but when they do occur, they tend to be more severe. The frequency of vulnerable user fatalities experienced a significant increase in 2017.

Figure 22 demonstrates the breakdown of vulnerable user fatal and serious injury crashes from 2008-2017.

Vulnerable User Crashes

Figure 22: Pinal County Fatal and Serious Injury Crashes – Vulnerable Users

Safety Strategies

- Install infrastructure (medians, landscaping, etc.) to physically separate bicycles from vehicle traffic
- Provide sidewalks, multi-use paths, and/or marked crosswalks
- Identify high risk locations for potential implementation of enhanced pedestrian crossings, to include signing, markings, rectangular rapid flashing beacons, and pedestrian hybrid beacons
- Provide bike lanes, separated bike lanes, and bike boulevards
- Provide street lighting at intersections and pedestrian crossings
- Reduce vehicle speeds in areas of high pedestrian traffic and school bus stops
- Improve public awareness to promote safer behavior by all roadway users relative to bicycle and pedestrian traffic
- Utilize the MAG Safe Routes to School Program
- Increase enforcement of existing laws designed to promote pedestrian safety, such as jaywalking and vehicles failing to stop for pedestrians at pedestrian crossings
- Improve public awareness, education and training for motorcyclists, motorists, and all safety stakeholders to promote safer driving behaviors
- Enhance rider training programs to improve motorcycle safety
- Promote use of helmets

- Utilize the ADOT AZ STEP program for guidance in choosing countermeasures based on roadway characteristics and pedestrian safety issues
<https://azdot.gov/business/tsmo/operational-and-traffic-safety/az-step>

Age Related

Young drivers are defined as drivers under the age of 25. This demographic typically has less experience on the road and may not have the experience or judgement necessary to avoid or handle unexpected conditions. Older drivers are defined as drivers of the age 65 and older. Driver vision and perception-reaction time can often diminish with age, which puts this demographic at risk of endangering themselves or others on the road.

Younger drivers account for 33% of the fatal and serious injury crashes on roadways in the County, while older drivers account for 21%. There was a significant spike experienced in the most recent year (2017) for both younger and older driver fatal crashes.

Figures 23 and 24 illustrate the numbers of serious injury and fatal crashes by year from 2008-2017 for younger drivers and older drivers.

Age Related Crashes - Younger Drivers

Figure 23: Pinal County Fatal and Serious Injury Crashes – Younger Drivers

Age Related Crashes - Older Drivers

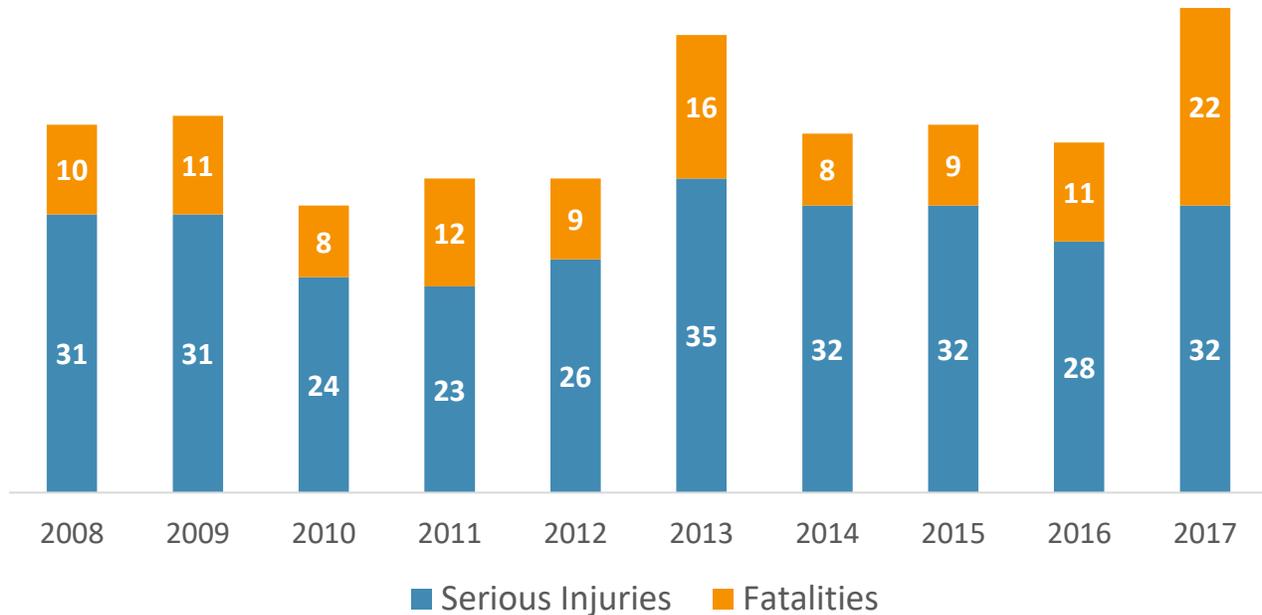

Figure 24: Pinal County Fatal and Serious Injury Crashes – Older Drivers

Safety Strategies

The goal is to achieve an annual reduction in fatalities and serious injuries occurring on all public roads in the County as a result of younger or older drivers.

- Promote technology which monitors young driver behavior
- Make engineering and infrastructure improvements and enhancements to address reduced vision of older drivers (e.g. lighting, larger signs)
- Strengthen driver license testing and re-testing (written and road tests) for new and experienced drivers
- Increase awareness about, and availability of, alternative transportation options
- Promote insurance and other incentives for safe driving
- Conduct mock crash demonstrations for high school students
- Launch NHTSA’s “5 To Drive” campaign in area schools encouraging parents to talk to their teen drivers about:
 - No cell phone use or texting while driving
 - No extra passengers
 - No speeding
 - No alcohol
 - No driving or riding without a seat belt

Behavior Related

Research has shown that the human element is a contributing factor in over 90% of crashes. Key behaviors associated with crashes include speeding, impaired driving, occupant protection and distracted driving.

Speeding

Speeding refers to both exceeding the posted speed limit as well as traveling at speeds too fast for the conditions. As vehicle speeds increase, a driver must react quicker to situations to overcome the increased stopping distance. These factors can increase the severity and occurrence of traffic collisions. Speeding is a contributing factor in 42% of the fatal and serious injury crashes on roadways in the County.

Figure 25 illustrates the serious injury and fatal speeding related crashes in Pinal County from 2008-2017.

Behavior Related Crashes - Speeding

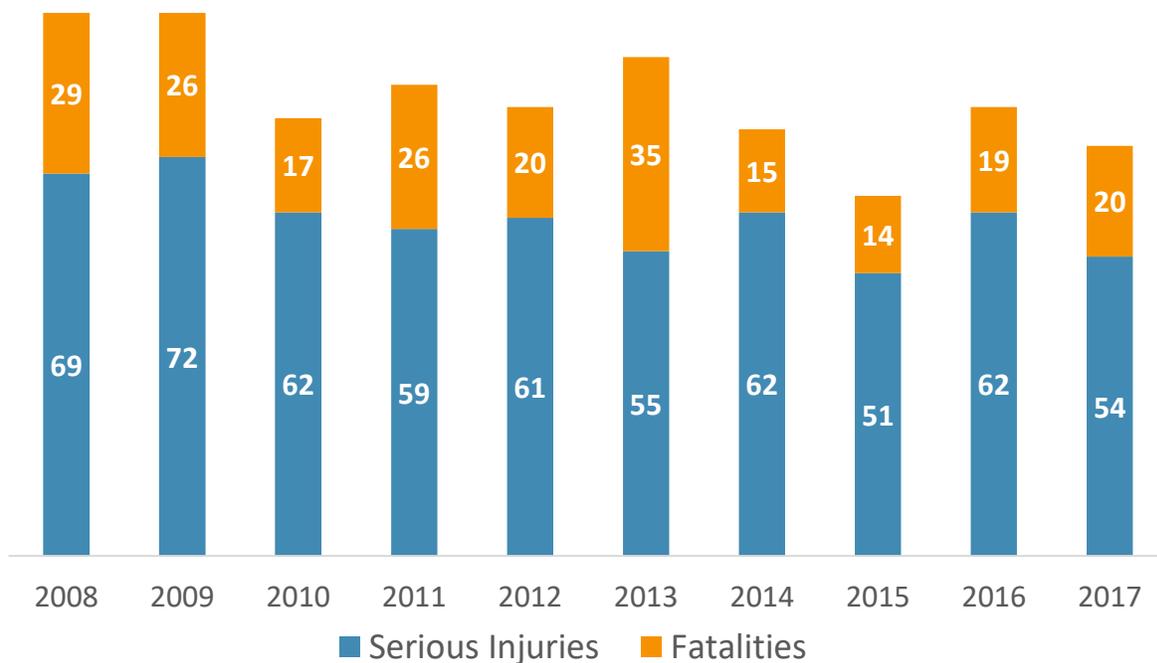

Figure 25: Pinal County Fatal and Serious Injury Crashes – Speeding

Safety Strategies

Strategies to address speeding include:

- Install speed feedback signs
- Identify locations with high frequency of speed-related crashes for targeted enforcement (GIS heat maps can be generated for law enforcement)
- Install traffic calming to reduce speeds (e.g. speed humps, road diets, curb bulbouts). Road diets reduce number of lanes and lane widths. Curb bulbouts narrow the street width at intersections.
- Targeted enforcement in school zones and locations with speeding related crashes
- Utilize the Pima County Speed Management Zones concept, which includes installing the following, in order:
 - Static Speed Limit Sign
 - Dynamic Speed Feedback Sign that has data collection features (speed, volume)
 - Law Enforcement Pad
 - Law Enforcement Pull-off Space
 - Scheduled Enforcement

Impaired Driving

Impaired-driving fatalities and serious injuries include all instances in which a driver is under the influence of alcohol, drugs or medication, or was ill, fatigued or physically impaired. Impaired driving is a contributing factor in 32% of all serious injuries and fatalities that occur on roadways within the County.

Figure 26 illustrates the serious injury and fatal impaired driving related crashes in Pinal County from 2008-2017.

Behavior Related Crashes - Impaired Driving

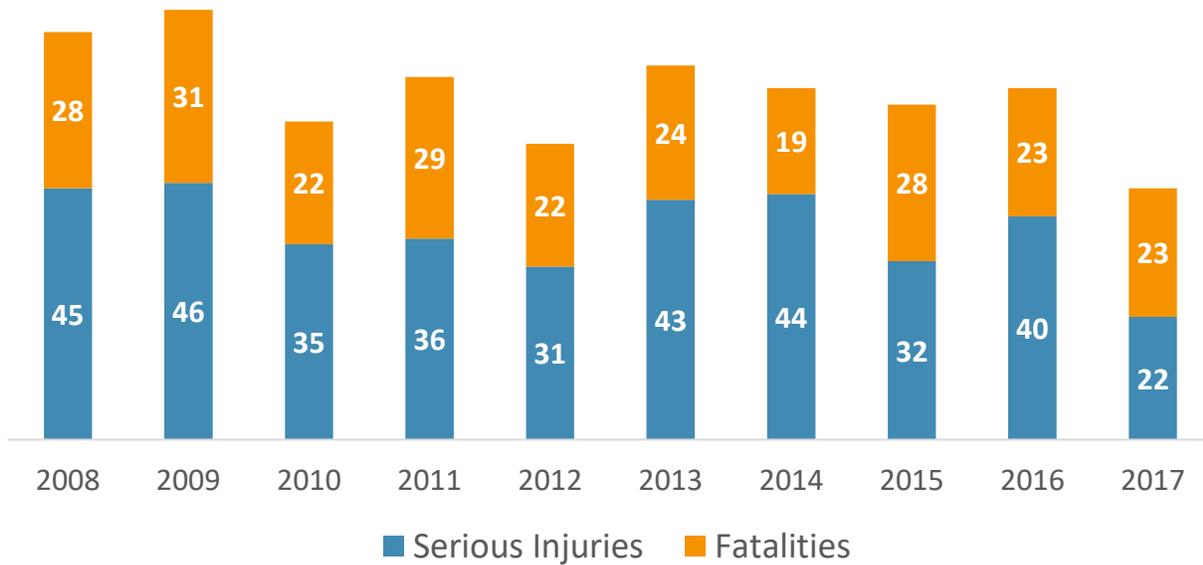

Figure 26: Pinal County Fatal and Serious Injury Crashes – Impaired Driving

Safety Strategies

Strategies to address impaired driving include:

- Improve public awareness of and access to alternate forms of transportation (e.g. transit, taxicabs, ride share)
- Conduct high-visibility impaired-driving enforcement initiatives
- Work with the court system to promote policies and practices that result in the imposition of stricter driving laws and penalties for impaired driving convictions
- Conduct high-visibility, saturated impairment enforcement campaigns

Occupant Protection

Occupant protection includes the use of seat belts, air bags, appropriate child safety seats and helmets for bicyclists and motorcyclists. 42% of the fatalities and serious injuries on roadways in the County are attributed to not wearing a seatbelt.

Figure 27 illustrates the serious injury and fatal occupant protection related crashes in Pinal County from 2008-2017.

Behavior Related Crashes - Occupant Protection

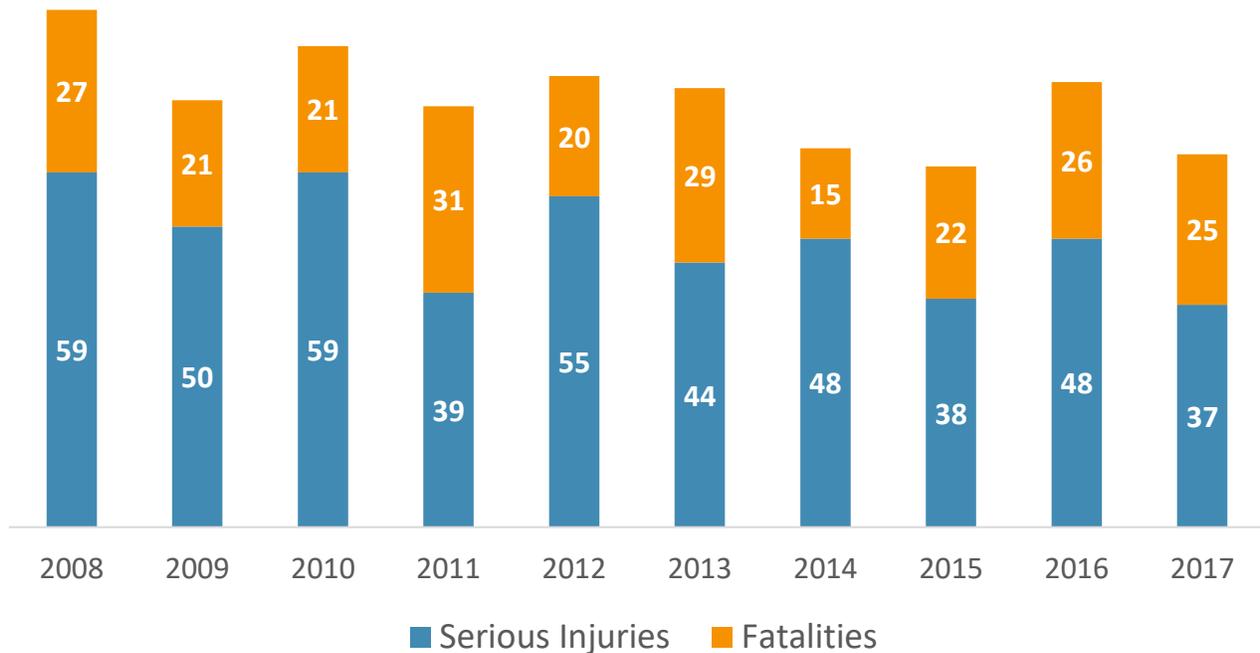

Figure 27: Pinal County Fatal and Serious Injury Crashes – Occupant Protection

Safety Strategies

Strategies to improve the use of occupant protection include:

- Conduct seat belt education events for children
- Provide child protection seat distribution programs coupled with high-profile inspection events/clinics utilizing certified child protection seat technicians
- Conduct high-visibility, saturated seat belt enforcement campaigns
- Train law-enforcement personnel to check for proper child restraint use during all motorist encounters

Distracted Driving

Distracted driving involves any activity that diverts the attention of the driver away from the task of operating the vehicle. Distracted driving accounts for 15% of the fatal and serious injury crashes in the County. Arizona recognizes that this is an under-reported crash factor, and the Arizona Crash Report form was modified in 2014 to better capture distracted driving characteristics, e.g. talking on hand-held device. More accurate distracted driving information can be used in enforcement and education campaigns to help improve safety.

Safety Strategies

Pinal County was exploring passing an ordinance prohibiting the use of hand-held electronic devices while driving, but on April 22, 2019 Governor Ducey signed a bill enacting a statewide ban on handheld cell phone use while driving. The bill overrides any existing county or municipal law, is a primary offense, and officers can start issuing citations January 1, 2021. Additional strategies to address distracted driving include:

- Increase enforcement of existing laws to reduce distracted-driver-involved crashes
- Conduct aggressive public information campaigns to discourage all forms of distracted driving
- Encourage technologies and programs which discourage or prevent the use of cell phones while driving
- Install center line and edge line rumble strips
- Utilize D3 Arizona campaign materials and public service announcements [D3Arizona.org](https://www.d3arizona.org)

DRAFT

4 Network Screening

Network screening of a roadway system is the data-driven analysis of the intersections and segments within the system. The process utilizes spatial analysis of crash data and is used to determine high priority locations that may require safety improvements. Crashes are spatially attributed to individual intersections and segments in order to facilitate network analysis.

The goal of network screening is to develop a list of specific sites, for example, signalized intersections, that are ranked by priority. Priority is typically developed from a combination of crash frequency, rate, and severity. This priority list is then used to plan and implement safety projects at individual locations or at the system-wide level. The list can also serve as a resource for local governments when applying for state or federal traffic safety funding.

A Priority Index (PI) ranking is used to screen intersections and a combination of PI ranking and sliding window analysis are used to screen segments. The PI ranking system has been used successfully in Arizona by various local agencies and planning agencies to identify high-risk locations and is recommended for use by Pinal County based on:

- Minimal data requirements (traffic volumes and crash frequency and severity)
- Reliability in identifying high-risk locations
- Flexibility (agencies can adjust the importance of the 3 crash factors used to calculate the PI)

An Excel based tool has been developed for the County to easily prioritize intersections and segments based on the factors listed above. An example of the output of the intersection tool is shown in Figure 28 based on 2008-2017 crash data. The example reflects an analysis of intersections in the County based only on crash frequency and crash severity; as more traffic volumes become available, additional crash rates can be used in the ranking. The tool also provides hyperlinks to view the prioritized locations in Google Maps. The data located within the tool is static and if updated crash data is desired, it will have to be entered manually. Following are explanations of the values in each column:

- ADEV – average daily traffic volume, in vehicles per day, entering the intersection
- Crash Freq – number of crashes at the intersection in 5 years (2011-2015)
- Crash Rate – crashes per million vehicles entering the intersection
- Severity Index – weighted score based on the distribution of the five crash severity subtotals

Unsignalized/Signalized Analysis Tool (USAT)

Count of Intersections Shown: 419

Intersection Selection:

 All Roads Only these roads:

 Only roads within these agencies:

 Signalization Status:

 With at least total crashes during data period

Crash Rate Rank not used. Some intersections have no ADEV data.

 Include Only Intersections with ADEV Available

5 Funding Resources

This section provides a list of potential funding sources for the County to use in addressing the safety concerns on the County roadway network.

5.1 Highway Safety Improvement Program

The Highway Safety Improvement Program (HSIP) is a core federal aid program administered by ADOT with Federal Highway Administration (FHWA) oversight. The goal of the program is to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. The federal legislation states that “a highway safety improvement project is any strategy, activity, or project on a public road that is consistent with the data-driven State Strategic Highway Safety Plan (SHSP) and corrects or improves a hazardous road location or feature or addresses a highway safety problem.” Candidate projects submitted by local agencies for HSIP funding can address spot locations or systemic treatments. Potential projects are prioritized based on benefit/cost ratio for projects that address fatal and serious injury crash locations. This STSP will position Pinal County to better compete for the statewide HSIP funds by identifying and justifying safety projects through a data-driven process. ADOT administers approximately \$35 million in HSIP funds annually, which are currently programmed through fiscal year 2024.

5.2 High Risk Rural Roads Program

The High Risk Rural Road (HRRR) funding set-aside was eliminated in the 2012 Moving Ahead for Progress in the 21st Century Act (MAP-21) federal legislation. That set-aside has been replaced with a Special Rule that requires states with an increase in fatality rates on rural roads to obligate 200% of the state’s 2009 HRRR funding amount, which was \$1,800,000 in Arizona, meaning \$3,600,000 of HSIP funds would be required to be used on HRRRs. The use of HRRR-related HSIP funding would become an option for local agencies if Arizona was found to have an increase in fatalities on rural roads over the most recent two years.

5.3 MAG Roadway Safety Program

MAG is initiating the Roadway Safety Program (RSP) for fiscal year 2020 to provide \$2 million per year in funding for shovel-ready safety projects. Minimum project cost is \$50,000, with a maximum project size of \$1 million. An application similar to the ADOT HSIP application will need to be submitted, and

projects will be ranked on benefit/cost ratio. The initial call for projects is tentatively scheduled for October 2019, with applications due in November 2019.

5.4 Governor's Office of Highway Safety

The Governor's Office of Highway Safety (GOHS) administers National Highway Traffic Safety Administration (NHTSA) funding through grant applications. Typical projects include law enforcement activities such as targeted DUI checkpoints and improvements to crash data collection. Local agencies have utilized GOHS funding to purchase portable speed feedback trailers to rotate placement on streets experiencing speed-related crashes. GOHS funds have also been used in educational efforts, for example, to conduct mock crash demonstrations at high schools during prom season. Annual funding available through GOHS is approximately \$8,000,000 in Arizona.

5.5 Planning Assistance for Rural Areas Program

The Planning Assistance for Rural Areas (PARA) Program is sponsored by the ADOT Multimodal Planning Division (MPD) and provides federal funds, up to \$250,000 per project, to assist tribal governments and counties, cities and towns located outside Transportation Management Area (TMA) planning boundaries with multimodal transportation planning needs. PARA funding has been used to develop Safe Routes to School plans and pedestrian and bicyclist safety studies. This program has not been funded in the past 2 years but may resume funding in the future.

5.6 Tribal Transportation Program Safety Funds

Each year two percent of the available Tribal Transportation Program (TTP) funds are set aside to address safety issues within tribal communities. Funding is available, to Tribal entities, in four categories including safety planning, engineering improvements, enforcement/EMS, and education. These funds can be used for:

- development and update of transportation safety plans
- crash data assessment, improvement, and analysis
- infrastructure improvements

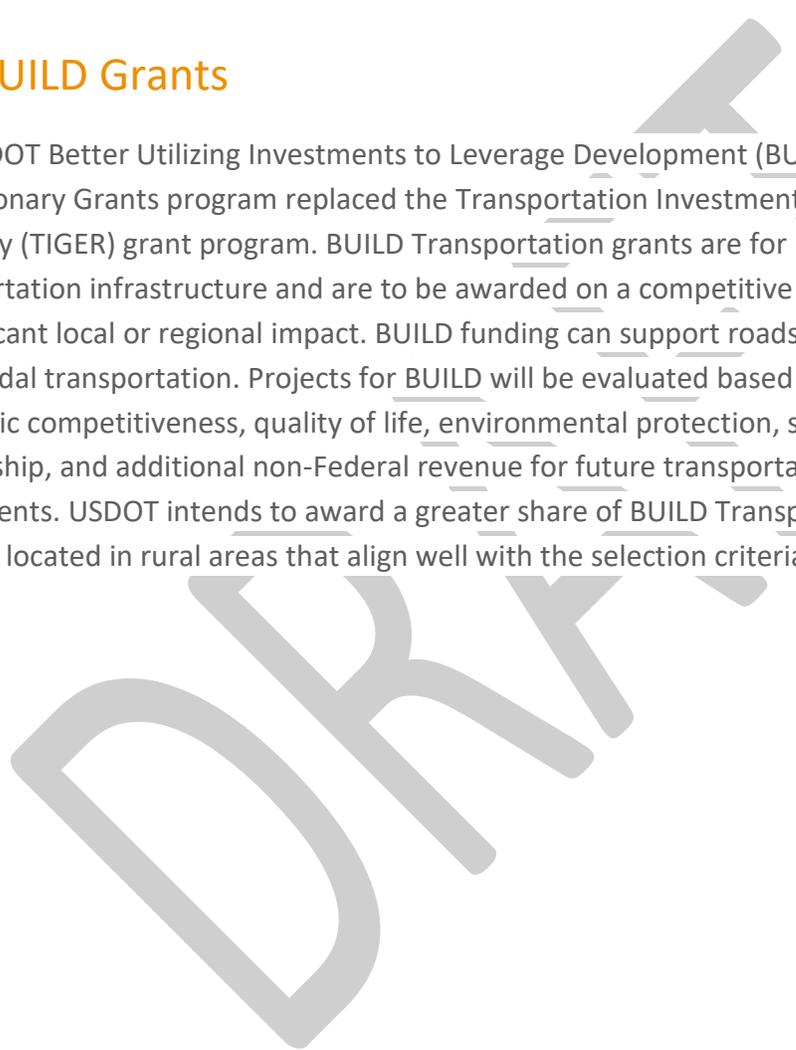

An annual Notice of Funding Opportunity is distributed by FHWA. The 2019 deadline for applications was May 20, 2019.

5.7 Railroad-Highway Grade Crossing Program

The ADOT Railroad-Highway Grade Crossing Program administers approximately \$2,300,000 annually for improving safety at public railroad crossings. A diagnostic review team consisting of representatives from ADOT, the Arizona Corporation Commission, FHWA, the Railroad and the Road Sponsor (State, City, County, or Tribe) evaluates the identified railroad crossings through an on-site diagnostic review, developing a list of potential projects.

5.8 BUILD Grants

The USDOT Better Utilizing Investments to Leverage Development (BUILD) Transportation Discretionary Grants program replaced the Transportation Investment Generating Economic Recovery (TIGER) grant program. BUILD Transportation grants are for investments in surface transportation infrastructure and are to be awarded on a competitive basis for projects that will have a significant local or regional impact. BUILD funding can support roads, bridges, transit, rail, ports or intermodal transportation. Projects for BUILD will be evaluated based on criteria that include safety, economic competitiveness, quality of life, environmental protection, state of good repair, innovation, partnership, and additional non-Federal revenue for future transportation infrastructure investments. USDOT intends to award a greater share of BUILD Transportation grant funding to projects located in rural areas that align well with the selection criteria.

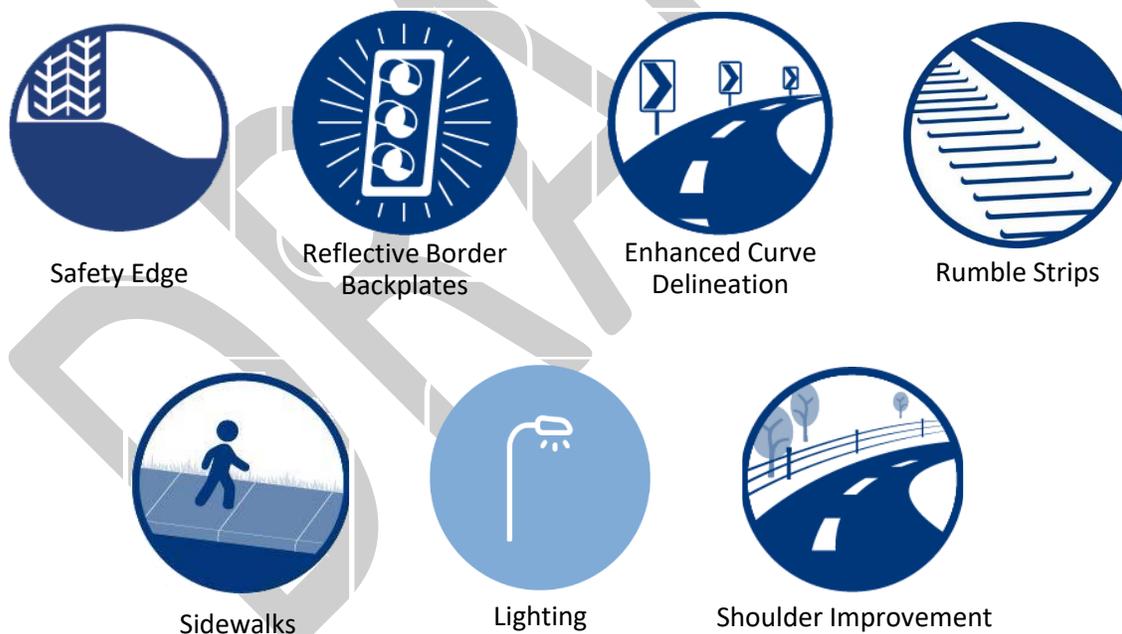

6 Implementation Plan

6.1 Incorporating Safety into Project Development Process

Safety is often viewed as an “extra” or “add-on” or even a nuisance to incorporate into a project, when in fact safety elements should be mainstreamed and explicitly considered on every project. Traffic safety programs, projects and policies included in an agency’s Long-Range Transportation Plan, Comprehensive Plan and/or Master Plan have a higher likelihood of being implemented. The following should be considered for inclusion in agency policies, future Capital Improvement Plans (CIP) and updates to plans to ensure safety is an explicit consideration in projects:

Include systemic safety improvements in projects. Many of the FHWA Proven Safety Countermeasures are appropriate for systemic implementation

(<https://safety.fhwa.dot.gov/provencountermeasures/>)

Develop evaluation criteria to consider safety in project programming or consider making the following adjustments:

- Strengthen evaluation criteria for proposed projects in the Pinal County Transportation Improvement and Maintenance Program (TIMP) to include safety elements.
- Give higher priority to projects that address STSP Emphasis Areas
- Give higher priority to locations experiencing fatal and serious injury crashes

- Give higher priority to projects incorporating multiple safety countermeasures

Some examples of incorporating safety into project programming include:

- **The Sun Corridor Metropolitan Planning Organization Regional Transportation Plan (RTP) 2040** includes safety in its Project Scoring and Prioritization Criteria. The RTP project scoring criteria assigns up to 20 points (out of 100) to a project that improves safety by implementing an FHWA proven safety countermeasure or a recommendation from the SCMPO STSP.
- **The Western Arizona Council of Governments (WACOG) Project Application** form includes safety criteria in project development and prioritization. **Table 4** and **Table 5** show the safety and bicycle and pedestrian project scoring criteria used by WACOG.

Table 4: WACOG Project Prioritization Safety Scoring

SAFETY SCORING CRITERIA				25 Points Available
Check all that apply				
Safety Countermeasures	Yes <input type="checkbox"/>	No <input type="checkbox"/>	Project incorporates one or more of the FHWA or WACOG STSP (Safety Plan) safety countermeasures AND/OR addresses a specific location with identified safety deficiencies	Points Available Yes = 20, No = 10
	Yes <input type="checkbox"/>	No <input type="checkbox"/>	Does roadway exhibit a five (5)-year historic fatal and total crash rate above the State average?	Points Available Yes = 5, No = 2.5
Safety Total:				

Table 5: WACOG Project Prioritization Bicycle and Pedestrian Scoring

BICYCLE, PEDESTRIAN, AND TRANSIT MOBILITY				15 Points Available
Improves bus, bicycle, or pedestrian operations, safety, convenience and comfort, e.g., bike lanes, bus stops, ADA ramps & sidewalks, etc. Check all that apply				
Bicycle, Pedestrian & Transit	Yes <input type="checkbox"/>	No <input type="checkbox"/>	Project provides tangible improvement to, bicycle, or pedestrian facilities, safety, mobility, or convenience.	Points Available Yes =7.5, No = 2.5
	Yes <input type="checkbox"/>	No <input type="checkbox"/>	Project provides tangible improvement to Bus facilities, safety, mobility or convenience	Points Available Yes = 7.5, No = 2.5
Bike, PED & Transit Total:				

- **ADOT’s Planning-to-Programming (P2P)** process incorporates safety into its scoring for Modernization projects by assigning values to the expected reduction in crashes as a result of the project, and if the project has been identified in the state’s Strategic Highway Safety Plan.

- **The Northwest Arkansas MPO** uses a 20-point system to prioritize its Surface Transportation Program projects. Safety accounts for three points maximum and is based on the 3-year average crash rate. If the crash rate in the project area is higher than the statewide average for similar facilities, the project receives three points. If the crash rate is near the statewide average, the project receives two points. Projects with a crash rate below the statewide average are awarded one point.
- **The Androscoggin Transportation Resource Center**, an MPO in Maine, includes a safety component in the TIP prioritization process for all projects. The MPO’s prioritization process awards points to transportation projects that correct a safety problem at an identified high-crash location. The safety score is based on the state’s list of high-crash locations for the preceding 3-year period. However, a project can also receive a partial safety score if it has an identifiable crash pattern that can be corrected, even if it is not on a high-crash location link/node. The intent is to award points to projects that address safety problems, regardless of whether they contain a high-crash location.

6.2 Develop and Adopt Safety Policies and Programs

Vision Zero

Consider the adoption of a “Vision Zero” type initiative to target fatal crashes. Vision Zero is a strategy to eliminate all traffic fatalities and severe injuries, while increasing safe, healthy, equitable mobility for all. First implemented in Sweden in the 1990s, Vision Zero has proved successful across Europe and is gaining momentum in the United States. The City of Tempe has recently adopted a Vision Zero policy: (<https://www.tempe.gov/government/engineering-and-transportation/transportation/vision-zero>)

Complete Streets

Complete Streets policies formalize a community’s intent to plan, design, and maintain streets so they are safe for all users of all ages and abilities. Policies direct transportation planners and engineers to consistently design and construct the right-of-way to accommodate all anticipated users, including pedestrians, bicyclists, public transportation users, motorists, and freight vehicles. Complete Streets can be achieved through a variety of policies; ordinances and resolutions; rewrites of design manuals; inclusion in comprehensive plans; internal memos from directors of transportation agencies;

policies adopted by city and county councils; and executive orders from elected officials, such as Mayors or Governors. All policies should include the 10 elements of a Complete Streets policy (<https://smartgrowthamerica.org/resources/elements-complete-streets-policy/>).

Active Transportation Plans

Consider developing a County Active Transportation Plan (ATP). ATPs address pedestrian and bicyclist issues, but they also help improve safety for all road users. Several MAG member agencies have utilized MAG funding to develop ATPs, including Apache Junction. The MAG funding is available to Pinal County MAG

member agencies, which includes Pinal County, City of Maricopa, City of Apache Junction, Town of Florence, and Gila River Indian Community and the unincorporated community of San Tan Valley.

Road Safety Assessments

A Road Safety Assessment (RSA) is a formal safety performance examination of an existing or future road or intersection by an independent, multidisciplinary team. It reports on potential road safety issues and identifies opportunities for improvements in safety for all road users. The County should consider conducting RSAs during:

- Project design
- Evaluation of high priority locations, especially those identified in the Pinal Regional Transportation Plan and Regionally Significant Routes for Safety and Mobility Plan/Access Management Plan (RSRSM).

ADOT and MAG offer free RSA services that are available to all local public agencies. ADOT recently conducted an RSA on SR 77 east of Oracle Junction.

Fatal Crash Team

Form a fatal crash investigation team of engineering, planning, law enforcement, and risk management to meet quarterly to analyze fatal crashes in the region. The City of Casa Grande is a good example of conducting multidiscipline evaluations of fatal crashes. Pinal County conducts evaluations of fatal crashes, school issues, and speed issues with the County Sheriff's Office, County Risk Management, and County Traffic Engineering.

6.3 Highway Safety Improvement Program Project Determination

Highway Safety Improvement Program (HSIP) funds are allocated through a statewide competitive process that ranks projects based on the benefit/cost ratio. ADOT's current HSIP guidelines include the following requirements for a project to be considered for HSIP funds:

- Minimum benefit/cost ratio of 2.5
- Only fatal and serious injury crashes can be used to calculate benefits
- Minimum project cost of \$250,000
- Maximum project cost of \$5,000,000
- Most recent 5 years of crash data must be used
- Project must address emphasis area(s) in the state SHSP or local agency STSP

Candidate HSIP projects across the County were identified through a network screening analysis of intersections and segments. Added weight was given to locations with multiple fatal and/or serious injury crashes. The County and its local agencies provided input on existing conditions, safety concerns, and suggestions for alternative or additional corridors.

Thirteen HSIP applications were developed and awarded \$13 million during the past two cycles of HSIP call for projects. Table 6 highlights the projects and the crash data associated with the projects.

Table 6: Awarded HSIP Projects FY21-22 and FY23-24

HSIP Project Location	Number of Crashes Addressed		Improvements
	Serious Injury	Fatal	
Hunt Hwy, Gary Rd to Bella Vista Rd	18	2	Flashing yellow arrows, median modifications, sidewalk
Gantzel Rd, Ocotillo Rd to Combs Rd	5	3	Flashing yellow arrows, median modifications, sidewalk
Systemic Lane Departures	27	10	Center & edge line rumble strips
Kings Ranch Rd at Sunrise Sky Dr	0	1	Pedestrian hybrid beacon
Cottonwood Ln at Kadota Ave	2	1	Pedestrian hybrid beacon
Skousen Rd/Eleven Mile Corner Rd, SR 87 to Battaglia Rd	4	1	Center & edge line rumble strips, markings, larger Stop sign
SR 287, Hacienda Rd to SR 87	2	3	Center & edge line rumble strips
SR 87 at Kenworthy Rd, SR 287 at Christensen Rd	0	2	Turn lanes
Apache Trail, Superstition Blvd	1	4	Lighting
Ironwood Dr	1	1	Shoulder widening, rumble strips
Systemic Intersection	10	5	LED Stop signs
Gantzel Rd, Bella Vista Rd to Rebecca Ln	0	1	Sidewalk
SR 87/Kleck Road	0	1	Left-turn lanes

The HSIP projects shown in Figure 29 were submitted to ADOT and were awarded HSIP eligibility to the County for FY 2021 and FY 2022. These projects were selected based on data from 2012-2016.

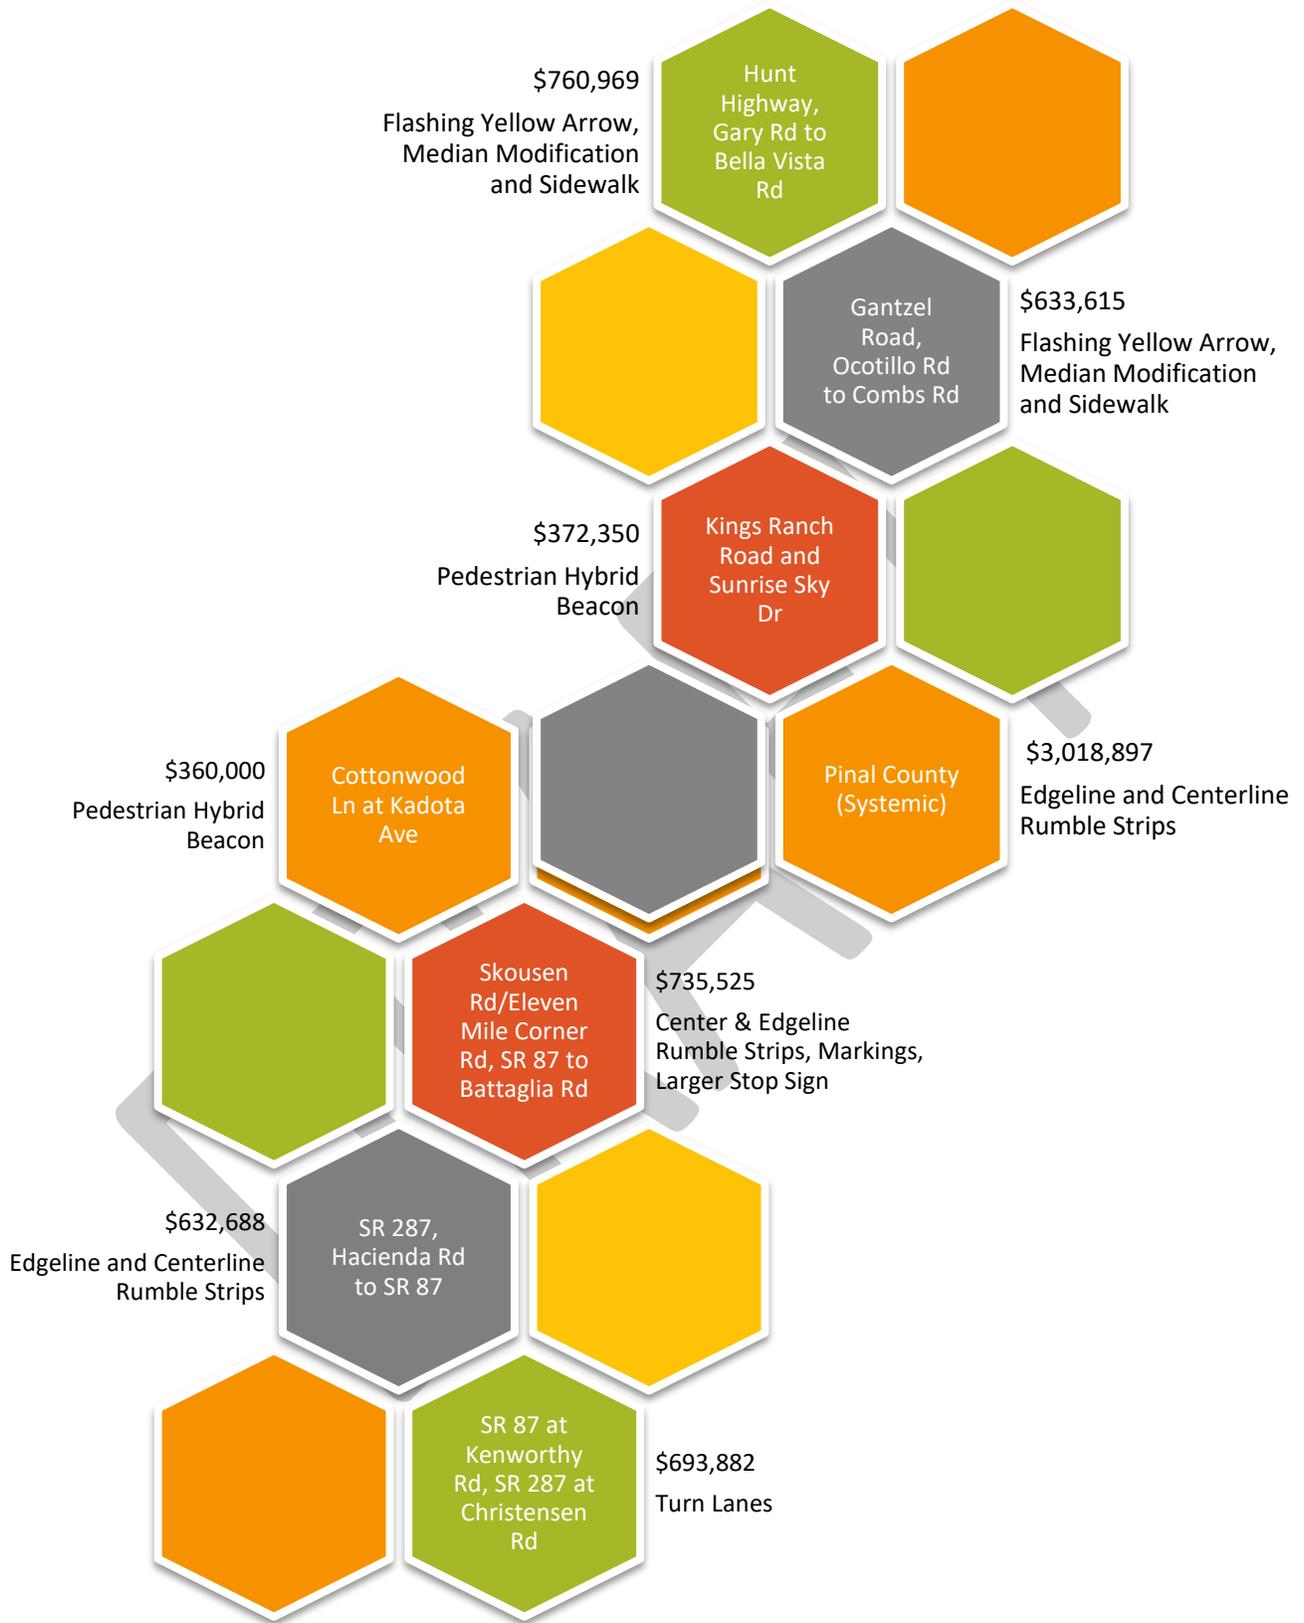

Figure 29: Pinal County FY2021-22 HSIP Projects

The HSIP projects shown in Figure 30 were submitted to ADOT and were awarded HSIP eligibility to the County for FY 2023 and FY 2024. These projects were selected based on data from 2013-2017.

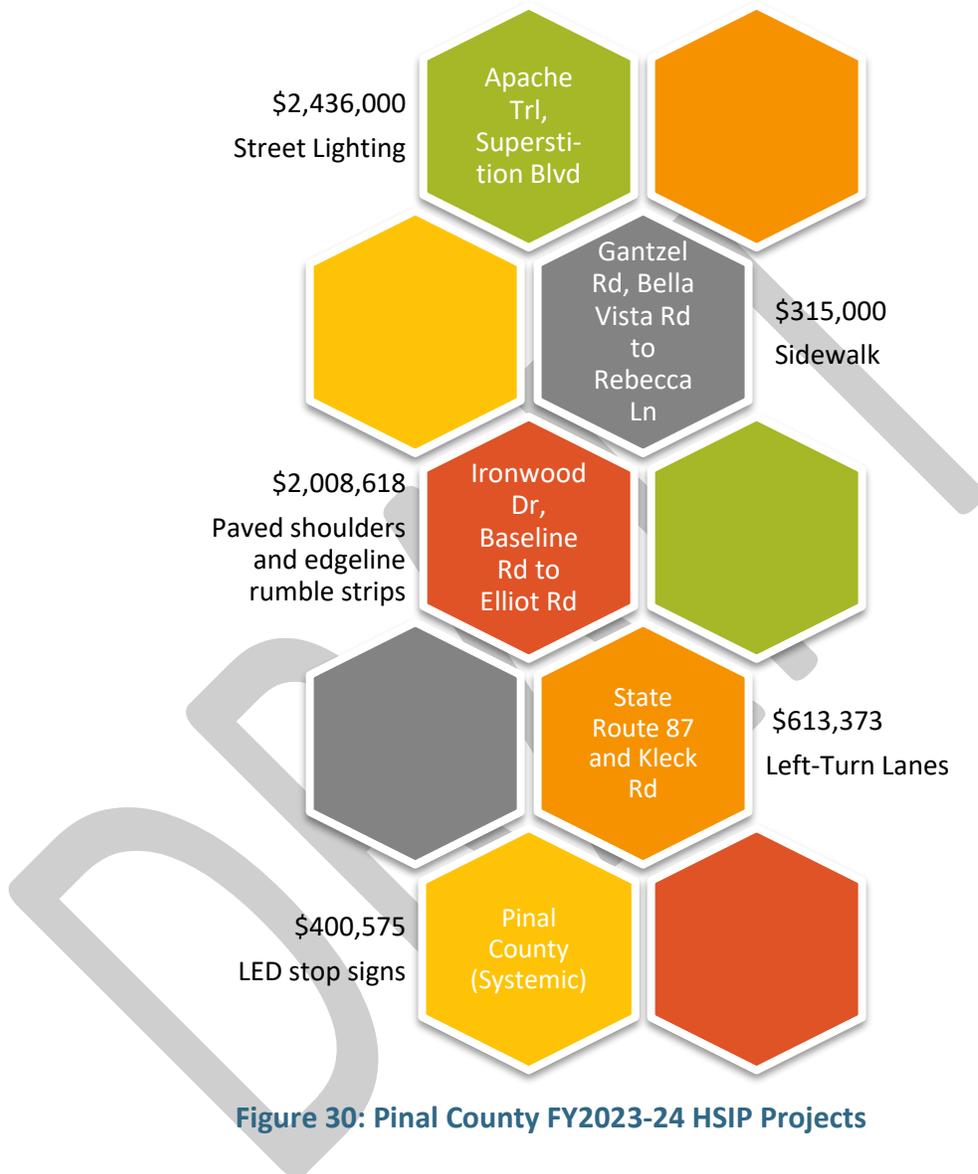

Figure 30: Pinal County FY2023-24 HSIP Projects

Potential projects identified by local agencies that did not meet HSIP eligibility requirements include:

Johnson Ranch Blvd/Golf Course Dr - Roundabouts	SR 87/Skousen Rd – traffic signal
Arizona City Active Transportation Plan	SR 87/SR 387 – right-turn lane
Roundabout in Florence at SR 79/SR 287	SR 238 – Frequently closed: rainstorms
Roundabout in Eloy at Frontier St/Main St/3 rd St	Systemic street lighting in City of Maricopa
Signal Peak Rd/SR 287 – traffic signal	Lost Dutchman Blvd/SR 88 - roundabout
Brown Ave/Florence Blvd – frequent safety complaints from public	Ironwood Dr/US 60 – dual left-turn lanes NB to WB
SR 387/Viola St – pedestrian fatality	Old West Highway – Turn Lanes
Cottonwood Ln/Arizola Rd – safety concerns from Vista Grande High School	Queen Valley Rd/US 60 – traffic signal
Quail Run Ln/Bella Vista Rd – angle crashes	Pinal Airpark Rd/I-10 – substandard interchange
Florence St/Chuichu Rd – angle crashes	Lakeland Dr /Overfield Rd – fatal head-on crash
Maricopa Casa Grande Hwy - Turn lanes at Anderson Rd, Russell Rd	

These locations should be kept on a safety “parking lot” list to be addressed as other funding sources become available.

6.4 Implementing an Effective Strategic Transportation Safety Plan

An effective strategic transportation safety plan is feasible, living, and regularly updated and embraced by safety stakeholders. Figure 31 highlights FHWA’s eight elements of a STSP Implementation Process Model.

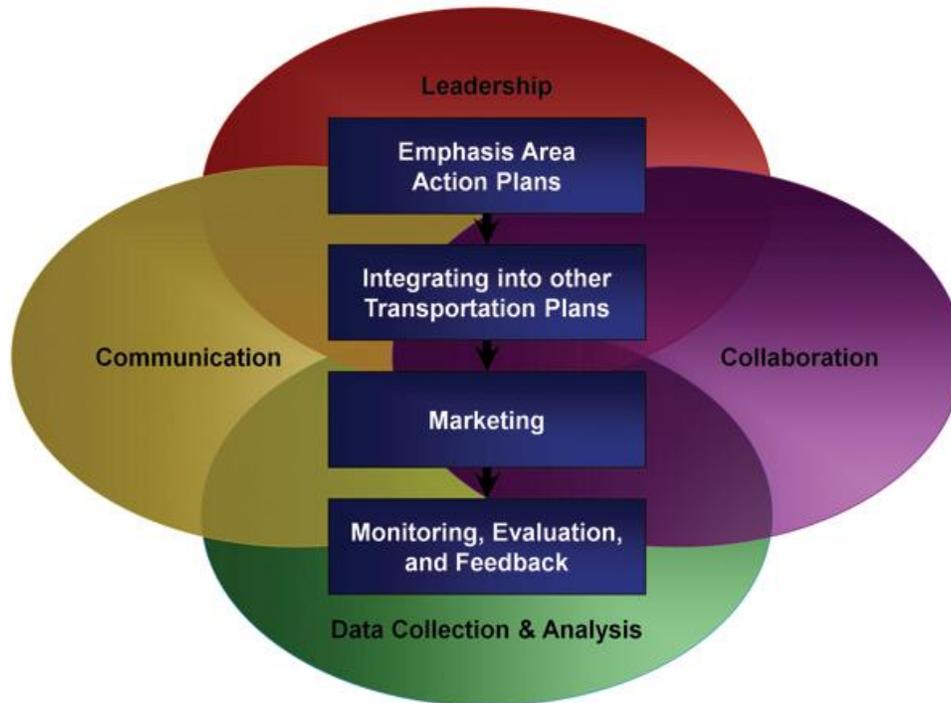

Figure 31: FHWA STSP Implementation Process Model

These elements and the following components are key factors in the Implementation Plan:

- Document measurable objectives and performance measures for each emphasis area
- Determine the data requirements for each performance measure
- Identify the required resources and action steps for implementing each countermeasure
- Identify a process to track countermeasure and action step implementation
- Integrate the STSP with other transportation safety plans
- Market STSP through branding, news events, web sites, and newsletters
- Track regularly the extent to which emphasis area strategies are being implemented

Recommendations to implement, evaluate, and update the STSP and to encourage stakeholder participation in implementing the plan include:

- Form a STSP Champions Working Group of key safety stakeholders to identify issues affecting the implementation of the plan, celebrate successes, and identify emerging safety issues and discuss new safety strategies
- Hold quarterly meetings of law enforcement, engineering, and planning to discuss safety issues and any new crash patterns
- Keep key advocacy groups involved by inviting them to participate in safety meetings and TAC meetings
- Host an annual Traffic Safety Conference to promote traffic safety for all stakeholders

- Update the STSP on a regular cycle, e.g. every 3 to 5 years
- Update crash data and performance measures annually. (Updated crash data for the previous year is typically made available by ADOT in June, e.g. crash data for all of 2019 should be available in June 2020 for updating regional crash data.)
- Update intersection and segment crash analysis annually to determine high priority locations
- Collect traffic volumes to generate updated crash rates and performance measures
- Develop HSIP applications based on the review of updated crash data. ADOT's next call for HSIP applications is tentatively scheduled for January 2021.

Ideally, SCMPPO or Pinal County would maintain a regional crash database and update it annually. If local resources are not available for this task, consideration should be given to using consultant expertise to annually update the crash data and conduct crash analysis to identify any new trends in crash patterns and to identify potential safety projects, including developing funding applications for projects.

This STSP is intended to be a tool for Pinal County to identify transportation safety needs, compete for state and federal funding, employ effective strategies to address the identified safety needs and track the County's transportation safety progress through identified performance measures.

6.5 Performance Measures

On April 14, 2016, the FHWA final rule for "National Performance Management Measures: Highway Safety Improvement Program" went into effect. This rule established the procedures, data, reporting requirements, and potential consequences for safety performance at State DOT and MPO levels. In general, this rule is designed to further the use of data to better inform transportation planning and programming with the aim of reducing fatalities and serious injuries. Key provisions in the rule include:

- Five Performance Measures are required:
 1. Number of Fatalities
 2. Rate of Fatalities per 100 million vehicle miles traveled (VMT)
 3. Number of Serious Injuries
 4. Rate of Serious Injuries per 100 million VMT
 5. Number of Non - motorized Fatalities and Serious Injuries
- Annual reporting required
- A target had to be set for each of the 5 performance areas by February 27, 2018
- 5-year rolling averages are used to smooth variability in data

- States have “met” or “made” significant progress if four out of five targets are met, or performance is better than baseline
- MPOs reported their targets to the State in an agreed upon manner
- Fatality Analysis Reporting System FARS being used for fatal data
- State crash database being used for serious injury data

States were required to establish statewide targets for these five performance measures by August 31, 2017 for calendar year 2018, and annually thereafter. MPOs were required to establish targets specific to the MPO planning area for the same five safety performance measures for all public roads in the MPO planning area within 180 days after the State establishes each target or adopt the State’s targets. COGs and local agencies are not required to establish safety performance measures or targets, but it is recommended. MPOs may select one of the following options for each individual safety performance measure:

- Agree to support the State target; or
- Establish specific targets for a safety performance measure (number or rate).

SCMPO adopted the ADOT safety targets, based on five year rolling averages:

- Number of Fatalities: 5% Increase
- Rate of Fatalities: 2% Increase
- Number of Serious Injuries: 1% Decrease
- Rate of Serious Injuries: 4% Decrease
- Number of Non-motorized Fatalities and Serious Injuries: 3% Increase

Some of these targets show an increase in crashes because the 5-year average is trending upward – while the overall goal is to reduce crashes, ADOT has established yearly targets based on the current upward or downward trend in crashes. These targets will be reset each year based on the 5-year rolling average of crashes. SCMPO has chosen to adopt the targets established by ADOT in perpetuity, or until SCMPO should deem it necessary to establish and adopt their own targets. While not required, it is recommended that Pinal County adopt performance measurement targets, either its own or ADOT’s, to track progress toward significant reductions in fatal and serious injury crashes.

Appendix A: Crash Data Summaries 2008-2017

DRAFT

Table A1: Crashes by Year and Injury Severity

Year	Fatal	Incapacitating Injury	Non-Incapacitating Injury	Possible Injury	No Injury	Grand Total
2008	64	181	489	523	2586	3843

Appendix B: Public Involvement

- Pinal County STSP Public Outreach Report – Gunn Communications
- Social Pinpoint Comments

DRAFT

Sun Corridor Metropolitan Planning Organization
Pinal County Strategic Transportation Safety Plan

Public Outreach Report

Prepared by:

On behalf of Greenlight Traffic Engineering

Pinal County Strategic Transportation Safety Plan (STPS) Public Outreach Report

The following is the public involvement report for the Pinal County Strategic Transportation Safety Plan.

Overview

A public outreach program was conducted April 2018 through July 2019 to support the data collection phase for the Sun Corridor Metropolitan Planning Organization, Pinal County Strategic Transportation Safety Plan. The goal of this plan is to address the necessary steps and elements from a regional transportation planning perspective to reduce the risk of death or serious injuries to all transportation users in the affected region.

Opportunities for community engagement included the following

- Public Meetings
- Comment forms
- Online surveys

More details about these activities are provided below.

First Round of Public Meetings

The initial public meeting was held on Thursday, July 12, 2018 at the City of Maricopa Council Chambers, 39700 West Civic Center Plaza from 4:30 – 6 p.m. The meeting was attended by approximately 37 community members.

A copy of the sign in sheet is included in *Appendix A* of this report.

All three public meetings followed the same meeting format:

- Welcome
- Introductions and Project Overview
- Presentation
- Public Outreach/Demo for Survey/Mapping

A second public meeting was held on July 30, 2018 at the Florence Community Center, 778 North Main Street from 4:30-6 p.m. The meeting was attended by approximately three community members. A copy of the sign-in sheet is included in *Appendix A* of this report.

The third and final public meeting for the first round of public outreach was held on July 31, 2018 at the Pinal County Supervisor District office, 33622 North Mountain Vista Boulevard from 4:30-6 p.m. The meeting was attended by approximately 13 community members. A copy of the sign-in sheet is included in *Appendix A* of this report.

Photo from the 1st public meeting at the City of Maricopa Council Chambers

Photo from the 2nd public meeting at the Florence Community Center

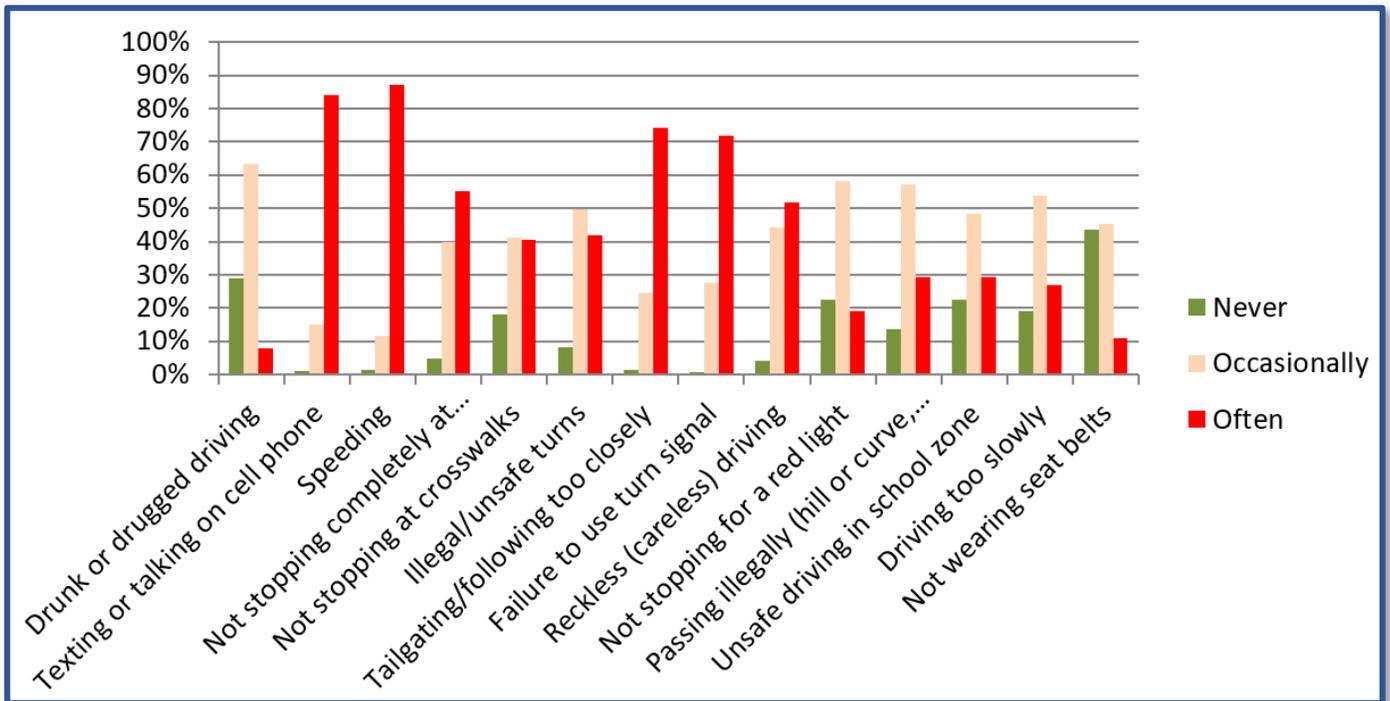

Public Outreach Notification

The following methods were used to notify residents about the public meetings and online survey:

- Electronic public meeting invite:
 - Monday, July 2, 2018
 - Thursday, July 26, 2018
- Published public meeting invites:
 - Maricopa Monitor published on Monday, June 26, 2018
 - Florence Reminder & Blade-Tribune/SanTan Valley Sentinel published on Wednesday, June 28, 2018.

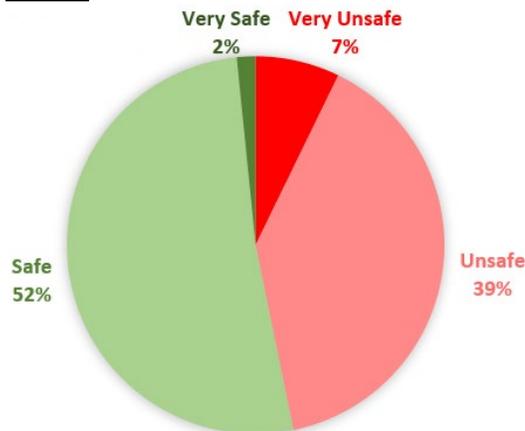

Survey Results

Question 1: How frequently have you observed drivers doing the following? *(additional comments in appendix A)*

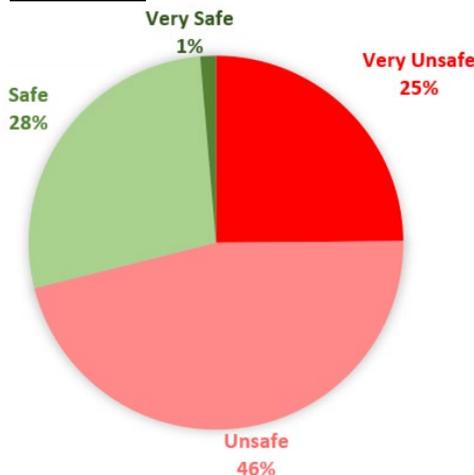

Question 2: How safe is it on the streets for the following people?

Drivers

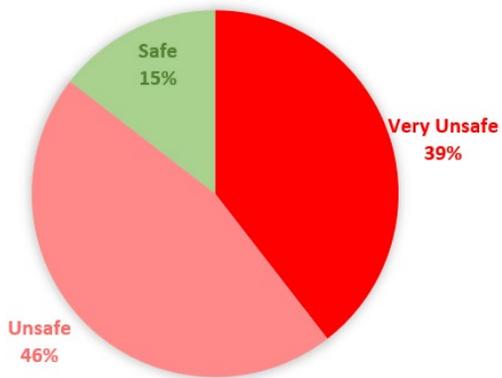

Pedestrians

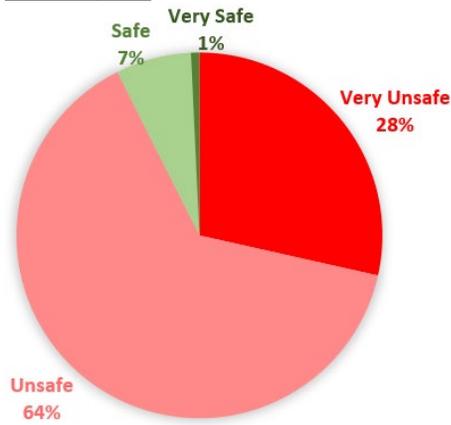

Question 2: How safe is it on the streets for the following people? *(continued)*

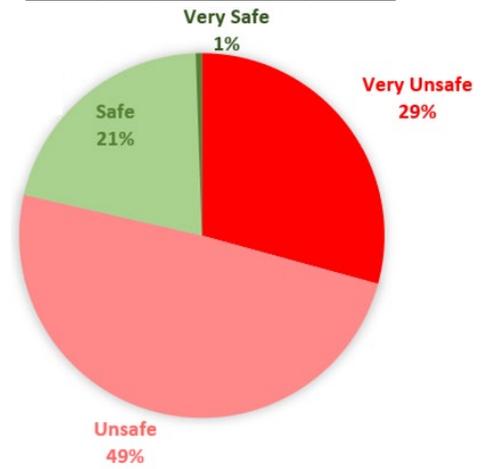

Bicyclist

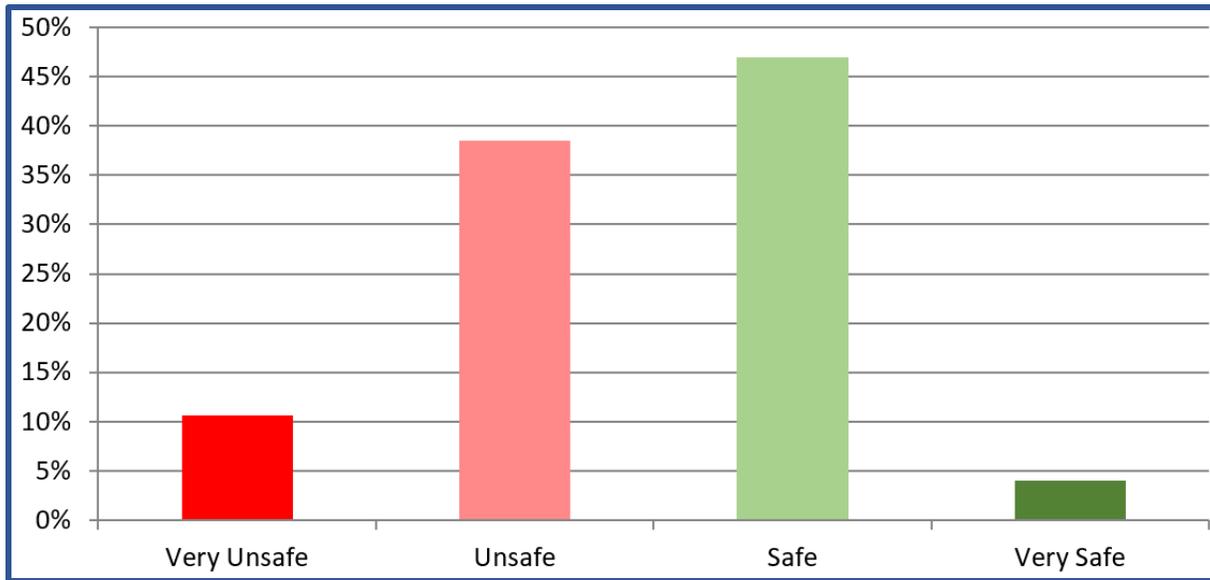

Motorcyclist

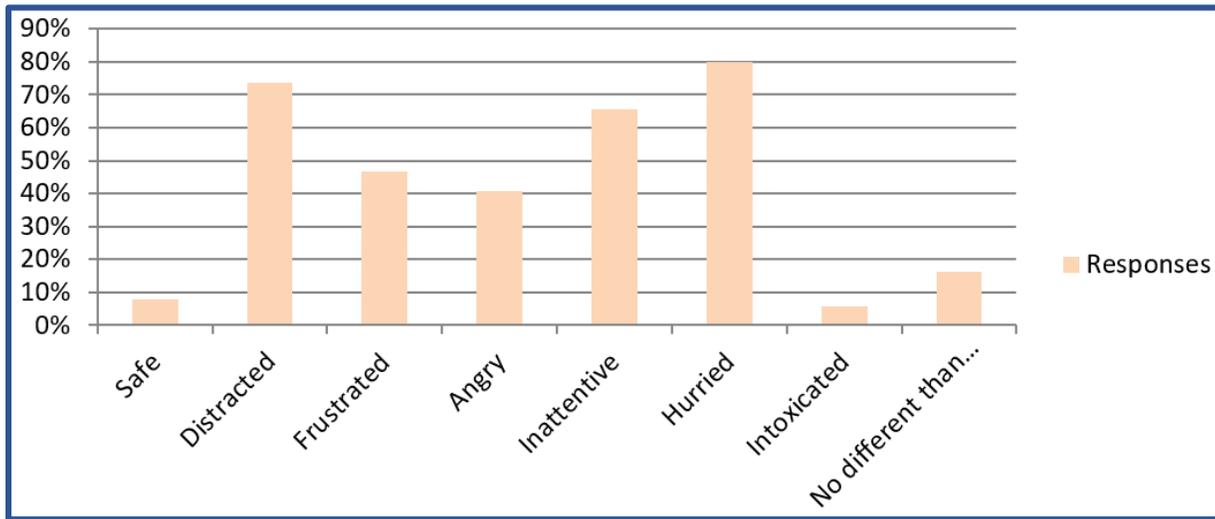

Elderly and/or disabled persons

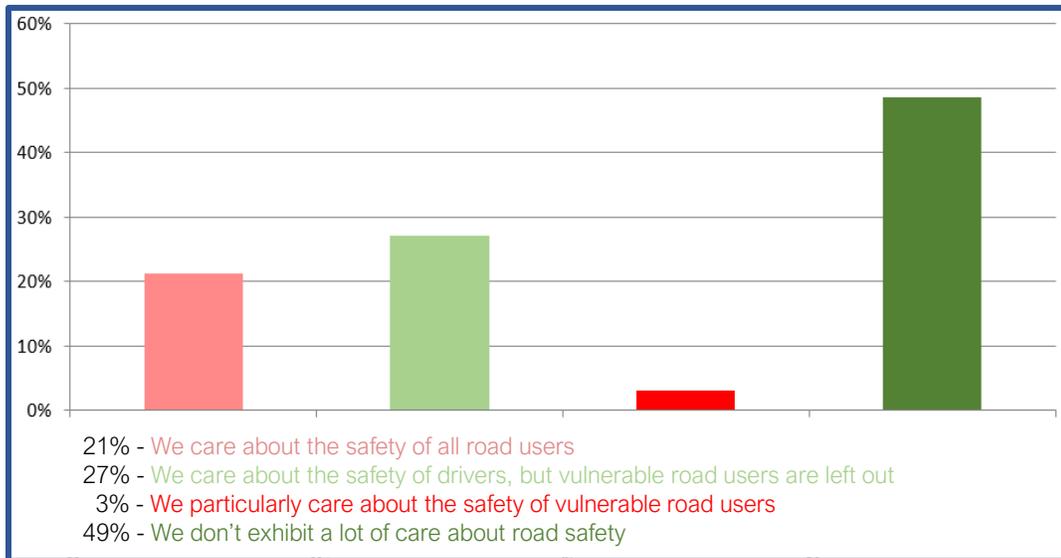

Question 3: How safe do you feel traveling in the community?

Question 4: What word best described the behavior of drivers on area streets? (additional comments in *Appendix A*)

Question 5: Which statement below would best describe safety attitudes in your community?

Question 6: What do you think is the primary cause of crashes in the area?

(most popular responses listed, all comment in *Appendix A*)

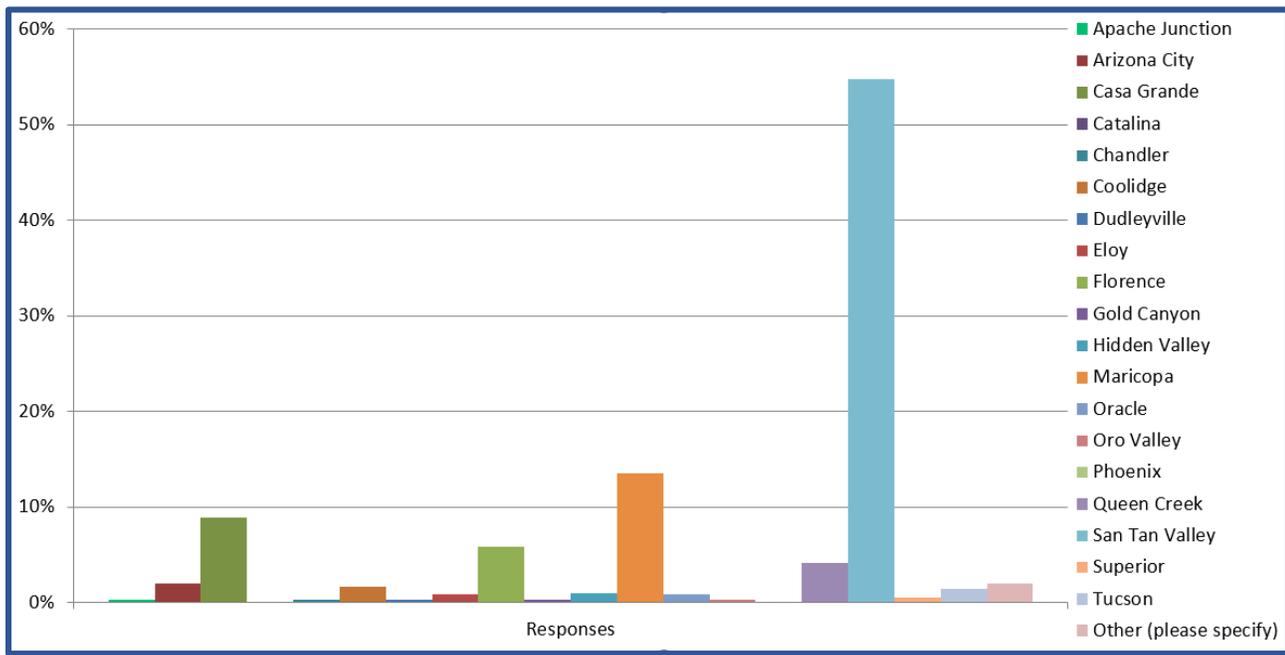

- Distracted drivers
- Speeding
- Drivers in a hurry
- Cellphones
- Aggressive driving

Question 7: What do you think needs to be changed to make it safer to travel?

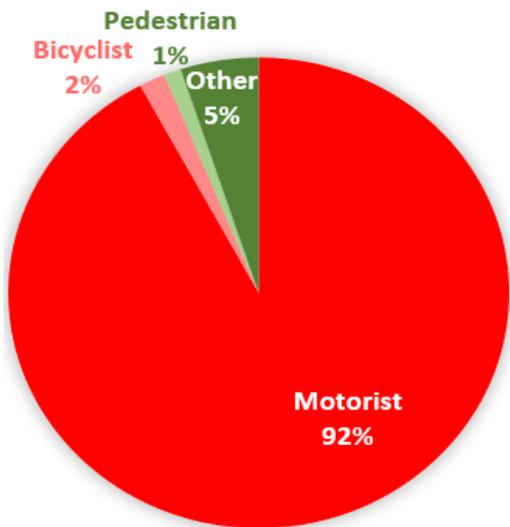

(most popular responses listed, all comment in *Appendix A*)

- More law enforcement
- Better roadway improvements (signage, medians, stop signs, roadway widening, lane striping)
- Driver education
- Cellphone regulations

Question 8: Where do you live? (additional details in *Appendix A*)

Question 9: Primarily, I am responding as a ...

Public Meeting Notes

Meeting #1 Notes:

Flipchart Notes:

Why are the crash number's going up?

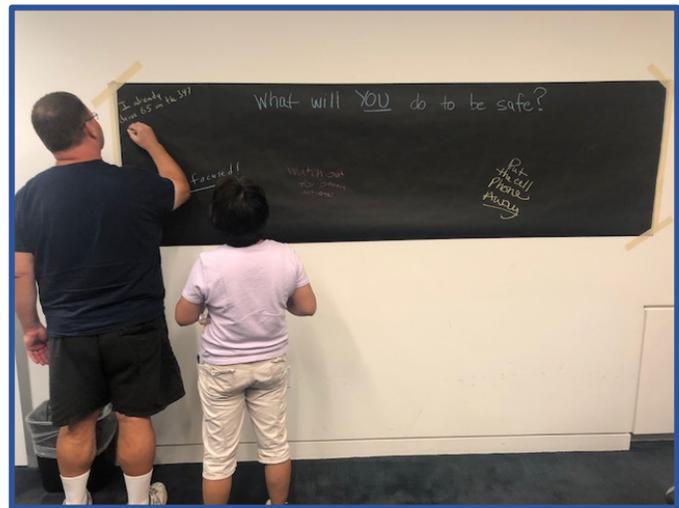

- Growth
- Cell phones
- Marijuana
- Aging infrastructure
- Economy improving
- Younger drivers

Why are there more single crash accidents in Maricopa?

- No shoulder
- Elderly drivers
- Speeding & slowing down

Open mic questions:

- Threshold to get fed HSIP funds for project?
 - Only looks at fatal accidents / serious injuries
 - Min cost / cb analyst
 - Pinal County received \$10M this year in funding
- 347 rigs to I-10 (4 miles)
 - There are significant % of crashes
 - Even in Maricopa County it affects Maricopa residents
 - No improvements in last 9 years
- I-10 from _____
 - 347 to Chandler on I-10 not controlled or improved
- SR 347 needs to come from ADOT
 - What does it take to get DPS to patrol on I-10?
 - 347 see truck in left lane going 55 causes passing on the right and created problems – needs to enforce slow traffic in left lane.
- Passing on shoulder- What about signage to slow down?
- Zigzagging is a huge issue!
- Even when both lanes are full and at speed, cars are still going faster and weaving in & out.
- The problem is the people not the infrastructure.
- The real problem is the 2-lane highway between 2 urban areas, this needs to be widened.
- Why are we building more but not improving roads?
- 2-year study
- Need 3 lanes, may not be the answer- turn lanes; approach lanes; right turn lanes maybe enough.
- Impact of autonomous vehicles on SR-347 when will we see them?
- SR-347 needs an overpass at major intersections, there is a lot of slamming into the backs of other cars- waiting will increase the cost.
- Love Maricopa- at Riggs and Honeycutt, Etc. left turn onto SR-347 needs reflectors. It's hard to see at night and needs some lights.
- Lots of impaired drivers – Marijuana
- Driveway by library cannot see.
- Needs arrow markings to show direction of traffic.
- SR-347 overpasses- Would it create a jam in another area?
- The speed decreases too fast from 65mph to 35mph.
- People driving speed limit backs up (Casa Grande) traffic – not pull offs to allow passing or raise speed limit.
- Wrong way drivers- why not use the spikes... seems simpler.
- Edison point onto Edison no stop lights needed, or three-way stops.
- Right now, this is the best traffic situation, the city is growing 100/months 12-15,000 new people adding cars to SR-347 plus adding to commercial traffic.
- SR-347 almost at fail point.
- Scoping study MAG continued \$300,000.

Stakeholders participating in graffiti wall exercise

- RTA Money can be spent on SR-347 expansion- also looking at E/W Corridor.

Graffiti Wall:

What will YOU do to be safe?

- I already drive 65 on the 347 and still reach Maricopa with all the same cars!
- Stay back
- Stay focused!
- Give myself extra drive time (2)
- Watch out for other's actions!
- Be Patient
- Don't Tailgate!
- Put the cell phone away
- I fully retired this year and will not commute on the 347
- Don't go through yellow lights.

Meeting #2 Notes:

Flip Chart Notes:

Wrong way

- Why not install stop spikes? This will be a hazard for Emergency vehicles that at times need to travel the wrong way.

Are skateboards considered part of the pedestrian accidents?

Are Bicycles party of pedestrian accidents? No, bikes are in their own category.

Comments outside of Studies?

- IS this information on the town's website?
- Trees area huge visual impact to the area, especial at Hunt Highway and Miracle Way (block past Safeway NB). There are restrictions as part of the town of Florence jurisdiction.
- What are the steps to needed to bring these issues to the corresponding jurisdictions?

Signals at the intersections

- Hunt Highway – SR 79 (approved, waiting for bridge project)

Headlights

- There is an issue with the newer model headlights and the modified blue lights.
- The height of newer or altered trucks also cause a bit of a problem in correlation to the height of other cars in the area.

Education

- We need to implement constant education and focus it depending on the demographics.
- Change the driver license requirements and maybe implement a periodic testing policy
- Will the study team develop recommendations based on the findings? Recommendations will be jurisdictionally driven
- Driver habits

How about implementing innovated methods for safety enforcement like drones?

- 44% of the stats come from within Pinal County
- What is driving it?

Study details:

- Will public transportation be part of this study?
- Will bike lanes or safety be party of the project of design development plan.
- Street parking is also causing an issue in reference to street safety.
- Can street parking be removed; this is causing a visual impact to those driving down these streets?
- Florence PD: We prefer on street parking because this causes drivers to drive slower when approaching these busy streets.

Graffiti Wall:

What will YOU do to be safe?

- Stay Alert!!!

Meeting #3 Notes:

Flip Chart Notes:

- Why isn't seatbelts and texting not a primary stop in Arizona?
- DUI/Drugs
 - 80% of crashes in Pinal County – includes prescription
 - 36 DUI Stops – 4 alcohol; 32 drugs
- Alcohol DUI's numbers are going down due to long-term education programs.
- Are Crashes going up statistically?
 - Is growth in population and VMT accounting for number of crashes.
- What would be coded as others? Dust out
- Does data have vehicle type?
- Is data Available online?

Second Round of Public Meetings

The first public meeting was held on Wednesday, July 24, 2019 at Multigenerational Center (Room 117), 1035 N. Idaho Road in Apache Junction from 5 - 6:30 p.m. This meeting was attended by approximately five community members.

A copy of the sign-in sheet is included in *Appendix B* of this report.

All three public meetings followed the same meeting structure:

- Welcome
- Introductions and Project Overview
- Presentation
- Question and Answer.

A second public meeting was held on Tuesday, July 30, 2019 at the Central Arizona College (San Tan Campus), 3736 E. Bella Vista Road from 5 - 6:30 p.m. The meeting was attended by approximately four community members. A copy of the sign-in sheet is included in *Appendix B* of this report.

The third and final public meeting was held on Wednesday, July 31, 2019 at the Pinal County Administrative Complex (Ironwood Room 101), 135 N. Pinal Street in Florence, from 5 - 6:30 p.m.

The meeting was attended by approximately one community member. A copy of the sign-in sheet is included in *Appendix B* of this report.

Public Outreach Notification

The following methods were used to notify residents about the public meetings and online survey:

- Electronic public meeting invite:
 - Monday, July 1, 2019
- Published public meeting invites:
 - Apache Junction/Gold Canyon News – Tuesday, July 16, 2019

Photo from the 1st public meeting at the City of Maricopa Council Chambers

- Pinal Central News - Tuesday, July 16, 2019
- Cooper Area News- Wednesday, July 17, 2019
- Florence Reminder/Blade Tribune - Tuesday, July 16, 2019

Public Meeting Notes

Meeting #1 Notes:

Meeting introduction was done by Jason Hafner with the Sun Corridor Metropolitan Planning Organization (SCMPO). Jason gave the audience an overview on the project and introduced Mike Blankenship with Greenlight Traffic Engineering. Mike went over the 12-slide presentation that gave background on out project and public outreach effort along with details on the crash data. Once the presentation was done the floor was opened for questions.

Questions / Comments:

- How many fatal accidents on US-60 here in apache Junction?
13

Meeting #2 Notes:

Meeting introduction was done by Jason Hafner with the Sun Corridor Metropolitan Planning Organization (SCMPO). Jason gave the audience an overview on the project and introduced Mike Blankenship with Greenlight Traffic Engineering. Mike went over the 12-slide presentation that gave background on out project and public outreach effort along with details on the crash data. Once the presentation was done the floor was opened for questions.

Questions / Comments:

- There are two driveways sat my Fry's Market Place on Hunt Highway, and the ingress and egress driveways need to be looked as for better circulation.
- Can a fatal crash show up in more then one emphasis area? Yes, they can show up in multiple if they apply.
- I have been involved into accidents that were not my caused by me, I was wondering if these statistics only show those that caused the accident or are involved? These statistics show those that are injured as a result of a crash.
- I'm assuming these numbers are much higher because in the 3 years I have lived here, I have seen many accidents. Mike (Greenlight) Yes, these numbers only reflect reported accidents, there is no real way to track non reported ones.

Meeting #3 Notes:

Meeting introduction was done by Jason Hafner with the Sun Corridor Metropolitan Planning Organization (SCMPO). Jason gave the audience an overview on the project and introduced Mike Blankenship with Greenlight Traffic Engineering. Mike went over the 12-slide presentation that gave background on out project and public outreach effort along with details on the crash data. Once the presentation was done, the meeting was concluded due to no follow-up questions or concerns.

+ 9 Law Enforcement & Fire

Survey Questions:

Question 1: How frequently have you observed drivers doing the following?

Other

- Arizona drivers are unable to merge properly. Nor will they let you merge. It became a test of nerves!
- I've seen several cars without valid or visible license plates, and very few people use their turn signals around here.
- Passing too close to bicyclist at an unsafe speed. Crossing the sidewalk with no regard for the safety of pedestrians
- Where roads go from two to one lane drivers will speed past those who have already merged to cut into the line
- Arizona drivers are terrible, not much courtesy, always speeding.
- I'm amazed at the number of people that drive slowly in the left lane. Ironwood is a prime example. Also, I've really noticed how often a red light is run like it's a suggested stop.
- Johnson Ranch School crosswalk has constant speeders, I asked to patrol it to an officer and was told there's not enough officers to do this? Until a kid gets killed right
- Being cut off when other lane ends, and the person does not yield to traffic.
- Using turn signal when not turning until the next cross street
- Large numbers of cross median crashes, fatalities and injuries on I-10, especially in the areas between MP 160-180 and MP 200-220.
- Since moving to this area, we noticed right away a vast number of hostile drivers in San Tan Valley.
- Very aggressive drivers
- Driving too aggressive at times and at times almost coming to a stop before making a turn thereby impeding the flow of traffic truly not being very courteous drivers
- The speeding and unsafe driving in this area is out of control. Even in housing developments where the speed limits are 39-35 MPH people are going 45-50 MPH and most have total disregard even for school zones. On Hunt Highway and Ironwood/Ganzel it's even worse, with people going 70-80 plus MPH, with absolutely no concern for others safety. If you try to go the speed limit, you will be tailgated and basically will be run off the road with people cutting you off by passing you by cutting you off. There must be a stop to this reckless, uncaring behavior before more innocent people are hurt, or killed.
- Cops pulling people over cause very unsafe conditions very often cutting you off
- throwing can, bottles out the windows
- For the most part, people just drive overly aggressive. It seems like they can do whatever they need to do to get to their destination and everyone else must yield to them. Accidents occur almost exclusively when these types of people come across one another.
- Going south on Rittenhouse just after crossing Ocotillo, cars in the right lane will try to go past cars in the left lane. The right lane becomes a right-turn lane only, so cars in the right lane must merge into the left lane before they get to the traffic light. Some cars will stay in the right turn only lane and then try to race cars in the left lane to get ahead of them in the left lane. Very dangerous!
- Not giving the minimum 3-foot distance when passing a bicycle. Dangerous aggressive driving near cyclists. Very few dedicated bicycle lanes. People who turn into a crosswalk when pedestrians are present.
- Speeding on Empire between Ellsworth and Gantzel. Drivers tailgate if you are going the posted speed limits!
- In this area staying in your lane seems to be a foreign concept.
- Never see a cop pull someone over going 10-15 MPH over
- Driving on shoulder and or bicycle lane frequently
- Aggressive driving, breaking randomly
- Don't really know if drunk or not wearing seat belts: estimation
- Road rage and improper merging
- Throwing glass bottles out of their vehicles into the road
- People need to read and be quizzed on the rules of the road. That seems to have gone out the window these days. No blinkers, speeding, driving too slow in left lane and talking on phones are horrible. Needs to go instilled in people to stay right unless passing!! That alone causes angry drivers!
- Tailgating and speeding is number one concern in San Tan Valley. Too many cars on old roads that cannot accommodate 100,000 people community
- Aggressive and angry driver some are scary
- unsafe red-light U-turns. The San Tan area could use more arrow lights coming out of neighborhoods.
- "making" a red light and driving way too fast in work zones
- Often witness generally aggressive driving and failure to drive to the right allowing other vehicles to pass when there are multiple lanes. Where's the enforcement?

- Slow traffic in left lane - ALWAYS!!!!!!
- People do not know how to make turns...when they turn right, they turn into the left lane and vice versa turning left
- Speed Limits are too LOW for today's cars. These limits thru our county seem to have been set in the 1950's. Get with the program and raise the legal speed limits to the speed MOST cars now travel at on any given road
- Road rage because of all the construction on main roadways leaving motorists sitting in traffic for far too long
- In my neighborhood (Copper Basin) there is a lot of speeding cars and drivers not paying attention. To many young drivers!!!
- Sorry really can't answer this question can't see their seatbelts.
- There needs to be streetlights on the side of the roads. sidewalks might help too especially on BOTH SIDES of Hunt Highway
- I frequently see drivers not observing the 3-foot clearance rule for pedestrians and cyclists.
- Not yielding to oncoming emergency vehicles / often
- The biggest issue is not having a freeway that comes out to San Tan. Many of the people that live in San Tan work as much as an hour to an hour and a half away. By the time everyone gets into San Tan they are completely aggravated by the commute which in turn creates bad driving habits, running red lights, speeding, tail gating, etc. I've seen more than 3 cars go through a RED light.
- Using the emergency lane as a third lane
- Weaving in and out of traffic...often
- Not pulling over for vehicle w/flashing lights
- Passing on shoulder
- First and last question on this page can not accurately answered by observer outside of the moving vehicle
- Texting...texting...texting and no enforcement of texting
- Impeding traffic on the highways. Traveling slow in the passing lanes/refusing to move off passing lanes when traffic behind is faster
- Impeding traffic in passing lane
- We need passing lanes and turning lanes on all highways
- Slow drivers in the left lane!!! All day! (I-10 in the Safety Corridor)
- Babies and children not in car seats or seatbelts
- Careless, reckless and speed combine make driving on SR 347 scary during all times of the day.
- There is a tree on N. Florence St. and 8th Street that is blocking the stop sign. I have seen a few vehicles miss the stop sign. It is in Florence, AZ.
- Turning left over double yellow line
- Excessive and dangerous passing on Highway 87 from loose truck loads
- Speeding and not stopping at intersections are my number one issues. More traffic officers are needed.
- The SR 347 needs a better flow... too many stops and starts, distracted drivers because of congestion, installing those noise making grooves to alert people of an upcoming light might help too, as well as timing the lights for more frequent changes during rush hour
- Weaving in and out of traffic
- Road rage
- Hands-free phone calling with headset or connection to car should be mandatory
- Too many roads under construction at the same time make drivers late and impatient. Which then leads to aggressive driving and more accidents
- If the county and state would enforce the laws from driving habits to license plates this would be a safe state and area to live in. There is always excuses of being understaffed amongst others but if your officers drive with care perhaps the residents would, but it is always do as I say not as I do
- Road rage – occasionally
- Refusing to turn off blinding high beams when flashed
- Aggressive driving
- Passing in school zones

Question 2: How safe is it for the following people?

- Drivers
 - Very Unsafe: 27
 - Unsafe: 148
 - Safe: 193
 - Very Safe: 6
- Pedestrians
 - Very Unsafe: 92

- Unsafe: 171
- Safe: 102
- Very Safe: 5
- Bicyclists
 - Very Unsafe 147
 - Unsafe: 171
 - Safe: 54
 - Very Safe: 0
- Motorcyclist
 - Very Unsafe 77
 - Unsafe: 173
 - Safe: 18
 - Very Safe: 2
- Elderly and/or disabled persons
 - Very Unsafe: 108
 - Unsafe: 182
 - Safe: 77
 - Very Safe: 2

Question 3: How safe do you feel traveling in the community?

- Very safe – 40
- Unsafe – 145
- Safe – 177
- Very Safe – 15

Question 4: What word best described the behavior of drivers on area streets?

- Safe – 29
- Distracted – 281
- Frustrated – 176
- Angry – 162
- Inattentive – 247
- Hurried – 308
- Intoxicated – 6% 22
- No different than anywhere else – 61
- Other – 15
 - Left lane lovers need to move over
 - There is absolutely no common courtesy or sense anymore. all drivers need to take a driving test before they get a license here
 - Unskilled / Untrained
 - Selfish
 - Slow traffic in left lane
 - Entitled
 - Confused with lack of proper traffic control
 - I still feel safer on SR 347 the I-17
 - SR 347
 - Inconsiderate
 - Uneducated drivers
 - A lot of people hang in the left lane and drive under the speed limit
 - Very slow driving
 - Answer is based on highway, I travel on Highway 87 and drivers are either extremely slow or extremely fast, passing large number of cars and putting others at risk
 - The commute into Maricopa on SR 347 has horrible flow making all the things above worse. We have those noise makers for the tires when nearing intersection and more frequently changing lights at intersection during rush hours

Question 5: Which statement below would best describe safety attitudes in your community?

- We care about the safety of all road users – 78

- We care about the safety of drivers, but vulnerable road users are left out (pedestrians/bikes/motorcycles/elderly). – 100
- We particularly care about the safety of vulnerable road users (pedestrians/bikes/motorcycles/elderly). – 11
- We don't exhibit a lot of care about road safety – 179

Question 6: What do you think is the primary cause of crashes in the area?

- Distractions/rushing
- Speeding and distracted driving
- People are in too much of a hurry because they are running late
- Red light runners, and lack of patience by the rest
- Distracted Driving and Long commutes creating complacency
- Being in a hurry
- Lack of law presence and enforcement
- Distraction and impatience
- Bottle necks in roads, heavy traffic & driving and texting. Heat also makes people cranky
- people are in a hurry and don't look both ways when they should
- Texting and slow drivers in the left lane
- There is rarely any enforcement of the speed limits. People speed and tailgate down Hunt Hwy, Gentzel, and Ironwood and it is unusual to see anyone pulled over or to see speed enforcement in San Tan Valley
- Distracted driving coupled with excessive speed
- Inattention and excessive speed
- Arizona needs to adopt a law about driving and using cellphones. People are constantly speeding
- Cell phone use and speeding
- Speeders and tailgaters, though they will say people going too slow (i.e., the speed limit)
- Impatient
- Too many roads under construction at one time. Not enough highways out to the area which causes longer commutes and more irritated drivers. Lights not timed properly
- Not paying attention to the road
- Speeding
- Cell phones, people in a hurry, texting, drunk driving!!! SPEEDING!!!!
- Aggressive drivers that think they need to be in front of everyone else no matter what it takes
- Tailgaters and not paying attention
- Distracted driving. Cell phones
- Lack of proper signage and traffic control/ lack of infrastructure.
- Lack of median barrier cables on I-10 in cross median crash-prone areas.
- Red light running, phone distractions, speeding and hostility.
- aggressive driving
- Not paying attention, drivers are tailgating, cell phone use, always in a hurry
- Excessive speed, tailgating, intoxicated driving
- Inattention and distraction too many drivers too concerned about their cell phones and watching their kids in the car and not really paying attention to the road. In addition, everyone seems to be in a hurry to get wherever they are going
- Speeding!!!!!!
- Winter visitors, untrained young drivers and lack of law enforcement
- I-10 is extremely dangerous! The road needs to be widened, especially in the area of the GRIC. Too many crashes, with too many injuries and fatalities. The road closures and traffic issues that come with this are disruptive.
- Distracted drivers rushing to their destination
- Aggressive driving
- Careless drivers
- Frustration at the lack of infrastructure and proper road planning in San Tan Valley
- Speed and recklessness
- Not enough lanes. Too many stop lights. Drivers not identifying a 2nd or 3rd lane when turning through traffic
- People stopping in traffic on southbound Gentzel to let north bound people cut across to enter the gas station at ocotillo. The left lane stops to be polite; the middle lane stops to be polite, but people forget about the far-right lane who isn't on board and cannot see the car crossing traffic. It is illegal to stop to let traffic through even though it seems polite. When you waive a car on, you are directing the flow of traffic, which is an officer's job.
- Tailgating and cell phone / other driver distractions
- Texting cellphone users

- Building homes before roads and cramming more people into this entire area, from every angle. Long commutes, leaving people time to dick around on their phones, distracted driving
- Too many drivers, all the construction, poor enter / exits from businesses on hunt hwy/Bella vista intersection. (Circle K, McDonald/Walgreens, O'Rileys, Firestone, Chase Bank and AutoZone
- Speeding, overcrowded roads
- People are rude, don't care about others, they're inattentive. Sherriff Deputies are just as bad when they drive as they think driving rules don't apply to them
- Speeding, not paying attention, running lights
- Speeding and cell phones
- Over population; not enough roads
- Not watching
- Distracted, inattentive and impatient drivers
- Speed and not paying attention
- Congestion coupled with too many and ill-timed traffic lights
- Speed, inattention
- Inattentive drivers.
- Speed. Use of cell phone while driving. Road rage
- Texting or just be distracted
- Distracted driving and speeding.
- Speeding
- Speed due to "me first mentality"
- Entitled attitudes toward their travel and a complete disregard to the world around them
- Distracted drivers, and speeding
- Speeding and texting
- Speeding. Using cell while driving
- Cell phone use, speeding
- Inattentive drivers
- Speed and people not paying attention...especially texting and talking on the phone while driving
- Distracted driving compounded by speed
- Not paying attention distracted driving
- Distracted driving
- Aggressive, inconsiderate drivers leading to a lot of road rage
- People are in too big of a hurry
- Not enough lights, or turn out options
- Speed and distracted driving (cell phone)
- Distracted drivers and drivers who do not understand how to merge (forcing their way through unsafely at the last-minute causing slamming of breaks and veering to avoid accidents which leads to other accidents)
- Speeding
- Speeding and texting
- People are in a hurry, and it seems like we have on going road everywhere you travel these days. I think it's just too many people for the roads. I'm not sure how you can fix that
- Speeding
- Stupid risky driving. Motorcycles are careless
- Inattention
- Too much traffic on these little roads. Infrastructure sucks. There's road construction everywhere but it never alleviates the congestion
- Speeding
- Poor level of driving proficiency
- People not paying attention. Lack of care. People in a hurry
- Inattentiveness
- Unsafe/illegal maneuvers by drivers
- Speed
- Speeding, running red lights
- Too many homes being built and not adequate roads, causes frustration and overcrowding of existing roads
- Recklessness, roads and not enough police enforcement
- Phone use
- Speeding and running red lights
- Traveling too fast and not paying attention

- Aggressive driving by tailgating and weaving through traffic
- Slow and inattentive/distracted drivers
- Distractions and speed
- Blind left turns in intersections
- Speed, distraction, poor visibility of oncoming traffic in left turn lanes
- On phones, no attention to driving, in a hurry, not planned out roads
- Inattentive, DUI
- Speed, Disregard at stop signs/lights
- Poor driving and road rage
- Speed, Intoxication
- Speeding
- Distracted drivers and in a hurry to get somewhere
- Inattention, following too closely, failure to signal a turn
- Inexperienced drivers
- distracted drivers cell phones usage most are in a hurry not stopping for stop signs and just plain no courtesy for others on the road apparently, they don't require them to prove that they are literate enough to be able to read and understand road signage
- Construction on all the main roads at once. Can't get out of town easily causing people to be late, which results in road rage and unsafe driving
- There are a lack of lanes and the cops aren't doing their job. I've seen people speed by a cop and they just don't do anything. If we had more lanes, this would help so people can move around more. We also have one main road to Maricopa, which I think is another issue as well
- Everything I mentioned so far. Mainly hurried, distracted, inattentive, speeding, tailgating, no turn signals
- Cell phones speeding not following rules of the road
- In a hurry, distracted and poor traffic controls. Roads consistently changing from one lane to two lanes and then back again. Traffic lights not timed to work together. Poor turn lanes and not marked or enforced. Allowing left turns at lights where you can't see oncoming traffic clearly
- Speeding
- Texting, intoxication, distracted
- Driver error
- Not paying attention, being in a hurry because infrastructure is not a priority with the amount of people. Traffic jams always making people late for where they need to go. Keep building houses but not streets to support all the cars
- Speeding excessively!
- Distracted drivers who are hurrying to take kids to school or themselves to work. they do not give themselves enough time nor do they put down their phones
- Speeding
- On northbound Ironwood at Ocotillo during heavy traffic cars will attempt to turn left into the driveway of a Circle K where they will cross two of the three lanes then get hit by oncoming traffic in the third lane. They should be entering Circle K from Ocotillo. Also, cars leaving Circle K try to turn left onto northbound Ironwood which is hazardous during heavy traffic
- Still new to the area from Illinois, but people speeding excessively!
- Texting and driving
- Inattentive drivers
- Cell phone
- Too many drivers, too little infrastructure. The county allowed excessive housing development. Now we have 125,000 people in an area that can only handle one quarter of that. Most people commute, and there are two inadequate surface streets for them to commute on
- Going too fast, not obeying the speed limits, not being attentive
- Speed and careless driving
- Talking and/or texting on cell phones, speed, aggressive driving
- No enforcement of traffic laws
- Wrong way driving
- Distracted by phone usage or drunk driving
- Too many cars not adequate roadways for volume of traffic makes drivers frustrated
- People in too much of a hurry to get to wherever they are going. A lack of stopping for stop signs, just roll on through. And frustration at the length that construction lasts causing backups for miles
- Same as anywhere, distracted driving
- Distracted driving

- Distracted driving
- Speed and distracted drivers
- Not looking. Not able to see on dark streets
- Turn arrow issues, either lack of arrow or turning unsafely against traffic, also speeding
- Speed
- People are driving too fast and not paying attention to their surroundings!
- Speed and inattentive driving
- SLOW TRAFFIC IN LEFT LANE
- Speeding, tailgating, inattentive, impatient, aggressive, self-absorbed drivers
- Speeding
- People speeding and tailgating.
- Distracted drivers, excessive speed, impairment, construction
- Too much traffic, speeding
- Talking on Phone or texting and having no clue how to merge into traffic
- distracted driving...not paying attention to road rules and laws...texting or talking on cell phones
- #1. Human mistakes. #2. Distracted driving. --- Toss Up
- People in a hurry. Traffic congestion. Not enough lanes in San Tan Valley
- Speed, not paying attention, in a hurry
- Speeding and poor driving habits with too much traffic, duh
- Cell phone use / inattentive driving
- Distraction, anger over congestion, disobeying traffic laws
- Distracted driving - using phone or texting while driving.
- People on cell phones while driving both talking and texting. People having the mentality that the laws do not apply to them especially with the lack of law enforcement in the area.
- Tailgating and phone distraction
- Road construction and not well planned (lacking turn lanes, bike lanes and sidewalks)
- Speeding, and distracted drivers
- Bella Vista and Hunt Hwy intersection and surrounding area
- Inattentive, texting drivers, drivers not slowing and thus not being stopped at red lights, failure to yield, angry drivers/ road rage (we all make mistakes so why does it turn into rage?), tailgating
- Speed, texting
- Speed and texting
- Poor road planning, poor construction rerouting and drivers trying to leave the area for work and there's not many ways in and out. We need more access to the outside Valley
- Distracted driving and aggressive driving
- Not watching road. Distracted by phone or radio
- Speed and cell phone use
- Speed texting talking on cells
- People speeding, running lights. The lack of roadways to get people from the east valley out to queen creek and san tan valley are few and crowded. By the time people get off work or head into work it's a fiasco and a race to get home because the roads are so limited it takes forever so people speed and run lights just trying to get home.
- The lack of streetlights that function in many places. The lack of a freeway where we can get where we need to quickly. The lack of public transit
- People are always in a hurry, don't pay attention, intoxicated (maybe)
- Lack of lanes, causing bad traffic and frustrated drivers
- Frustration. I think anyone driving in Pinal County experiences elements from the way the roads are set up, problems with other drivers, and ridiculously intrusive construction that make them angry and frustrated. This leads to aggressive or distracted driving that ends up in an accident. How many times has a driver entered the freeway going the wrong way? That's poor design
- Speed; visibility/sight lines; no specific turn lanes
- Inattention and there are several roads that need a stop light (SR 79 and Hunt Highway).
- Excessive speed, inattentiveness, failure to obey traffic control devices, haste / imprudent actions
- DRIVER BEHAVIOR
- Distracted driving/intoxicated
- Talking on cell phone
- Speed
- Speed and aggressive inattentive drivers
- commutes too long, no direct freeway access, constant construction on every possible route in and out of the area

- SR 347
- Alcohol a close first but texting while driving is the #1 key issue and use of cell phone (talking)
- Speed
- Tailgating while texting
- Tailgating while speeding; using phones while driving
- Speeding, failing to use signal, and illegal turning
- People driving slowly and won't move into right lane
- Speed, intoxication, impatience. with two the city of Maricopa being between two casinos....(drunks)
- Speeding
- Cell phones and speed
- Congestion/inadequate road development. Not enough of the taxes extorted from San Tan Valley is re-invested in adequate roads.
- Contact the Arizona Department of Public Safety (DPS) in Phoenix, AZ or any other appropriate State Agency for immediate investigation/inspection into this matter; for the health and safety of all Pinal County citizens
- Speeding and not paying attention
- Speed
- Going too fast (drivers), SR 238 and SR 84 both need to be 4 lanes not 2 lanes. Both have semi's that go to slow or too fast
- Driver distraction
- Speed and impairment. Mostly speed
- Speed! Also, blind curve at Amarillo Valley & Louis Johnson; rough roads (people drive fast on wrong side of street)
- Speeding drivers who are not paying attention
- Wanting to drive 15-30 MPH over the speed limit and zigzagging in and out of lanes to get in front of people going 5-10 MPH over
- Driving too close, too fast and too aggressive
- Cell Phones & Signals
- Distracted drivers
- POOR DRIVERS EDUCATION for younger drivers. People on cell phones. texting, and multi-tasking while driving
- Contractors completing paperwork or performing work related activities while driving
- Disregard or ignorance of traffic laws
- Inattentive driving...texting! Bicycles not following the rules of the road. Drivers going too fast. Motorcycles not realizing that when they get into a situation with a car or truck...they will lose. Cars don't pay special attention to motorcycles, but motorcycles watch out period!
- Congestion, snowbirds, un-educated drivers. and a severe lack construction traffic control
- Speed and distracted driving
- Distractions from phones and the general acceptance that we can drive fast and aggressive without recourse
- Cell phone use, either texting or talking on the phone while driving without use of a hands-free device
- distracted driving
- Texting, speeding and tailgating, Left turns in front of oncoming traffic, U-Turns, No police on the roads
- Distracted driving
- Inattentive to others
- Everyone seems to be in a hurry. Younger drivers are easily distracted by their passengers., one of the biggest causes is electronic I-pads etc.
- Distracted and hurried driving, tailgating
- Cell phones, reckless drivers, drugs and alcohol
- Poor intersection Lighting
- Speed / reckless
- Sun obstructing views, speeding, not caring
- Speeding
- Distraction, cell phones, in a hurry
- Distracted driving, speeding, and impairment
- Not paying attention, not knowing the rules of the road, and driving too slowly
- Speeding and drunk/ impaired drivers from casino. Too many cars traveling on the SR 347and having stop lights at Riggs Road AND at I-10 and SR 347
- Speeding would be my guess
- I would guess speeding or driving too fast for road conditions
- Speed and not paying attention
- Excessive speed and distracted driving

- Distracted drivers
- Speeding and tailgating as well as weaving in and out of traffic at high speed, people driving slow in left lane, causing frustration and stupid overtaking maneuvers
- No turning lanes on high speed highways. No passing lanes on highly traveled highways. No stop lights at busy intersections. Water crossing highways during storms. More flashing stop lights on rural roads, such as Signal Butte, Randolph, Story etc. No passing markings at intersections. The survey markers are very rough when you drive over them on SR 87 and SR 287. Dust storms, unpaved roads in rural areas
- I drive the I-10 daily east to work from Florence (Casa Grande) in the am and then back in the PM for over 8 years. The addition of the safety corridor had made this travel more dangerous due to slow drivers, mainly in the left lane
- Inattentive drivers. Dangerous truck drivers on interstate
- Speeding
- Only 2 lanes in each direction on I-10
- Inattentive
- Distracted driving
- Likely being in a rush, and intoxication, cell phone use
- People are in a hurry, roads (in San Tan Valley) cannot handle the amount of traffic trying to squeeze through (especially when our population increases with winter visitors)
- Distracted driving
- Cell phones
- Speeding and reckless driving
- Distracted drivers
- DWI, distraction
- Drivers that just don't pay attention to their driving and are texting or daydreaming
- Texting and looking at phones. People trying to go too fast
- People in a rush
- Travelers who are in a hurry, single lane roads, that require passing against traffic. inattentive drivers
- SR 347 the stop lights do not give you a countdown warning, so people going 60 will run thru the light instead
- Distracted driving
- People distracted with cell phones or other media/technology, driving while under the influence of drugs/alcohol, passing in "no passing zones" or in low visibility areas (ex: SR 79, SR 87, SR 287, SR 387), not using signals when turning, abrupt stops, and traveling through busy cross streets that have no traffic lights (ex: in Casa Grande off Cottonwood Lane and Kadota Ave.)
- Self-absorption. A great many people get in their cars and only think about themselves
- People are in a rush and not paying attention
- Talking or texting on phones; distracted
- Speed, not paying attention
- Insufficient roadways and lanes on existing roadways
- Speeding
- Arizona Drivers are the worst in the nation. Many drivers ignore all traffic controls; improperly pass, speed (including in work/construction zones); they pull out into traffic without looking fail to maintain a safe lookout prior to backing -- excessive speed, especially in parking lots!!
- Careless drivers
- Because this county is very rural and farming, the LARGE number of farming machinery on the roads, especially during peak travel times, causes regular drivers who are trying to get to their jobs, to take risks of speeding around the SLOW tractors and equipment. I have seen MANY cars pass large equipment on the road in no-passing zones. I have seen MANY near head-on crashes because of that behavior
- Distracted drivers and speeding
- Distracted
- Distracted driving, being in a hurry, traffic
- Not paying attention and speeding
- On lane highway
- Too few roads into developing areas such as San Tan Valley and Queen Creek. Constant construction
- Elderly, pedestrians not crossing on cross walks, lack of good lighting in certain city areas
- Long commutes, a lot of construction, changing speed limits, merging lanes
- Speeding and lack of streetlights to see pedestrians and bicyclist
- Amount of traffic entering from the east valley, lack of infrastructure and roadways to accommodate the residence. Posted high speed rates, lack of enforcement
- Distracted drivers or drivers who are in a rush

- Speed, loose truck cargo, cell phone usage, drivers always in a hurry
- Following too close (tailgating,) speeding, aggressive driving.
- Terrible roads in Pinal County. Especially not enough roads in large communities like San Tan Valley. In addition, this is a dark county, so most roads are not lit adequately. It's so very dark, especially during construction, when roads are already narrowed and/or closed people cannot see where they are going. I personally entered a road going wrong way at night due to not enough signage and very dark street
- I have never lived in a state where people tailgate or pass so often. The mood of the drivers in this state is way too aggressive. Very angry drivers
- Drugs and alcohol
- Distracted drivers
- In a hurry to get from point A to point B. Congestion on I10 between Casa Grande and Phoenix
- Distracted driving and speed
- Texting and driving
- Texting, no respect for laws, in a hurry
- Frustration over lack of access in and out of areas and slower traffic blocking passing lanes leads to angry, hurried drivers taking too many risks
- High volume of traffic continues to increase. With the expansion of surrounding cities & continued growth for Pinal County. People are in a hurry. Semis are also on the road with standard vehicles, there is not a safety location if they experience vehicle issues. Also, cell phones are huge distraction
- Speed, inattentive drivers, poor roads
- Poor and inconsistent design of roadways
- People talking or texting on their phones
- Excessive traffic volume, especially in STV area during commuting time, causing people to become frustrated and angry - and careless!
- Distracted driving, frustration over long commute times
- Speed, impatient driving, inattention
- Intoxication and not paying attention
- Speeding and distracted driving (texting, cell phones, etc.)
- Carelessness!
- Reckless Driving
- Tailgating and not paying attention. On phones texting or using social media
- Most crashes occur on SR 347. These are caused from driving too fast. A lot of drivers going 80 - 100 MPH
- Not paying attention
- No overpasses on the SR 347 causing backups and frustration of drivers
- Inattention to traffic around them
- Distraction, hurried, excessive traffic on SR 347; the only way out of town heading north which accounts for the majority of travelers to/from Maricopa
- Speed, reckless driving
- Traffic congestion, speeding, tailgating, ILLEGAL TURNS
- Distractions
- I am concerned about the lack of median barrier cables on I-10 running through Pinal County. Since 2001 there have been 155 crossover crashes with 153 injuries and 46 fatalities
- Too much traffic for road sizes
- Speeding
- Distracted driving
- No turning lanes in areas that could desperately use them. Blind curves/corners with only a single lane. Busy roads with only single lanes and no passing ability. No lighting in areas where there are sometimes pedestrians.
- The lack of enforced laws. How many times do you have to say speed may have been a factor in an accident when we can all see it for sure was before the laws are enforced?
- Texting
- The area is overpopulated with people and not enough roadway to support the growing developments
- Speeding and distracted drivers
- Roads were not constructed with the thought of future increases in the population. Too many roof tops for the small roads
- Inattention. Road rage. Anger
- Excessive speed, especially on rural roads. Distracted/impaired driving
- Not enough roads
- Inattentiveness

- Distracted drivers texting while driving
- Reckless driving and speeding
- Inattentiveness
- Drivers are not 100% alert, young drivers are not experienced enough and don't realize how dangerous various types of roads can be, such as dirt roads.
- Speeding, distracted driving (cell phones, fatigue)
- I-10 being two lanes going to Phoenix
- Lack of safety culture.
- Drugs/alcohol impairment, inattentiveness, cell phone use, poor driving habits
- Speeding
- Drivers on SR 347 driving too fast during off traffic times and text or using their phone while driving

Question 7: What do you think needs to be changed to make it safer to travel?

- Behavior of the people driving
- Congestion needs to be relieved with improved roadways. Phones while driving should be banned for everyone, not just teens. Enforcement of speed limits. Sheriff department should have a more visible
- Please finish the road constructions quickly to open more roads to lessen travel congestion
- More patrol officers
- Better light cycles, better bike lanes
- Use of turn signals
- More officer patrolling
- More law enforcement
- Stop adding so many houses out here in San Tan Valley and Queen Creek. We don't have the roads for it!
- Everyone should pass a driver's test before getting licensed here. County officials should think ahead when planning road work. why tear up the same road three times in two years! right now, a road is being improved while housing construction is going on, which means the road will need to be repaired when the construction is done. This is unnecessary expense and inconvenience
- Prohibit cell phone use. If the right lane is clear move to the right
- Visual speed enforcement; residents need to see people being stopped for speeding, that there is enforcement to protect drivers who do not speed and that those who do will receive a ticket. The lighting is also unacceptable in San Tan Valley. It is extremely difficult to see other vehicles and pedestrians at night. I know there is a low or no lighting ordinance, and I love to see the stars at night like anyone else, but safety needs to come first
- Better driver education and more enforcement of traffic laws
- More kindness
- There should be turn lanes at busy corners. The roads in Pinal County are not conducive to safe driving. Cell phones should be banned for EVERYONE while driving
- Drivers attitude
- No cell phones, more radar
- Crack down on speeders
- Enforce no passing and things like that
- freeway access directly to the area not 20 or 30 minutes away. Do road construction at night and limit the number of routes that are done at one time. We only have a few ways to get out and when they are all blocked up at the same time it gets frustrating
- More roads
- Enforcing the speed limits and improving line of sight at most intersections
- Get the excessive speeders of the road, crack down on cell phones, more sidewalks and bike lanes
- More police presence at key areas...at the double land in front of Encanterra, where the land ends after the lights on Combs in front of the school
- Attitude. People need to allow themselves enough time to get to their destination, so they don't feel rushed. It's an individual's choice, not the governments to try to fix
- Better ways to exit area. New road designs
- Proper signage and a human element when it comes to traffic control
- Installation of median barrier cables in cross median crash-prone areas of I-10
- More police patrolling Ironwood/Gentzel and Ellsworth all the way down along with speeding cameras and red-light cams. We can't hardly go out for anything without a confrontation with a hostile driver simply for obeying posted speed limits and traffic laws. Once in other cities outside of San Tan Valley things are much better. We don't understand where the anger is coming from out here. The rest of our family has noticed it as well. If it continues, we will consider moving into Mesa or Gilbert for safety of travel

- Drivers caring about other drivers and people
- That's going to be impossible you can't change people's attitudes. Maybe have unmarked patrols watching for cell phone use and aggressive drivers especially in the am and after work. Please change all left turn lanes to left turn on green arrow ONLY
- More law enforcement presence, DUI checkpoints
- CELL PHONE LAWS !!!! would be a start
- More traffic signals, lower speed limits, more monitoring by police/sheriffs and more speeding tickets issued.
- More law enforcement and more schooling for young drivers
- Widen I-10 to at least three lanes all the way from Casa Grande to Phoenix and install cable barriers for safety
- Police presence
- More law enforcement
- More police presence in concerned areas
- Open Magma Road. on west side! This public road should never have been closed to traffic as it hinders and overloads traffic on Hunt Hwy. The High School and Eduprize School can access Magma and alleviate congestion on Hunt Highway / Johnson Boulevard on the nw side of golf club needs exit roads opened to Hunt Highway this can be done where there is a greenway
- More vigilance with speeding in residential areas, crosswalks, and school zones
- Better timed lights. Less stop lights. More lanes. More options to get to freeways
- The giant light at Gentzel and Ironwood, when turning west, needs to be replaced. all the lights line up with the visors, and blind spots when you are the front car. You literally cannot see any lights if you are taller than five foot five inches.
- Make it illegal to drive while texting or on the phone
- Stricter for people on their phones
- Finish the roads, plan for the housing that is coming. Simple things like turns lanes and lights, especially on 2 lane rural roads that now have 10 times the traffic on them from 10 years ago
- More streetlights (Bella Vista / Appalachian, better flow of traffic through/around Bella Vista and Hunt Highway, curbs/school zone signage near Gentzel/ Poston Butte High School
- Wider roads
- Deputies need to be an example. We need more enforcement of speed limits for both slow drivers and speeders.
- That's tough, not possible for vehicle drivers, but pedestrian and bike safety can be improved with bike Lanes, lit and visibly marked/signed crosswalks
- More lights, four way stops
- Add more roads asap
- Education
- increased police action to stop speeding, reckless drivers + enforcement of laws requiring proper use of turn signals. Strict laws preventing driver use of mobile phones while driving
- Need more Sheriff's on the road but realize that's not possible due to budgets
- Better time the traffic signals
- More cops, ticketing
- More enforcement
- Ban cell phones and create hefty fines if caught
- The police need to be monitoring the dangerous areas
- Need more patrols to deter bad driving behaviors
- More officers on the roadways
- Driver attitudes
- People need to start getting pulled over more. Write more tickets. I have seen people speeding and making aggressive and necessary lane changes, turns, and general driving right in front of police with impunity. The increase in revenue should pay for the increase use of resource. Gentzel road is the worst. Hunt Hwy is almost as bad but getting better. People think driving through the area is a race
- Ban cell phone while driving. Awareness of speed limit on the road
- More police presence in the area
- More enforcement
- As the area grows, we need more officers to enforce the laws of the road
- Cell phones should have auto dial through radio, so hands and eyes stay on the wheel. Voice commands
- People need to be responsible for their own driving habits. Significant fines for breaking the laws in place (and a law prohibiting talking and texting on your phone) might "encourage" people to be more responsible
- Enact laws that prohibit the use of all mobile devices that have a display for all motorists of all age groups. Install barriers to physically separate bicycle lanes from motor vehicle travel lanes on major highways with speed limits over 35 MPH. Required continuing education for all drivers

- No texting and driving
- More lanes and more police patrol
- More ways to get out of the city
- More sidewalks
- No texting and more stoplights
- People are too selfish. Distracted and childlike selfish road behavior is our biggest issue but how can we change that??
- Tell cops stay out of barrows pizza and stay going the speed themselves and do their job every day 6-8 cop cars having lunch all at same time no one is on roads looking for speeders, when the speed is 40 MPH some driver is doing 60 MPH plus, it has to stop
- Lower speed limits
- No idea...
- ROAD improvements. Stop building houses until the roads catch up. EXTREMELY poorly timed traffic lights!
- Widen roads stop overpopulation of housing in San tan valley build roads to accommodate population
- It will never change. People are in too much of a hurry. The continued building of houses will only clog the roads that can handle the people that are already living here
- More police present
- Introduce self-driving cars. In a hundred years, people won't believe we used to let our citizens aim large chunks of metal at each other at ferocious speeds
- Finish up the road construction
- Better signage in school zone
- TRAFFIC LAW ENFORCEMENT
- Building needs to match the infrastructure of the community
- Better roads to accommodate the growing population
- Better bike lanes
- Red light and speeding cameras, increased presence of Sheriff Deputies
- More lanes or avenues of travel out of the city of Maricopa. More reminders for slower traffic to stay to the right. Restrict some of the travel limitations for trucks possibly to a certain specified that does NOT include rush hour
- More travel lanes on the roads and greater police presence and enforcement
- mandate more frequent behind-the-wheel tests for 60-year old drivers
- Clearly marked crosswalks, bicycle lanes & traffic lights in sync with traffic flow during all times of the day and night
- No more left turn at lights in oncoming traffic
- Left turn lanes must be made safer! Left on green arrow only signs may be a safer option, and less expensive than rebuilding intersections. We need more lanes for traffic to flow in and out of the area. I feel this would help immensely with angry, frustrated drivers
- Better planning of streets, curbs, signals, no phones while driving
- More enforcement, better traffic cones that would encourage better enforcement
- Heavier penalties for talking and texting
- Huge punishment for distracted driving
- Cite driver for violations mentioned above
- Stricter traffic laws. Stricter traffic law enforcement
- You can't fix stupid and not having any courtesy or common sense
- Communicate to ensure construction is spread out. Do everything possible to minimize impact to rush hour traffic.
- Add 1-2 more lanes on both sides and put more than one pathway into Maricopa rather than just the 347 as the main road to go to from Maricopa county. If we do those 2 things, it'll make the 347 less cramped and there will be less crashes
- DEFINITELY!!!
- Better roads
- Fix all the items in question 6 above. Especially changing from one lane to two lanes and then changing right back again
- More enforcement
- Signs informing drivers that cyclist and pedestrians are using the roads as well. Enforcing current laws. Increasing disciplinary actions for law breakers
- Increase traffic lanes, possibly an overhead express skirting City Centers. Through traffic is the issue not local folks driving around or shopping in, the neighborhood
- There needs to be more of a police presence on Pinal between Villago and the I-10 and throughout the town
- Simple, infrastructure to alleviate constant traffic jams and driver distraction. Been in 3 accidents in 7 months. Serious problems

- We must have no hands driving. It is ludicrous that Arizona does not have a law so Pinal County should make a law like most of the rest of the country
- More enforcement. Speed traps regularly on Ellsworth, Empire, Hunt Highway
- Change the attitude of drivers to obey speed limits, be more cautious and to be more courteous
- There is a large volume of traffic going north on Ironwood to the US 60. There is one left turn lane onto the westbound 60. I would like to see the intersection at the freeway on-ramp repainted so there would be two left turn lanes. That would help with the volume of traffic and cars lane cutting before the left turn lane
- More classroom and behind the wheel time for new motorists. Instill stay to the right unless passing. Illegal aliens not being able to read signs or operate vehicles properly!
- Stricter laws for texting
- Cell phone services turned off in vehicles...and school speed limits enforced at school opening and closing hours only...not the entire day...
- Wider roads such as 5 or 7 lane roads
- All home building in the area needs to stop immediately to allow for highway infrastructure to be built. In another 10 years ADOT is going to be looking at buying up homes in the area to build freeways in the area, anyway. Might as well do it before another 10,000 homes are put in. The Gila River Reservation's sovereign nation status needs to be revoked (it's not like they're using all that land anymore), and a freeway connecting Hunt Highway to I-10 needs to be constructed. Barring that, Hunt Highway would need to be made a freeway from SR 79 in Florence to US 60 in Mesa.
- Have more deputies in the area and making sure people are stopped and given tickets even if you must stop 5 or more cars at a time
- More enforcement in targeted areas
- Arizona should have a law against texting and driving in addition to talking on a cell phone, most cars are now equipped with blue tooth and a driver can use it. Speed kills, not sure why the drivers in Pinal County think the 50 MPH means 75 MPH. Also, too many aggressive drivers, maybe we should have more law enforcement officers
- Enforcement of traffic laws
- Outlaw drivers using cell phones
- More patrolling in main city streets
- More 4 lane roads to accommodate high population of commuters
- When the construction people leave for the day, remove everything in the road and open it up to traffic. And people will continue to roll on though stop signs, you can't have a police officer patrol all the signs. But there should be a police officer at every school slowing down traffic, because few people observe the posted speed limits when school is in session
- Tougher laws/fines on distracted driving
- Not sure you can fix stupidity
- Hands off phones as a law and more tickets given for drivers who don't observe red lights, use turn signals and other common curtesy driving rules. A law regarding proper merging would be nice.
- Lower speed limit and give out tickets for cell phones while driving.
- Streetlights in all rural areas!!!!
- More turn arrows
- Slow down, give more tickets for speeding
- High volume roads (Combs, Germann and Ocotillo) need to be widened and have turn lanes. Additional traffic lights need to be installed at some intersections
- Better speeding enforcement
- GET SLOW TRAFFIC OUT OF LEFT LANES
- Increased enforcement and higher penalties for all motorists who break the law whether it's speeding, tailgating, texting or driving aggressively. Bicyclists have no safe, separated (by means of a median or separate curb) lane to set them apart from where motor vehicles drive. It's no contest when a vehicle collides with a bicyclist and a painted line on the road is no barrier to a motor vehicle
- build more roadways to help with congestion
- I really don't know
- Law enforcement enforcing the laws. No texting or cell phone use without Bluetooth or hands-free.
- More open/alternative roads, less construction, more 4 way stops
- Must ban texting and driving
- I know Pinal County Deputies are spread thin...bigger budget for the sheriff's dept to be able to be tough on traffic violators
- Increase all speed limits NOW
- More lanes
- Changing the way people think and drive

- Complete road construction north/south bound, remove bottle necks like on Ocotillo from Signal Butte to Ironwood. Repair roller coaster roadway on Ellsworth from Queen Creek north to Germann. Same on Queen Creek/Pima east/west to/from Ironwood, especially from Signal Butte to Fulton development Ironwood Crossing. Also, remove bumps on Ironwood road surface southbound 1/2 mile from Baseline intersection
- Cell phone ban
- Heavy investment in main arterial road corridors. Law enforcement presence in trouble areas
- Stricter controls on folks convicted of DUI, harsher punishment for DUI and speeding.
- There needs to be a larger presence of law enforcement and not just visual to use scare tactics. Law enforcement needs to be citing these people to enforce the laws. There needs to be a law banning cell phone use while driving. There is also a need for speed bumps and speed enforcement in neighborhoods
- Laws prohibiting driving and using cell phones and more citations for following too close
- Let's get moving on fixing the roads and remove construction during rush hour.
- More officers on the road, speed enforcement
- Better roads and entrances to public places
- MAKE IT ILLEGAL TO TEXT WHILE DRIVING for all drivers, Better driver training, I'm from out of state and drivers in general do not use turn signals, enforcement of the smaller infractions
- Stop texting; speeding
- We need more roads and less cones.
- Construction companies need to do a better job rerouting traffic and informing the public of intended construction. Construction should be done at night and we need a highway/better access in and out of San Tan Valley
- Wider shoulders with bike lanes, sidewalks, a safe/marked way for pedestrians to cross in between lights, give out more speeding tickets
- Bike lane not safe for bikes or other users need to separate from traffic
- Increase fines. People will pay more attention if paying 2,000.00 for speeding ticket
- crack down on excessive speed. capture photos of cell phone usage and fine the offenders
- People who are driving "No texting, talking on cells, speeding. Being aware of their surroundings and others
- Left on arrows only at Ironwood/Gentzel and left on arrows only at ironwood/pima. Better roadways. Complete the SR 24!!! And have way more officers to combat all the speeding down ironwood, people don't slow down once they get into town, so you have people driving 65-70 MPH through Ironwood and Pima. It's insane. And people drive like jerks cutting people off and speeding, tailgating. All this can be minimized if more officers were pulling people over for this behavior
- Sidewalks on both sides of every road as well as streetlights. A freeway
- Wider roads (which is a work in progress), the Sheriff's Office I think is doing a good job, but people are people and don't always follow laws, rules etc... the only thing I think is to increase the police presence
- More lanes. Ocotillo needs two lanes each way, minimum, between Schnepf and Signal Butte.
- How many times has a driver entered the freeway going the wrong way? That's poor design. We need to figure out better transportation design that incorporates better flow, better consistency in traffic patterns that match best practices in major municipalities, and that are inclusive for all users of the roadways. Pinal county is one of the worse when it comes to bicycle friendly communities with seemingly minimal consideration for the user group
- More road/traffic lanes, turn lanes, better visibility at intersections
- Education and enforcement. Again, some roads just need a signal light or updating
- Increased enforcement, providing pedestrian paths (sidewalks, pedestrian overpasses), ample bike lanes wherever possible, especially on new roads / streets, adapting "complete street" designs and standards, detached sidewalks in residential and high pedestrian areas, ample parking near retail, road design that minimizes the need for left-hand turns across oncoming traffic
- DRIVER BEHAVIOR
- More enforcement on roadways
- Don't allow cell phone use as Tucson has done
- We need a freeway. There are too many people going across the valley for work and the commute and having to drive through several towns and hit a million stop lights. By the time everyone gets close to San Tan they are in a rage from fighting with traffic to get home. Also, I totally understand the need for construction to help better our roads but for the love of god please concentrate on one at a time. Don't destroy every road we have at the same time, that just makes it worse for everyone.
- More options in & out of Maricopa
- More bike lanes and stricter texting laws
- Traffic or law enforcement
- No lights between Copa and I-10. should be overpass at all intersections
- Enforced traffic laws and no texting and driving laws

- Widen SR 347 to 3 lanes both ways with overpass at Riggs Road
- Post a Highway Patrol car or have more of them out stopping people. Speeding would go down if people knew they were going to get ticketed
- More police presence
- Need to hand out more tickets
- Further road system development. Hunt Highway & Gantzel projects are a decade late. Need proactive and aggressive road updates.
- More police enforcement
- I think the speed limit on the SR 347 should be lowered to 55 MPH, with heavy patrols. That highway is crazy, and I avoid it whenever possible
- Enforcement (on speed). That is especially true outside City limits. Such as SR 238 going west and NOT in City limits. Both SR 238 and SR 84 need to be 4 lines. The semi's/farm equipment on SR 84 go to slow and their loads blow off or drop off. They are rarely ever covered
- Increased OFFICER patrol 24/7
- Speed limits should be more uniform throughout the community. Because they are too low, people speed and don't limit their speeding. If they were the same on similar streets, people would be more likely to follow the speed limits.
- Pave Louis Johnson from SR 347 to Amarillo Valley. Repave (Smooth) Amarillo from Teel to Louis Johnson. Realign Amarillo Valley at Louis Johnson to Eliminate Blind curve on South Side of Intersection
- More random police presence and tickets for speeding
- Higher Fines, stiffer penalties, maybe rep jail time
- More unmarked police vehicles
- Make it mandatory that Driver's Education is available to younger drivers. Mandatory drivers' education should also be implemented for individuals involved in accidents or moving violations such as running red lights, not stopping at stop signs, or other infractions which may create an accident
- Required retesting, increased law enforcement presence, on-going driver education/road signage
- Strong rules about inattentive driving and a police force that is willing to enforce those rules
- Educating drivers, conveying the message of impeding traffic, and demanding more of a human element when traffic control is necessary
- Safer crosswalks and better defensive driving skills by drivers. No use of cell phones at all in the car unless they are hands-free
- Adopt hands free laws with stiff penalties. Start citing drivers for speed and reckless driving more often and with higher consequences
- Better examples set by law enforcement and more attention by same
- Better laws and enforcement, better accommodation for other users, cyclist, pedestrians
- Left turns on green arrows, Police patrolling to catch speeders and tailgaters. Need hands-free laws in this state. Tired of getting rear-ended by people texting!
- Separate pedestrian & hike paths in an interconnecting network
- Driver training
- Ban texting and talking on phone while driving
- Potentially more police presence
- Number of lanes
- Synchronized lighting at stop lights. Increased police or highway patrol presence lighting at Edison/ Butterflied intersection
- Overpass at Riggs and Casa Blanca
- Lower speed limit between Casa Blanca and Riggs or More police presence. Make SR 347/Riggs underpass with "Freeway Exit" for Riggs
- Widen SR 347
- Drive less hurriedly
- Texting while driving legislation, driver education courses in school, and enforcement
- The written and driving test to obtain a license needs to be improved. I feel it is too easy to pass and doesn't cover enough ground to determine if someone is ready to drive. Motorcycle police need to stop pulling people over for frivolous things such as window tint or going 5 mph over the speed limit and need to focus more on the people that make maneuvers that are dangerous, especially to other motorcycle riders. Police also need to start ticketing slow drivers that hold up traffic and cause traffic jams, because traffic jams often lead to collisions and aggressive driving
- There needs to be an overpass at Riggs Road and SR 347 and there needs to be a right-hand lane continuous flow overpass from SR 347 onto I-10 West.

- Bike/Pedestrian paths along the washes or road such as the Queen Creek Wash (like in the town of Queen Creek, Gilbert etc.) Paths would be nice to see connect along Gantzel and other main roads to travel further distances on bikes or walking
- Change the culture of the drivers to learn to share the road with pedestrians and cyclists
- Three lanes Casa Grande to Phoenix and more signs in English and Spanish telling people not to camp in the passing lane; it's a law
- SR 347: every stop light between Maricopa and I-10 needs to be eliminated and replaced with ramps/overpasses. SR 238 (Maricopa - Casa Grande Hwy): Widen lanes, add lighting, resurface the pavement, eliminate the pair of unnecessary "s" bends between Russell and Val Vista.
- Education. I think too often people don't realize the damage they can cause by not following the law. They think it will never happen to them
- Central barrier to prevent cross over accidents, red light cameras, more patrol cars and harsh fines
- Passing lanes on all the highways in Pinal County, stop lights at high traffic intersections, lighted stop signs in rural areas, no passing markings at intersections on highways and turning lanes. More paved roads in rural areas
- Get rid of safety corridor, enforce slow driving
- Add another lane to I-10 between Phoenix and Casa Grande
- Increase in lanes to allow drivers a better choice of what lanes to travel in, I-10 needs at least two more lanes between Casa Grande and Chandler, a separate truck lane like in MA would ease the problems seen today and it just keeps on getting worse
- Enlarge I-10 to 3 lanes all the way from Tucson to Phoenix
- More patrols
- More education, license revocation, more enforcement
- Widen roads, provide more through streets (has been improving little by little)
- Tougher laws and enforcement of distracted driving
- More roads
- Single roads to two lanes, more police patrol to catch speeders and drunk drivers.
- Stricter enforcement of the laws, and more Police/Sheriff
- More car seat/seat belt enforcement, make it easier to report DUI's
- No texting while driving laws and stricter driving laws and license restrictions for seniors
- Better roads and more patrols
- Marijuana law
- More lanes, paint that is reflective, that can be seen at night and in the rain. Not spraying oil on a road and waiting over a month to repaint the lines. I've seen this happen several times in my area alone. providing walkways for pedestrians on roads that don't have sidewalks
- Make the stop lights have a count down and creating another route to enter and exit the city of Maricopa maybe make a tunnel since dust storms closes the SR 347 down frequently. That is frustrating you just don't know when that will be or happen
- Implement NO TEXTING and driving for all operator's law
- Roundabouts at busy cross sections/streets with no traffic lights (ex: in Casa Grande off Cottonwood Lane and Kadota Ave.) and expanding roads/freeways/highways with heavy traffic that have only 2 lanes
- The only thing that changes people's minds is when you hit them in the pocketbooks. There needs to be a program where problem areas are identified and discrete, mobile units are set up to monitor the problem. Warnings need to be sent out to selfish drivers to let them know that they are on your list
- More public safety info
- No texting, hands free phones, more bicycle lanes, more streetlights in residential areas, traffic signal in Florence at Hunt Highway and Oasis Magic Ranch residential entrance
- More roads, easier access in and out of Pinal County
- Add more lanes and roads. Put more responsibility on home builders to make improvements to roads. Here's a couple of specific suggests: First, I've encountered county street sweepers on two lane roads during rush hour traffic. This seems like an easy fix that would reduce congestion and frustration. Second, there are hot spots of congestion that need attention. One is on Schnepf and the Queen Creek wash where the gravel and cement trucks fight for access to the highway. Most are courteous but the sheer number of them and their slowness creates a safety issues to say nothing of the deterioration of the roads in that area
- Wider streets/more lanes
- Very simply, they need to hire more traffic cops locally to man the streets; more Highway Patrol Officers to man the freeways -- especially in construction zones; where the speed limit is drastically reduced -- I drive I-10 daily in construction where speeds are reduced from 75 to 65 MPH; then to 55 MPH. 90% of the drivers past me driving in excess of 80 MPH! Ironically, there are now two (2) crosses (where obviously 2 people were killed) in this area. Yet,

it is never manned by Highway Patrol -- Arizona is akin to the Autobahn in Germany -- there is NO SPEED LIMIT and we all know that SPEED KILLS. All over Arizona, there are dozens of fatalities, seemingly daily but, then if you consider drivers going in excess of 75 MPH - and up to 100 MPH -- even in a rear-end impact, there are going to be fatalities -- let's not even imagine the impact of a head-on collision, at these rates of speed!

- More police monitoring certain areas
- Farm machinery should either be directed to not use the roadways during peak travel times (7 a.m. - 9 a.m. and 4 p.m. - 6 p.m.) or to use the turn rows along the side of the fields to travel on during those times.
- tougher laws regarding cell phones and other electronic devices while driving. more police enforcement for speeders especially in residential areas. I live in one of the unincorporated areas of Casa Grande and people use my street to race on. I have called Sheriff's Department many times, but nothing happens. Somebody's child is going to get killed one day
- Above 50 MPH, above 35 MPH in the nationally recognized speed traps we have in Pinal County
- SR 79 needs to be multi lane to accommodate the heavy traffic
- More than one lane on SR 87. Drivers unexpectedly turn, cut others off who are traveling at a steady speed etc.
- More signage, better roads. More law enforcement activity.
- Good lighting on all main streets, bike paths
- Better planned construction (not all at one time or coordinate so if Hunt Highway is under construction another same direction road is not under construction as well
- Streetlights and traffic lights in between long stretches of roads
- Additional/alternative roadways and routes to high populated areas
- Perhaps stricter laws regarding cellular phone or device usage while driving
- Public attitude towards safety and concern for others, more Police/Sheriff presents & actions towards violators
- Education, re-test for driver's license more frequently, stiff fines & penalties.
- Building more and wider roads is the only answer at this point. Having enough street
- Lights, especially on the sides of the road and at the smaller intersections
- Offer more public transportation
- People probably should have to take anger management classes when getting their driver's license - or start ticketing people who like to tailgate
- Put these druggies from the small towns away
- Make it unlawful to use cell phones while driving
- Education and take the politics out of the I-10 corridor between Casa Grande and Phoenix and widen it to three lanes in each direction
- A change in driver behaviors. Stronger laws and/or more enforcement
- Local ordinances on texting and driving that will allow law enforcement to sanction people
- Wider streets with sidewalks and bike lanes. More traffic officers. Parking empty old police vehicles around problem areas
- Faster lane/passing availability to get around slow moving farm equipment and drivers under the speed limit. Bike lanes seem to be non-existent
- SR 79 coming in from US 60, has high volume of traffic from standard vehicles to semis. Thus, providing a safety hazard & unable to safely pass. This highway location needs to be expanded before further fatal accidents occur. Not a very safe drive for county/state employees currently working in the Florence area. We are also gaining highly qualified employees that travel in from various outside City of Florence. The roads are too country style and need to be improved, to keep up with growth and population of Pinal County, and make it all easier ride for the employees and those visiting our surrounding community
- More streetlights (get rid of dark sky ordinance), more road signs, better street markings, better roads, more 2-way left turn lanes or center medians
- A better, more knowledgeable Public Works Dept especially the Traffic Section
- Make talking and texting on phones illegal
- Create more access to E/W & N/S access to San Tan Valley area and build more freeways ASAP
- More frequent light changes during rush hours and maybe those noise making grooves they use on highways to keep you from drifting right before intersections with the highest crash numbers...even those with just stop signs if needed
- More enforcement and heavier penalties
- Cell phone/texting laws; better bike lanes
- Additional traffic enforcement
- Traffic enforcement. Visible patrol cars
- More police presence
- Repair roads - most county roads are in very poor condition... especially for cyclists!

- Interchange at Riggs, expand to 6 lanes, enforce speed, limits and stop reckless operators would be a start. Law enforcement is practically nonexistent on SR 347. For a certain segment of our society today that means no reason to obey traffic laws
- I am not sure what will make people drive slower
- Wider roads
- Another way out of Maricopa to I-10 besides the SR 347. Overpass at Riggs Road. More enforcement, speed cameras
- If there were more officers along the route at different times and places constantly (not just 1 or 2 days a month) drivers would have to pay attention
- Barriers between north and south bound traffic and widening of road
- More police on highways widen SR 347, add much longer left-hand turn lanes on north and south bound SR 347 at Riggs Road and right-hand turn lane onto 347 eastbound on Riggs. An overpass at Riggs and SR 347 would solve most crashes in the area.
- Passing lanes
- Immediate installation of median barrier cables on I-10
- Less building of homes, more resources where we live, less travel time needed!
- Better planning of construction zones. Most people have a long commute to work or school. When there is construction on every major road, it makes drivers very impatient
- Either create wider paved shoulders/bicycle lanes or restrict bicycles from roads that do not have bike lanes - they make poor decisions by riding in inappropriate areas/situations risking their lives and creating a traffic hazard when ignore traffic signs, swerve into traffic and ride on narrow roads (lacking a bike lane or paved shoulder)with no passing and/or blind curves
- Add turning lanes and passing lanes in high traffic areas
- I think we need to enforce the laws put more boots on the street stop giving warnings and start writing tickets. I get passed on the shoulder every single day I get passed on double yellow lines every single day passed by those going 15 MPH plus over while I am locked on cruise
- Outlaw texting or watching videos while driving
- Roads need to be expanded and new ones added
- I am not sure. Maybe more ticketing
- Speed control fix the roadways, road construction and repairs should be done in the evening after rush hours. Stop building 2 lane roads that suddenly merge into 1 lane (several examples can be found on Hunt Highway
- We need our lawmakers to make it illegal for any driver to text while driving
- Stricter enforcement of traffic laws, including more designated "safety corridors". Ban on texting for every driver in the State of Arizona. More DUI/Distracted Driving Patrols. More "prevention" messaging for all drivers. More signage that says, "strict enforcement of speed limits", etc.
- Pass a law at the State Legislature banning cell phone use while driving. No texting allowed. Hands free devices would be permissible
- Make texting while operating a motor vehicle illegal with fines starting at \$1000 for the first incident
- More enforcement of traffic laws
- Pay more attention to daily driving habits
- More campaigns on the importance of safe driving (e.g. no texting) and for parents to actively play a role on teaching their young drivers safe driving skills. Also, parents must set good examples as well.
- Most highway safety issues are related to our culture of enabling and tolerating poor behavior. Need to strengthen educational component (require driver's ed in high school including more rigorous skills testing), increase cost of non-compliance (remote lock out of drivers not paying insurance premiums or expired/revoked licenses), implement vehicle inspections. Re-implement photo/radar speeding and red-light running enforcement (roll fines back into education/enforcement).
- Expand I-10 to 4 lanes
- Laws, enforcement
- Increased law enforcement presence and writing tickets (i.e. not automated systems; red light cameras, etc.), more thorough licensing requirements
- Distracted driving laws
- Drastically increased enforcement on SR 347 would help as could a marketing campaign about slowing down and paying attention.

Question 8: Where do you live?

- Apache Junction- 1
- Casa Grande- 32
- Chandler-1
- Coolidge-6
- Dudleyville- 1
- Eloy-3
- Florence-21
- Gold Canyon-1
- Maricopa-50
- Oracle-3
- Oro Valley-1
- Queen Creek-15
- San Tan Valley-198
- Superior-2
- Tucson-5
- Other-23
- Other Response:
 - Arizona City- 8
 - Hidden Valley-4
 - Catalina- 1
 - Phoenix-1
 - Between Florence and San Tan Valley-2
 - Anthem at Merrill Ranch Parkside-1
 - Outside Florence and close to San Tan Valley- 1
 - Between Florence and Oracle Junction-1
 - 11-mile corner-1
 - County between Casa Grande and Coolidge
 - Safford-1

Question 9: Primarily, I am responding as a ...

- Motorist: 329
- Bicyclist: 6
- Pedestrian: 4
- Other
 - Motorist and Cyclist: 2
 - All the Above (motorist, cyclist and pedestrian): 3
 - Resident: 2
 - Parent: 1
 - Family to car crash victim: 2
 - Law enforcing Official: 3
 - Motorcyclist: 2
 - I forgot to mention we need bike lanes on the highways they use in Pinal County: 1
 - Transportation professional: 1
 - Business Owner: 1

Apache Junction	Area of Concern for Drivers	Ironwood/Gantzel Road - hell road due to excessive speeding, reckless lane changing, vehicles pulling out and cutting off speeding traffic from side roads, strip malls and Circle K. From Bella Vista to US60 this stretch of road is a freeway not a county	33.364893	-111.563317	https://gci.mysocialpinpoint.com/pinal-county#/marker/82159
Apache Junction	Area of Concern for Bicyclists	No bike routes along Idaho Road so people tend to ride on sidewalks.	33.416263	-111.546204	https://gci.mysocialpinpoint.com/pinal-county#/marker/80380
Apache Junction	Area of Concern for Drivers	With the addition of the bike lane the road is very tight. When there are large trucks and traffic is heavy it is tight for bicyclist and cars. The road needed to be widened prior to placing a bike lane in such a busy road	33.413747	-111.559381	https://gci.mysocialpinpoint.com/pinal-county#/marker/80306
Apache Junction	Area of Concern for Bicyclists	Same: Heavy traffic area with not a lot of visibility and high speed of motorist. Need a round about and bike lane.	33.436245	-111.520666	https://gci.mysocialpinpoint.com/pinal-county#/marker/79937
Apache Junction	Area of Concern for Drivers	The traffic to the lakes; Elks, museum, state park has gotten so high that I think you should construct a round about here. Better than a traffic light that requires maintenance. This road has horse, bike, cars and cars (with boats) traffic.	33.43624	-111.520672	https://gci.mysocialpinpoint.com/pinal-county#/marker/79934
Apache Junction	Area of Concern for Drivers	Pedestrians and bicyclists don't have a crosswalk in the middle of Delaware and bicyclists often come out of Walmart and ride in front of your car.	33.41364	-111.572084	https://gci.mysocialpinpoint.com/pinal-county#/marker/79646
Apache Junction	Area of Concern for Drivers	Going east on baseline, the right turn lane is not long enough, nor is there enough signage or road markers, to effectively use the three lane split, causing a backup when confused drivers are sideways trying to get into a new lane at the last minute.	33.378809	-111.563812	https://gci.mysocialpinpoint.com/pinal-county#/marker/79353
Apache Junction	Area of Concern for Drivers	There needs to be a traffic light here during rush hour. If people don't like that all the time, then outside of rush hour, make it a blinking red, on meridian, with a blinking yellow on baseline, which effectively turns it back into a stop sign with a t	33.378661	-111.580625	https://gci.mysocialpinpoint.com/pinal-county#/marker/79352
Apache Junction	Area of Concern for Drivers	There's no warning for motorists prior to the curve, heading east around the turn, that the right lane is a right turn only. This causes confusion and sometimes people end up misusing the turn lane because they didn't want to be there. It might help if i	33.412772	-111.546338	https://gci.mysocialpinpoint.com/pinal-county#/marker/79351
Apache Junction	Area of Concern for Pedestrians	This is not a pedestrian concern, this is about when I ride my horse in this area. Crossing 88 here in front of the Hitching Post is very dangerous. We need a traffic light here in the worst way. Thanks	33.435775	-111.521101	https://gci.mysocialpinpoint.com/pinal-county#/marker/79344
Apache Junction	Area of Concern for Bicyclists	Bike traffic on the 88 is extremely dangerous for both drivers and the bikes. With no shoulders, the bikes are forced to ride in traffic lanes and there is no margin for avoidance. Add to that a high amount of large vehicles / boats, limited passing ar	33.441075	-111.515522	https://gci.mysocialpinpoint.com/pinal-county#/marker/79340
Apache Junction	Area of Concern for Bicyclists	There are little to no bike lanes on Ironwood	33.407406	-111.563416	https://gci.mysocialpinpoint.com/pinal-county#/marker/79328
Apache Junction	Area of Concern for Pedestrians	Very unsafe for a person to walk across the street even with controlled traffic signals. Superstition Blvd and Meridian.	33.420768	-111.58026	https://gci.mysocialpinpoint.com/pinal-county#/marker/79326
Apache Junction	Area of Concern for Drivers	There needs to be 2 left turn lanes from northbound Ironwood to west bound Rt 60. Morning rush hour traffic backs up almost a 1/2 mile during those times.	33.383812	-111.563201	https://gci.mysocialpinpoint.com/pinal-county#/marker/77604
Apache Junction	Area of Concern for Drivers	a large volume of cars travel north on ironwood to go west on the 60. there needs to be two left turn lanes to the freeway onramp. if wouldn't cost that much be it would have a significant impact on traffic flow.	33.386902	-111.563126	https://gci.mysocialpinpoint.com/pinal-county#/marker/76884

Pinal County	Area of Concern for Drivers	There should be a four-way stop here, or possibly a round-about. It is a dangerous intersection for cars, pedestrians, and bicycles. There are many accidents and even more close calls here. I hate driving here. Very dangerous especially at high traffic t	33.160521	-111.56483	https://gci.mysocialpinpoint.com/pinal-county#/marker/80188
Pinal County	Area of Concern for Drivers	Golf Club Dr and Johnson Ranch Blvd is bad for cars, bikes and pedestrians. I believe the area needs a roundabout, it currently is a 3 way stop which is not working!!! Also, a street light would really help for nighttime driving!!!	33.16008	-111.564853	https://gci.mysocialpinpoint.com/pinal-county#/marker/80132
Pinal County	Area of Concern for Drivers	By far the worst intersection in the entire valley. Even worse than Grand Ave! Our friend is the one that just came out of rehab from California after being in a crash in Feb! There should be a merge Lane to turn right from Combs to Rittenhouse and rotte	33.219323	-111.571999	https://gci.mysocialpinpoint.com/pinal-county#/marker/79338
Pinal County	Area of Concern for Drivers	People travel 10+ miles over the speed limit all along Ironwood (55 MPH). I choose to go the speed limit and I have had very angry people flipping me off or yelling at me.	33.299807	-111.563458	https://gci.mysocialpinpoint.com/pinal-county#/marker/79337
Pinal County	Area of Concern for Bicyclists	Rt88 is a beautiful ride on a bicycle but extremely, extremely dangerous especially as there is little if no shoulder accompanying the 55 mph speed limit. To compound matters there is no access to Rt88 from the east side beyond that 55 mph zone.	33.445193	-111.502304	https://gci.mysocialpinpoint.com/pinal-county#/marker/79332
Pinal County	Area of Concern for Drivers	There was little to no notice displayed of the directional turn change of the middle lane at the east bound Ironwood exit. People still utilize the middle lane for left turns simply because they do not know it changed.	33.386564	-111.563366	https://gci.mysocialpinpoint.com/pinal-county#/marker/79329
Pinal County	Area of Concern for Bicyclists	The section of Hwy 88/Apache Trail all the way from Idaho Rd northeastward has no shoulder and the road is just wide enough for 2 vehicles. Any bicycle has no space at all. It would be good if there was enough paved shoulder on both sides at least as far	33.446661	-111.503506	https://gci.mysocialpinpoint.com/pinal-county#/marker/79327
Pinal County	Area of Concern for Drivers	I have seen so many people, moms with baby strollers, kids,old people, and me included, trying to run across this street in this area. At the very least, I would like to see a FLASHING sign saying slow down for pedestrians BOTH ON NORTH AND SOUTH DIRECTI	33.176182	-111.586134	https://gci.mysocialpinpoint.com/pinal-county#/marker/78979
Pinal County	Area of Concern for Drivers	Another speeder blasting through a red light across Gantzel Road.	33.248817	-111.563062	https://gci.mysocialpinpoint.com/pinal-county#/marker/78964
Pinal County	Area of Concern for Drivers	Gantzel - all the way from Ocotillo to Combs and beyond seems to be a race track for impatient drivers. Cars regularly are travelling at speeds in excess of 60 mph. I would be in favor of radar cameras to slow drivers down.	33.229525	-111.563292	https://gci.mysocialpinpoint.com/pinal-county#/marker/78926
Pinal County	Area of Concern for Drivers	EB 60 traffic exiting at Ironwood... the lane directions were changed, but drivers still ignoring (or not paying attention to) the signs. The middle lane is now straight or RIGHT, but people everyday pull into that lane to turn left, so now they block tr	33.386496	-111.563496	https://gci.mysocialpinpoint.com/pinal-county#/marker/78853
Pinal County	Area of Concern for Drivers	People are still turning left out of this parking lot exit, even after it was designated for right turn only, because of the dangers. Any ideas?	33.248845	-111.561897	https://gci.mysocialpinpoint.com/pinal-county#/marker/78851
Pinal County	Area of Concern for Drivers	This entire stretch of Ocotillo from Ironwood to Schnepf used to be 45 MPH years ago. Back when they added the middle turning lane is when they bumped it down to 35 MPH, with no warning or explanation. So what happened? My husband has tried to get answer	33.249024	-111.546614	https://gci.mysocialpinpoint.com/pinal-county#/marker/78850
Pinal County	Area of Concern for Drivers	This whole intersection is a freaking mess!!! First off, the opposing left turn lanes line up too much, so that you can't see oncoming traffic to turn left. It's only safe to turn on the arrow. With that said, the left turn lanes are way too short, so w	33.249045	-111.563354	https://gci.mysocialpinpoint.com/pinal-county#/marker/78848
Pinal County	Area of Concern for Drivers	Why have the 2 potholes at the exit here not been fixed yet?!	33.21984	-111.56497	https://gci.mysocialpinpoint.com/pinal-county#/marker/78846
Pinal County	Area of Concern for Drivers	Just about the dumbest stop sign in the world! Either eliminate it or put a round-about!	33.219985	-111.545997	https://gci.mysocialpinpoint.com/pinal-county#/marker/78844
Pinal County	Area of Concern for Drivers	I vote for a round-about.... no more lights!!!	33.219964	-111.550195	https://gci.mysocialpinpoint.com/pinal-county#/marker/78843
Pinal County	Area of Concern for Drivers	Add those lighted stop signs, like you did at Bella Vista & Quail Run.	33.220076	-111.528741	https://gci.mysocialpinpoint.com/pinal-county#/marker/78842
Pinal County	Area of Concern for Drivers	You need a posted speed limit sign here! Drivers coming off Arizona Farms road (50 mph zone) & heading South on 79 (65 mph zone) need to be alerted to the speed limit change. This is also an uphill climb, so they don't always speed up enough to account f	33.117656	-111.363022	https://gci.mysocialpinpoint.com/pinal-county#/marker/78841
Pinal County	Area of Concern for Bicyclists	Please continue the bike lane until it connects with the existing bike lane at Empire Rd. It is extremely hazardous for bicyclists traveling on Hunt highway.	33.190509	-111.599458	https://gci.mysocialpinpoint.com/pinal-county#/marker/78699
Pinal County	Area of Concern for Bicyclists	Install flashing share the road signs. This will remind drivers that bicycles will be merging left into a travel lane, when the bike lane ends.	33.163291	-111.565001	https://gci.mysocialpinpoint.com/pinal-county#/marker/78698
Pinal County	Area of Concern for Drivers	Both of these parking lot exits should be right turn only while exiting onto Hunt Highway. You should never allow left turns onto a busy highway this to a busy controlled intersection.	33.161935	-111.563684	https://gci.mysocialpinpoint.com/pinal-county#/marker/78697
Pinal County	Area of Concern for Pedestrians	Make this a concrete median with a crosswalk. Drivers ignore the road paint and turn left onto Bella Vista and turn left from Bella Vista onto this dead end street.	33.161601	-111.562507	https://gci.mysocialpinpoint.com/pinal-county#/marker/78696
Pinal County	Area of Concern for Pedestrians	School crossing, 70% are speeding, asked an officer if they could patrol it for awhile and was told they donâ€™t have enough officers to do the patrolling	33.143534	-111.554627	https://gci.mysocialpinpoint.com/pinal-county#/marker/78687
Pinal County	Area of Concern for Drivers	People speed thru here trying to pass everyone in the left pane before they get to the stop sign.	33.219967	-111.55268	https://gci.mysocialpinpoint.com/pinal-county#/marker/78681

Queen Creek	Area of Concern for Drivers	Ellsworth Loop from Hunt Hwy to Pecos is another auto bond. Needs traffic reduction less than 45 mph due to mix traffic use of passenger and commercial/industrial trucks. This Loop is being used as a freeway and it is NOT!!	33.211763	-111.634548	https://gci.mysocialpinpoint.com/pinal-county#/marker/82165
Queen Creek	Area of Concern for Drivers	I have almost been hit by drivers trying to get ahead of traffic -go into the right lane, which ends after the light, then instead of yielding to traffic -just cut you off. The right lane needs to be right turn only at the light to stop this before someo	33.219954	-111.571326	https://gci.mysocialpinpoint.com/pinal-county#/marker/78686
Queen Creek	Area of Concern for Drivers	This whole road from gary/rittenhouse to ironwood/gantzel is horrible. With the school there and no modification to address traffic flow. This section is the worst for all. Traffic,walking or biking. There needs to be something done. With the roads and	33.219945	-111.57796	https://gci.mysocialpinpoint.com/pinal-county#/marker/78218
Queen Creek	Area of Concern for Bicyclists	Very heavily traveled road between Ellsworth and Ganzel. Needs to be widened with protected bicycle lanes in both directions.	33.205272	-111.610776	https://gci.mysocialpinpoint.com/pinal-county#/marker/77871
Queen Creek	Area of Concern for Drivers	Something needs to be done about the traffic for ALA, itâ€™s beyond ridiculous, add another lane or make another entrance off of ironwood or something	33.21994	-111.56683	https://gci.mysocialpinpoint.com/pinal-county#/marker/77839
Queen Creek	Area of Concern for Pedestrians	No side walk for kids to get to school	33.220025	-111.566929	https://gci.mysocialpinpoint.com/pinal-county#/marker/77804
Queen Creek	Area of Concern for Drivers	Widen road, provide sidewalks and crosswalks.	33.220021	-111.56437	https://gci.mysocialpinpoint.com/pinal-county#/marker/77464
Queen Creek	Area of Concern for Pedestrians	Would be a good idea to make a pedestrian over-bridge so children can get to one side or the other. Widen the street to 2 lanes in both directions and have a center lane to turn into side street areas and into the Fry's shopping area.	33.219841	-111.569579	https://gci.mysocialpinpoint.com/pinal-county#/marker/76815
Queen Creek	Area of Concern for Pedestrians	School children walking along Combs! Very dangerous situation when they try to cross to the Fry's shopping center. NO SIDEWALKS!! Narrow, very high volume road.	33.220119	-111.569936	https://gci.mysocialpinpoint.com/pinal-county#/marker/74915

Appendix C: Interstate 10 Resolutions

- Sun Corridor MPO Resolution
- Pinal County Resolution

DRAFT

RESOLUTION NO. 2018- 01

A RESOLUTION OF THE SUN CORRIDOR METROPOLITAN PLANNING ORGANIZATION IN SUPPORT OF THE INSTALLATION OF SAFETY STRATEGIES ON INTERSTATE 10 WITHIN PINAL COUNTY AS A SAFETY COUNTERMEASURE TO REDUCE THE FREQUENCY OF FATAL AND INCAPACITATING CRASHES

WHEREAS, the section of Interstate 10 (I-10) within the boundaries of Pinal County (from milepost 168.7 to milepost 232.8) was the site of 4,993 crashes between 2007 and 2016 according to the Arizona Department of Transportation's (ADOT) Accident Location Identification Surveillance System database; and

WHEREAS, of the 4,993 documented crashes on Interstate 10 within Pinal County, 100 were fatal and 223 were incapacitating crashes; and

WHEREAS, the Arizona Department of Transportation has exclusive control and is responsible for planning, building, and operating the interstate and state highways in Arizona; and

WHEREAS, Sun Corridor Metropolitan Planning Organization (MPO) encourages ADOT to identify and implement appropriate safety countermeasures on I-10 within the boundaries of Pinal County; and

WHEREAS, Sun Corridor MPO supports expediting all I-10 widening projects between Loop 202 and Casa Grande identified in the Maricopa Association of Government's Regional Transportation Plan and ADOT's FY 2024 – FY 2028 Development Program.

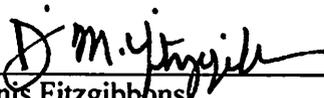

NOW, THEREFORE, BE IT RESOLVED that the Sun Corridor Metropolitan Planning Organization encourages and commits to coordinate with the Arizona Department of Transportation, as well as other transportation planning agencies, to install safety strategies by means of federal, state and local funding, for the section of Interstate 10 within the boundaries of Pinal County to reduce the frequency of fatal and incapacitating crashes.

PASSED AND ADOPTED this 13th day of November, 2018, by the SUN CORRIDOR METROPOLITAN PLANNING ORGANIZATION.

RESOLUTION NO. 091918-AD18-004

A RESOLUTION OF THE PINAL COUNTY, ARIZONA, BOARD OF SUPERVISORS IN SUPPORT OF THE INSTALLATION OF SAFETY STRATEGIES ON INTERSTATE 10 WITHIN PINAL COUNTY AS A SAFETY COUNTERMEASURE TO REDUCE THE FREQUENCY OF FATAL AND INCAPACITATING CRASHES

WHEREAS, the section of Interstate 10 (I-10) within the boundaries of Pinal County (from milepost 168.7 to milepost 232.8) was the site of 4,993 crashes between 2007 and 2016 according to the Arizona Department of Transportation's Accident Location Identification Surveillance System database; and

WHEREAS, of the 4,993 documented crashes on Interstate 10 within Pinal County, 100 were fatal and 223 were incapacitating crashes; and

WHEREAS, the Arizona Department of Transportation (ADOT) has exclusive control and is responsible for planning, building, and operating the interstate and state highways in Arizona; and

WHEREAS, Pinal County encourages ADOT and the Maricopa Association of Governments (MAG) to identify and implement all appropriate safety countermeasures on I-10 within the boundaries of Pinal County; and

WHEREAS, Pinal County supports expediting the I-10 Loop 202 to Casa Grande project identified in MAG's Regional Transportation Plan and ADOT's FY 2024 – FY 2028 Development Program in FY 2027.

NOW, THEREFORE, BE IT RESOLVED that the Pinal County Board of Supervisors encourages and will commit to coordinate with the Arizona Department of Transportation, as well as other transportation planning agencies, to install safety strategies by means of federal, State and local funding, for the section of Interstate 10 (I-10) within the boundaries of Pinal to reduce the frequency of fatal and incapacitating crashes.

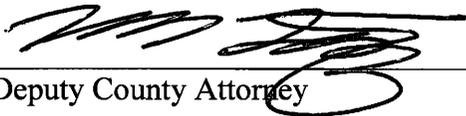

PASSED AND ADOPTED this 19th day of September, 2018, by the PINAL COUNTY BOARD OF SUPERVISORS.
